The Calculator and Other Stories Mithran Somasundrum, 2023-03-01 These are four short stories about Vijay, a perennially broke translator in Bangkok who occasionally resorts to private detective work to help pay the bills. They were first published in Alfred Hitchcock's Mystery Magazine between 2005 and 2011. In "On Soi Arab" a member of the US embassy in Bangkok tells Vijay about Ning, a Thai co-worker he likes, who has started behaving strangely. And has come into money. Surely she's not stealing embassy secrets? In "Under Sapparn Phut," Oot buys a valuable Buddha amulet for a low price in a night market. But since then, he tells Vijay, someone has been following him. In "The Farm in Ratchburi" a businessman called Nop wants to know why his company is failing. He doesn't have money to pay Vijay, but brings along a 10,000 baht fighting cock as deposit. Nop's life will turn out to be far more complicated than Vijay imagined. In "The Calculator" a human calculator from England goes missing in Bangkok, having drawn the attention of some powerful people.

A First Course in Algebra Alison Warr, Penny Slingerland, Cathy Curtis, 2000-05 This book was written to address the challenge of the NCTM and AMATYC Standards and technology integration in the classroom. The authors address the standards using a variety of methods, including Numerical, Graphical, and Algebraic Models; Guided Discovery Activities; Problem Solving; Technology; Collaborative Learning.

Gravel Roads Ken Skorseth, 2000 The purpose of this manual is to provide clear and helpful information for maintaining gravel roads. Very little technical help is available to small agencies that are responsible for managing these roads. Gravel road maintenance has traditionally been more of an art than a science and very few formal standards exist. This manual contains guidelines to help answer the questions that arise concerning gravel road maintenance such as: What is enough surface crown? What is too much? What causes corrugation? The information is as nontechnical as possible without sacrificing clear guidelines and instructions on how to do the job right.

Speed Mathematics Bill Handley, 2012-01-30 This new, revised edition of the bestselling Speed Mathematics features new chapters on memorising numbers and general information, calculating statistics and compound interest, square roots, logarithms and easy trig calculations. Written so anyone can understand, this book teaches simple strategies that will enable readers to make lightning-quick calculations. People who excel at mathematics use better strategies than the rest of us; they are not necessarily more intelligent. With Speed Mathematics you'll discover methods to make maths easy and fun. This book is perfect for students, parents, teachers and anyone who enjoys working with figures and even those who are terrified of numbers!

Living Homes Thomas J. Elpel, 2010 The house of your Dreams does not have to be expensive. The key is all in the planning. How much a house costs, how it looks, how comfortable it is, how energy-efficient it is--all these things occur on paper before you pick up even one tool. A little extra time in the planning process can save you tens of thousands of dollars in construction and maintenance. That is time well spent! Living Homes takes you through the planning process to design an energy and resource efficient home that won't break the bank. Then, from the footings on up to the roof, author Thomas J. Elpel guides you through the nuts and bolts of construction for

slipform stone masonry, tilt-up stone walls, log home construction, building with strawbales, making your own terra tile floors, windows and doors, solar water systems, masonry heaters, framing, plumbing, greywater, septic systems, swamp filters, concrete-fly ash countertops, painting and more. Living Homes was completely re-organized and revised for the new sixth edition, based on five additional years of building experience with low-cost, high efficiency construction methods. Get the latest ideas on how to build a high-performance house that will stand the test of time! The sixth edition includes fifteen pages of new material covering the latest stone masonry tips, plus revised and expanded tips and techniques throughout the book.

Love in the Ragged Mountain Ranges Susan Mackie, 2021-12-01 She swore she'd never trust again. Buying the old courthouse near the Barrington Tops ragged mountain ranges was a fresh start for Nicole and daughter Lucy. Renovating the run-down building into a home and B & B accommodation would help them recover from the trauma they had endured. Nik promised Lucy it would be just the two of them. Always. But the removal truck getting stuck in the driveway on the first day threw them into neighbour Robbie's path. He sorted the problem, then returned with son Harry to help them unload. Nik instinctively liked him, but she couldn't trust her instincts. And more importantly, she vowed to keep the promise she'd made to Lucy.

A Different Day, a Different Destiny Annette Laing, 2009 When you wake up in the year 1851 on a Scottish hillside...Or in an English coal mine...Or on a plantation in the Deep South, you know you're in for a bad day. Nothing for Hannah and Alex Dias has been normal since they moved from San Francisco to the little town of Snipesville, Georgia. Bad enough that they and their dorky new friend Brandon became reluctant time-travellers to World War Two England. Oh, sure, they made it home safely (just) but now things are about to get worse. Much worse. From the cotton fields of the Slave South to London's glittering Crystal Palace, the kids chase a lost piece of twenty-first century technology in the mid-nineteenth century. But finding it is only the beginning of what they must do to heal Time.

Big Wheels Andrew Booth,

Why Math? R.D. Driver, 2012-12-06 This text aims to show that mathematics is useful to virtually everyone. And it seeks to accomplish this by offering the reader plenty of practice in elementary mathematical computations motivated by real-world problems. The prerequisite for this book is a little algebra and geometry-nothing more than entrance requirements at most colleges. I hope that users-especially those who don't like math-will complete the course with greater confidence in their ability to solve practical problems (without seeking help from someone who is good at math). Here is a sampler of some of the problems to be encountered: 1. If a U. S. dollar were worth 1.15 Canadian dollars, what would a Canadian dollar be worth in U. S. money? 2. If the tax rates are reduced 5% one year and then 10% in each of the next 2 years (as they were between 1981 and 1984), what is the overall

reduction for the 3 years? 3. An automobile cooling system contains 10 liters of a mixture of water and antifreeze which is 25% antifreeze. How much of this should be drained out and replaced with pure antifreeze so that the resulting 10 liters will be 40% antifreeze? 4. If you drive halfway at 30 mph and the rest of the distance at 50 mph, what is your average speed for the entire trip? 5. A tank storing solar heated water stands unmolested in a room having an approximately constant temperature of 80°F.

Growing Food in a Hotter, Drier Land Gary Paul Nabhan, 2013-06-14 How to harvest water and nutrients, select drought-tolerant plants, and create natural diversity Because climatic uncertainty has now become the new normal, many farmers, gardeners and orchard-keepers in North America are desperately seeking ways to adapt their food production to become more resilient in the face of such global weirding. This book draws upon the wisdom and technical knowledge from desert farming traditions all around the world to offer time-tried strategies for: Building greater moisture-holding capacity and nutrients in soils Protecting fields from damaging winds, drought, and floods Harvesting water from uplands to use in rain gardens and terraces filled with perennial crops Delecting fruits, nuts, succulents, and herbaceous perennials that are best suited to warmer, drier climates Gary Paul Nabhan is one of the world's experts on the agricultural traditions of arid lands. For this book he has visited indigenous and traditional farmers in the Gobi Desert, the Arabian Peninsula, the Sahara Desert, and Andalusia, as well as the Sonoran, Chihuahuan, and Painted deserts of North America, to learn firsthand their techniques and designs aimed at reducing heat and drought stress on orchards, fields, and dooryard gardens. This practical book also includes colorful parables from the field that exemplify how desert farmers think about increasing the carrying capacity and resilience of the lands and waters they steward. It is replete with detailed descriptions and diagrams of how to implement these desert-adapted practices in your own backyard, orchard, or farm. This unique book is useful not only for farmers and permaculturists in the arid reaches of the Southwest or other desert regions. Its techniques and prophetic vision for achieving food security in the face of climate change may well need to be implemented across most of North America over the next half-century, and are already applicable in most of the semiarid West, Great Plains, and the U.S. Southwest and adjacent regions of Mexico.

The Year I Turned Sixteen Diane Schwemm, 2010-01-26 Turning sixteen is an unforgettable milestone, and each of these four sisters has her own story to tell. Rose, the oldest, feels like she has the most responsibility when her father dies, and yearns to be true to herself. Daisy wants to break free from her family, but trouble arises when she falls for a bad boy. Laurel struggles with the loss of a close relative and finds herself drawn to a boy who may actually understand. And Lily, the youngest sister, feels like nothing could be more difficult than actually being herself. These four books in one special bind-up make for a great value—and an even better read.

Technical Mathematics Paul A. Calter, Michael A. Calter, 2011-03-22 This textbook has been in constant use since 1980, and this edition represents the first major revision of this text since the second edition. It was time to select, make hard choices of material, polish, refine, and fill in where needed. Much has been rewritten to be even cleaner and clearer, new features have been introduced, and some peripheral topics have been removed. The

authors continue to provide real-world, technical applications that promote intuitive reader learning. Numerous fully worked examples and boxed and numbered formulas give students the essential practice they need to learn mathematics. Computer projects are given when appropriate, including BASIC, spreadsheets, computer algebra systems, and computer-assisted drafting. The graphing calculator has been fully integrated and calculator screens are given to introduce computations. Everything the technical student may need is included, with the emphasis always on clarity and practical applications.

Raiden Cayce Poponea, 2023-08-15 A man trying to get through a painful loss. A woman trying to find her place in life. A romance in trouble before it begins. Erin Parker flees from her home, forced to begin her adult life. With a backpack filled with lies and deception, she's ill-prepared for what awaits her in the big city. Can she ignore the voices in her head and allow herself to experience what the world has to offer? Or will fear created in her as a child cost her the love of her life? Raiden Inman is trying desperately to begin living his life again. With the desire to do what's right, will he be able to help the woman who has dropped into his lap? Or will the demons in his world rob him of the happiness he so desperately craves? Can Raiden prove to Erin his world of motorcycles and leather isn't composed of the evil her guardian portrayed? Will she accept his property patch? Or will her fear be too much to overcome? Raiden is the first book in USA Today Bestselling Author, Cayce Poponea's Saints of Chaos. This romantic suspense series will have you on the edge of your seat, chanting for the hero and praying for the salvation of the guilty. Technical Mathematics with Calculus Paul A. Calter, Michael A. Calter, 2010-12-28 This text is designed to provide a mathematically rigorous, comprehensive coverage of topics and applications, while still being accessible to students. Calter/Calter focuses on developing students' critical thinking skills as well as improving their proficiency in a broad range of technical math topics such as algebra, linear equations, functions, and integrals. Using abundant examples and graphics throughout the text, this edition provides several features to help students visualize problems and better understand the concepts. Calter/Calter has been praised for its real-life and engineering-oriented applications. The sixth edition of Technical Mathematics has added back in popular topics including statistics and line graphing in order to provide a comprehensive coverage of topics and applications—everything the technical student may need is included, with the emphasis always on clarity and practical applications. WileyPLUS, an online teaching and learning environment that integrates the entire digital text, will be available with this edition.

Building Decorative Materials Yan Li, Shuxia Ren, 2011-05-09 Buildings should not only be functional but aesthetically pleasing. This requires the use of decorative materials both on the exterior and inside a building. Building decorative materials reviews the range of materials available and their potential applications. The book begins by considering the main types of decorative material and the physical, mechanical and other properties they

require. It then discusses types and potential uses of decorative stone materials such as marble, granite, slate or gypsum. It then goes on to discuss the ways cement and concrete can be used for decorative effect, before considering the role of ceramics in such areas as tiling. The following chapters review decorative glass for windows or facades, metals and wood before assessing polymer materials such as plastics and textiles. The final group of chapters discuss coatings, including waterproofing materials, multi-functional materials used for such purposes as soundproofing and thermal insulation, and the use of more sustainable decorative materials. Building decorative materials is a useful reference for architects, civil engineers and those studying civil or structural engineering. Reviews the full range of materials available for both the exterior and interior of buildings and their potential applications beyond conventional uses Considers the main types of decorative material and the physical, mechanical and other properties they require as the role of sustainable materials Discusses types and potential uses of decorative stone materials such as marble, granite, slate or gypsum and explores how cement and concrete can be used for decorative effect

CSI School Peter Jeans, This is a fantastic fill in work manual for teaching Forensic Science at the secondary/high school level. Alternatively a great resource for the avid forensic science fan with many techniques discussed and practical tasks throughout the book.

The Gospel of Trees Apricot Irving, 2019-03-26 In an “eye-opening memoir” (People) “as beautiful as it is discomfiting” (The New Yorker), award-winning writer Apricot Irving untangles her youth on a missionary compound in Haiti. Apricot Irving grew up as a missionary’s daughter in Haiti. Her father was an agronomist, a man who hiked alone into the deforested hills to preach the gospel of trees. Her mother and sisters spent their days in the confines of the hospital compound they called home. As a child, this felt like paradise to Irving; as a teenager, it became a prison. Outside of the walls of the missionary enclave, Haiti was a tumult of bugle-call bus horns and bicycles that jangled over hard-packed dirt, road blocks and burning tires triggered by political upheaval, the clatter of rain across tin roofs, and the swell of voices running ahead of the storm. Poignant and explosive, Irving weaves a portrait of a missionary family that is unflinchingly honest: her father’s unswerving commitment to his mission, her mother’s misgivings about his loyalty, the brutal history of colonization. Drawing from research, interviews, and journals—her parents’ as well as her own—this memoir in many voices evokes a fractured family finding their way to kindness through honesty. Told against the backdrop of Haiti’s long history of intervention, it grapples with the complicated legacy of those who wish to improve the world, while bearing witness to the defiant beauty of an undefeated country. A lyrical meditation on trees and why they matter, loss and privilege, love and failure. The Gospel of Trees is a “lush, emotional debut...A beautiful memoir that shows how a family altered by its own ambitious philanthropy might ultimately find hope in their faith and love for each other, and for Haiti.” (Publishers Weekly, starred review).

Mackinac Drift Robert F. Reynolds, 2019-05-23 Michigan's historic Mackinac Island is considered the gem of the Great Lakes. Victorian-style homes, historic military forts and limestone formations grace the island. Michigan

Highway M-185 circles the island even though its only traffic are horse-drawn carriages and bicycles--motorized vehicles are prohibited. Mackinac Island is peaceful, serene and a major summer vacation destination. The story: Two hundred years before, a fortune disappeared when American colonial forces recapture Mackinac Island from British occupiers. Through chance encounters, a modern day trio of ne'er-do-wells come together to share a house. Summer tourist season arrives and with it come scores of island visitors. Devious, tough-as-nails Josie, invites companions Wayland and Diggs to visit the island. The men happen upon a life-altering discovery. Companionship soon declines into primal instincts, greed and cruelty. Double crosses abound, sinking readers to unforeseen depths in this thrilling island mystery.
