As the first book of its kind, it addresses the major new technological developments in the field and will reflect current research trends, as well as industry needs. It comprises of a good balance between theoretical and practical issues, covering case studies, experience and evaluation reports and best practices in utilizing IoE applications. It also provides technical/scientific information about various aspects of IoE technologies, ranging from basic concepts to research grade material, including future directions.

**Rural Racism** Neil Chakraborti, Jon Garland, 2013-05-13 Rural issues are currently attracting unprecedented levels of interest, with the debates surrounding the future of 'traditional' rural customs and practice becoming a significant political concern. However, the problem of racism in rural areas has been largely overlooked by academics, practitioners and researchers who have sought almost exclusively to develop an understanding of racism in urban contexts. This book aims to address this oversight by examining notions of ethnic identity, 'otherness' and racist victimisation that have tended to be marginalised from traditional rural discourse.

Peroxisomal Disorders and Regulation of Genes Frank Roels, Myriam Baes, R. Delanghe, 2012-10-13 In most peroxisomal disorders the nervous system is severely affected which explains the clinical and community burden they represent. This is the first book to focus not only on the mutations causing these inherited illnesses, but also on mechanisms that regulate, suppress or enhance expression of genes and their products (enzymes). Indeed since the success and completion of the Human Genome Project all genes (coding DNA sequences) are known. However, of many, their function, and the role of the gene product has not been determined. An example is X-linked adrenoleukodystrophy, the most frequent peroxisomal disorder. Children are born healthy, but in more than 1 out of 3, demyelination of the brain starts unpredictably and they die in a vegetative state. The gene mutated in most families has been known for 10 years; but the true role of the encoded protein, ALDP, is still speculative; and within the same family, very severe and asymptomatic clinical histories co-exist, unexplained by the mutation.

**Quality of Fresh and Processed Foods** Fereidoon Shahidi, Arthur M. Spanier, Chi-Tang Ho, Terry Braggins, 2003-12-31 Quality is a composite term encompassing many characteristics of foods. These include color, aroma, texture, general nutrition, shelf-life, stability, and possible presence of undesirable constituents. Obviously deterioration of quality may lead to changes in the attributes that characterize the food in its fresh or freshly processed state. In addition, quality enhancement of products may be carried out using appropriate processing techniques. Interaction of different components present with one another could have a profound effect on sensory quality of products. Meanwhile, presence of extraneous matter such as pesticides and debris may also contribute to a compromise in the quality of foods. In addition, processing often brings about changes in many attributes of food including its nutritional value. Thus, examination of process-induced changes in food products is important. In this book, a cursory account of quality attributes of fresh and processed foods is provided. The book is of interest to food scientists, nutritionists and biochemists in academia, government and industry.

*Fascist Modernities* Ruth Ben-Ghiat, 2004-03 This cultural history of Mussolini's dictatorship discusses the meanings of modernity in interwar Italy. The work argues that fascism appealed to many Italian intellectuals as a new model of modernity that would resolve the European crisis as well as long-standing problems of the national past.

**The Legacies of Two World Wars** Lothar Kettenacker, Torsten Rlotte, 2011-08-30 The US invasion of Iraq in 2003 was done mainly, if one is to believe US policy at the time, to liberate the people of Iraq from an oppressive dictator. However, the many protests in London, New York, and other cities imply that the policy of making the world safe for democracy was not shared by millions of people in many Western countries. Thinking about this controversy inspired the present volume, which takes a closer look at how society responded to the outbreaks and conclusions of the First and Second World Wars. In order to examine this relationship between the conduct of wars and public opinion, leading scholars trace the moods and attitudes of the people of four Western countries (Great Britain, France, Germany and Italy) before, during and after the crucial moments of the two major conflicts of the twentieth century. Focusing less on politics and more on how people experienced the wars, this volume shows how the distinction between enthusiasm for war and concern about its consequences is rarely clear-cut.

The Politics of Everyday Life in Fascist Italy Joshua Arthurs, Michael Ebner, Kate Ferris, 2017-02-08 This book explores the complex ways in which people lived and worked within the confines of Benito Mussolini's regime in Italy, variously embracing, appropriating, accommodating and avoiding the regime's incursions into everyday life. The contributions highlight the experiences of ordinary Italians - midwives and schoolchildren, colonists and soldiers - over the course of the Fascist era, in settings ranging from the street to the farm, and from the kitchen to the police station. At the same time, this volume also provides a framework for understanding the Italian experience in relation to other totalitarian dictatorships in twentieth-century Europe and beyond.

*Ordinary Violence in Mussolini's Italy* Michael R. Ebner, 2011 Ordinary Violence in Mussolini's Italy reveals the centrality of violence to Fascist rule, arguing that the Mussolini regime projected its coercive power deeply and diffusely into society through confinement, imprisonment, low-level physical assaults, economic deprivations, intimidation, discrimination, and other everyday forms of coercion. Fascist repression was thus more intense and ideological than previously thought and even shared some important similarities with Nazi and Soviet terror.

**Making the Fascist Self** Mabel Berezin, 2018-10-18 In her examination of the culture of Italian fascism, Mabel Berezin focuses on how Mussolini's regime consciously constructed a nonliberal public sphere to support its political aims. Fascism stresses form over content, she believes, and the regime tried to build its political support through the careful construction and manipulation of public spectacles or rituals such as parades, commemoration ceremonies, and holiday festivities. The fascists believed they could rely on the motivating power of spectacle, and experiential symbols. In contrast with the liberal democratic notion of separable public and private selves, Italian fascism attempted to merge the public and private selves in political spectacles, creating communities of feeling in public piazzas. Such communities were only temporary, Berezin explains, and fascist identity was only formed to the extent that it could be articulated in a language of pre-existing cultural identities. In the Italian case, those identities meant the popular culture of Roman Catholicism and the cult of motherhood. Berezin hypothesizes that at particular historical moments certain social groups which perceive the division of public and private self as untenable on cultural grounds will gain political ascendancy. Her hypothesis opens a new perspective on how fascism works.

**The Order of Terror** Wolfgang Sofsky, 2013-06-17 During the twelve years from 1933 until 1945, the concentration camp operated as a terror society. In this pioneering book, the renowned German sociologist Wolfgang Sofsky looks at the concentration camp from the inside as a laboratory of cruelty and a system of absolute power built on extreme violence, starvation, terror labor, and the business-like extermination of human beings. Based on historical documents and the reports of survivors, the book details how the resistance of prisoners was broken down. Arbitrary terror and routine violence destroyed personal identity and social solidarity, disrupted the very ideas of time and space, perverted human work into torture, and unleashed innumerable atrocities. As a result, daily life was reduced to a permanent struggle for

survival, even as the meaning of self-preservation was extinguished. Sofsky takes us from the searing, unforgettable image of the Muselmann--Auschwitz jargon for the walking dead--to chronicles of epidemics, terror punishments, selections, and torture. The society of the camp was dominated by the S.S. and a system of graduated and forced collaboration which turned selected victims into accomplices of terror. Sofsky shows that the S.S. was not a rigid bureaucracy, but a system with ample room for autonomy. The S.S. demanded individual initiative of its members. Consequently, although they were not required to torment or murder prisoners, officers and guards often exploited their freedom to do so--in passing or on a whim, with cause, or without. The order of terror described by Sofsky culminated in the organized murder of millions of European Jews and Gypsies in the death-factories of Auschwitz and Treblinka. By the end of this book, Sofsky shows that the German concentration camp system cannot be seen as a temporary lapse into barbarism. Instead, it must be conceived as a product of modern civilization, where institutionalized, state-run human cruelty became possible with or without the mobilizing feelings of hatred.

**Patterns of Racism ,1982**

Italian Fascism's Empire Cinema Ruth Ben-Ghiat,2015-02-11 Ruth Ben-Ghiat provides the first in-depth study of feature and documentary films produced under the auspices of Mussolini's government that took as their subjects or settings Italy's African and Balkan colonies. These empire films were Italy's entry into an international market for the exotic. The films engaged its most experienced and cosmopolitan directors (Augusto Genina, Mario Camerini) as well as new filmmakers (Roberto Rossellini) who would make their marks in the postwar years. Ben-Ghiat sees these films as part of the aesthetic development that would lead to neo-realism. Shot in Libya, Somalia, and Ethiopia, these movies reinforced Fascist racial and labor policies and were largely forgotten after the war. Ben-Ghiat restores them to Italian and international film history in this gripping account of empire, war, and the cinema of dictatorship.

**The Origins of Fascism in Italy** Gaetano Salvemini,1973

*Formations of Violence* Allen Feldman,2008-03-14 A sophisticated and persuasive late-modernist political analysis that consistently draws the reader into the narratives of the author and those of the people of violence in Northern Ireland to whom he talked. . . . Simply put, this book is a feast for the intellect--Thomas M. Wilson, American Anthropologist One of the best books to have been written on Northern Ireland. . . . A highly imagination and significant book. Formations of Violence is an important addition to the literature on political violence.--David E. Schmitt, American Political Science Review

**The Seizure of Power** Adrian Lyttelton,2009-05-21 This is a study of Fascism in the country of its origin, Italy. Adrian Lyttelton examines the origins and growth of the fascist movement, explaining the contribution made by different social groups to its ideology and actions.

*Violence* Wolfgang Sofsky,2003 A fascinating and timely study of violence and war and the psychology behind them.

*The Rise of Italian Fascism* A. Rossi,Angelo Tasca,2010 The rise of Italian fascism is often seen as a pre-condition, as well as a precursor of, later developments in Europe most notably in Germany. As such they were also much discussed in the English speaking world throughout the 1930's. First published in English in 1938 this book gives an account of Italian history in the years immediately following the first world war, culminating in the triumph of Mussolini. Arguing that Mussolini succeeded because he was much more ruthless than his opponents, he concludes that this is something that must be learnt from: 'in point of material and military strength we must be superior to the fascists since that is the ground on which they are trying to force a decision.' .

*Why Did They Kill?* Alexander Laban Hinton,2005 This is an ethnographic examination and an appraisal of the Cambodian genocide under Pol Pot based on the author's long fieldwork in the area.
