Math Fact Fluency Jennifer Bay-Williams, Gina Kling, 2019-01-14 This approach to teaching basic math facts, grounded in years of research, will transform students' learning of basic facts and help them become more confident, adept, and successful at math. Mastering the basic facts for addition, subtraction, multiplication, and division is an essential goal for all students. Most educators also agree that success at higher levels of math hinges on this fundamental skill. But what's the best way to get there? Are flash cards, drills, and timed tests the answer? If so, then why do students go into the upper elementary grades (and beyond) still counting on their fingers or experiencing math anxiety? What does research say about teaching basic math facts so they will stick? In *Math Fact Fluency*, experts Jennifer Bay-Williams and Gina Kling provide the answers to these questions—and so much more. This book offers everything a teacher needs to teach, assess, and communicate with parents about basic math fact instruction, including The five fundamentals of fact fluency, which provide a research-based framework for effective instruction in the basic facts. Strategies students can use to find facts that are not yet committed to memory. More than 40 easy-to-make, easy-to-use games that provide engaging fact practice. More than 20

assessment tools that provide useful data on fact fluency and mastery. Suggestions and strategies for collaborating with families to help their children master the basic math facts. Math Fact Fluency is an indispensable guide for any educator who needs to teach basic math facts.

Two-Minute Math Drills, Grades 5 – 8 ,2012-10-22 The Two-Minute Math Drill series was created to help teachers and parents monitor student progress in operations skills. This book focuses on fractions and decimals. It is a great tool to improve student efficiency in absorbing math facts by making use of timed two-minute drill exercises. Students learn one skill at a time and must master each assignment before moving on to the next timed drill. Each exercise includes a brief review of the skill offered in the last timed test before parenting problems involving the new math fact. The first half of the book reinforces operations skill with decimals; the last half focuses on fractions. The final pages include problems involving both fractions and decimals. Students clearly see their progress as they master each skill. They also become more accustomed to working against the clock as they build greater self-confidence in taking the standardized tests they will face in the future. Reproducible. Answer keys included
