*Everybody Fights* Kim Holderness, Penn Holderness, 2021-03-30 A USA Today and Wall Street Journal bestseller! Learn how to fight better and end your arguments with your partner feeling closer, more loved, and better understood. We take our cars in for oil changes. We mow our lawns and pull weeds. Why don't we do maintenance on our marriages? This relationship is the most important one we will ever have, so why not get better at it? For the last several years, Penn and Kim Holderness of The Holderness Family have done the hard maintenance and the research to learn how to fight better. With the help of their marriage coach Dr. Christopher Edmonston, they break down their biggest (and in some cases, funniest) fights. How did a question about chicken wings turn into a bra fight (no, not a bar fight or a bra fight)? How did a roll of toilet paper lead to tears, resentment, and a stint in the guest bedroom? With their trademark sense of humor and complete vulnerability, Penn and Kim share their 10 most common Fight Fails and how to combat them. Throughout the book, they offer scripts for how to start, continue, and successfully close hard conversations. Couples will emerge equipped to engage and understand, not do battle—and maybe laugh a little more along the way. In *Everybody Fights*, couples will learn how to: Use magic words for healthy conflict resolution Address unspoken and unrealistic expectations Banish the three Ds of unhealthy communication—distraction, denial, and delay Carry individual baggage while helping your partner deal with theirs Penn and Kim want you to know you're not alone. *Everybody fights*. Marriage is messy. Marriage is work. But marriage is worth it. Fight for it!

**The Broke and Beautiful Life** Stefanie O'Connell, 2015-01-01 After moving to New York City to become a Broadway actress, Stefanie O'Connell faced one of two inevitabilities when faced with unemployment--spiral into debt or learn how to effectively manage her money. Punctuated with humor, insight, and essential money management lessons, *The Broke and Beautiful Life* offers practical strategies to make smarter financial decisions today as a means to fulfill the goals and dreams of tomorrow. Specializing in personal finance (with an emphasis on personal), Stefanie engages those who shy away from the word investing, scoff at the word budget, and equate interest rates with snooze fest. She encourages readers to redefine their relationship with money and approach budgeting as an exciting and sexy tool to transform from broke to beautiful while enjoying every step along the way.

**Commanding Hope** Thomas Homer-Dixon, 2020-09-01 From the #1 BESTSELLING thought leader: Calling on history, cutting-edge research, complexity science and even *Lord of the Rings*, Thomas Homer-Dixon lays out the tools we can command to rescue a world on the brink. For three decades, the renowned author of *The Upside of Down: Catastrophe, Creativity, and the Renewal of Civilization*, and *The Ingenuity Gap: Can We Solve the Problems of the Future?*, has examined the threats to our future security--predicting a deteriorating global environment, extreme economic stresses, mass migrations, social instability and wide political violence if humankind continued on its current course. He was called The Doom Meister, but we now see how prescient he was. Today just about everything we've known and relied on (our natural environment, economy, societies, cultures and institutions) is changing dramatically--too often for the worse. Without radical new approaches, our planet will become unrecognizable as well as poorer, more violent, more authoritarian. In his fascinating long-awaited new book (dedicated to his young children), he calls on his extraordinary knowledge of complexity science, of how societies work and can evolve, and of our capacity to handle threats, to show that we can shift human civilization onto a decisively new path if we mobilize our minds, spirits, imaginations and collective values. *Commanding Hope* marshals a fascinating, accessible argument for reinvigorating our cognitive strengths and belief systems to affect urgent systemic change, strengthen our economies and cultures, and renew our hope in a positive future for everyone on Earth.

**Maintaining Safe Mobility in an Aging Society** David W. Eby, Lisa J. Molnar, Paula S. Kartje, 2008-12-22 By 2030, 20 percent of the world's drivers, 60 million in all, will be over the age of 65. Consequently, safe and efficient mobility for older adults is a complex and pressing issue. *Maintaining Safe Mobility in an Aging Society* addresses the complexities surrounding the booming

number of aging drivers and practical solutions for sustaining safe transportation for this growing group. This plainspoken resource informs safe mobility discussions on a variety of areas, including: Necessary skills for safe driving and how age affects them Current evidence on how medical conditions and medication hinder driving skills Comprehensive screening description and assessment practices, issues, and tools Sensitive ways to help older drivers transition into driving cessation Impact of advanced vehicle technology on aging drivers Approaches to strengthening safety-conscious licensing policies Draws the Significant Link Between Mobility and Well Being In addition to discussing how age impacts both the risk and severity of accidents and the link between mobility and well-being, this authoritative work discusses means to achieve safer mobility, including roadway design and community transportation options. Authored by driver safety and awareness experts, it covers psychological and physical changes associated with age (both normal and pathological), including an important but rarely explored aspect of dementia known as wandering behavior. It also addresses the role of emerging technology. Maintaining Safe Mobility in an Aging Society is a concise reference that encompasses an impressive breadth of ready-to-access information. Thorough and systematically organized, it is a groundbreaking and indispensable resource for those providing services to seniors as well as those responsible for transportation policy and design.

**Community Impact Assessment**, 1996 This guide was written as a quick primer for transportation professionals and analysts who assess the impacts of proposed transportation actions on communities. It outlines the community impact assessment process, highlights critical areas that must be examined, identifies basic tools and information sources, and stimulates the thought-process related to individual projects. In the past, the consequences of transportation investments on communities have often been ignored or introduced near the end of a planning process, reducing them to reactive considerations at best. The goals of this primer are to increase awareness of the effects of transportation actions on the human environment and emphasize that community impacts deserve serious attention in project planning and development-attention comparable to that given the natural environment. Finally, this guide is intended to provide some tips for facilitating public involvement in the decision making process.

**The Theater of War** Bryan Doerries, 2016-08-23 For years theater director Bryan Doerries has been producing ancient Greek tragedies for a wide range of at-risk people in society. His is the personal and deeply passionate story of a life devoted to reclaiming the timeless power of an ancient artistic tradition to comfort the afflicted. Doerries leads an innovative public health project—Theater of War—that produces ancient dramas for current and returned soldiers, people in recovery from

alcohol and substance abuse, tornado and hurricane survivors, and more. Tracing a path that links the personal to the artistic to the social and back again, Doerries shows us how suffering and healing are part of a timeless process in which dialogue and empathy are inextricably linked. The originality and generosity of Doerries's work is startling, and *The Theater of War*—wholly unsentimental, but intensely felt and emotionally engaging—is a humane, knowledgeable, and accessible book that will both inspire and enlighten.

**The Science of Overabundance** William J. McShea, Brian H. Underwood, John H. Rappole, 2003-01-17 Easily the most common of America's large wildlife species, white-tailed deer are often referred to as overabundant. But when does a species cross the threshold from common to overpopulated? This question has been the focus of debate in recent years among hunters, animal rights activists, and biologists. William McShea and his colleagues explore every aspect of the issue in *The Science of Overabundance*. Are there really too many deer? Do efforts to control deer populations really work? What broader lessons can we learn from efforts to understand deer population dynamics? Through twenty-three chapters, the editors and contributors dismiss widely held lore and provide solid information on this perplexing problem.

*The Neurology of Eye Movements : Text and CD-ROM* Departments of Neurology R. John Leigh Professor, Neuroscience Otolaryngology and Biomedical Engineering Case Western Reserve University University Hospitals and Veterans Affairs Medical Center Cleveland Ohio, Departments of Neurology David S. Zee Professor, Ophthalmology Otolaryngology Head and Neck Surgery and Neuroscience, 1999-08-26 *The Neurology of Eye Movements* provides clinicians with a synthesis of current scientific information that can be applied to the diagnosis and treatment of disorders of ocular motility. Basic scientists will also benefit from descriptions of how data from anatomical, electrophysiological, pharmacological, and imaging studies can be directly applied to the study of disease. By critically reviewing such basic studies, the authors build a conceptual framework that can be applied to the interpretation of abnormal ocular motor behavior at the bedside. These syntheses are summarized in displays, new figures, schematics and tables. Early chapters discuss the visual need and neural basis for each functional class of eye movements. Two large chapters deal with the evaluation of double vision and systematically evaluate how many disorders of the central nervous system affect eye movements. This edition has been extensively rewritten, and contains many new figures and an up-to-date section on the treatment of abnormal eye movements such as nystagmus. A major innovation has been the development of an option to read the book from a compact disc, make use of hypertext links (which bridge basic science to clinical issues), and view the major disorders of eye movements in over 60 video clips. This volume will provide pertinent, up-to-date information to neurologists, neuroscientists, ophthalmologists, visual scientists, otolaryngologists, optometrists, biomedical engineers, and psychologists.

**Policing** Tim Newburn, Jill Peay, 2012 Bringing together a range of leading social scientists and criminologists, this volume explores a number of key themes raised by the work of Robert Reiner. Arguably the leading policing scholar of his generation, Reiner's work over some 40 years has ranged broadly in this field, taking in the study of police history, culture, organisation, elites and relationships with the media. Always carefully situated within an analysis of the changing socio-political circumstances of policing and crime control, Robert Reiner's scholarship has been path-breaking in its impact. The 13 original essays in this volume are testament to Reiner's influence.

Although reflecting the primarily British bent within his work, the essays also draw on contributors from Australia, Europe, South Africa and the United States to explore some of the leading debates of the moment. These include, but are not limited to, the impact of neo-liberalism on crime control and the challenges for modern social democracy; police culture, equality and political economy; new media and the future of policing; youth, policing and democracy, and the challenges and possibilities posed by globalisation in the fields of policing and security--Provided by publisher.

**Cloud Computing and Big Data** C. Catlett, W. Gentzsch, L. Grandinetti, 2013-10-22 Cloud computing offers many advantages to researchers and engineers who need access to high performance computing facilities for solving particular compute-intensive and/or large-scale problems, but whose overall high performance computing (HPC) needs do not justify the acquisition and operation of dedicated HPC facilities. There are, however, a number of fundamental problems which must be addressed, such as the limitations imposed by accessibility, security and communication speed, before these advantages can be exploited to the full. This book presents 14 contributions selected from the International Research Workshop on Advanced High Performance Computing Systems, held in Cetraro, Italy, in June 2012. The papers are arranged in three chapters. Chapter 1 includes five papers on cloud infrastructures, while Chapter 2 discusses cloud applications. The third chapter in the book deals with big data, which is nothing new - large scientific organizations have been collecting large amounts of data for decades - but what is new is that the focus has now broadened to include sectors such as business analytics, financial analyses, Internet service providers, oil and gas, medicine, automotive and a host of others. This book will be of interest to all those whose work involves them with aspects of cloud computing and big data applications.
