New Challenges in Entrepreneurship and Finance Marta Peris-Ortiz, Jean-Michel Sahut, 2014-10-24 Since the 2008 economic crisis, small and medium-sized enterprises (SMEs) have faced serious financial problems and have been looking to financial institutions and governments for solutions and new proposals to address these issues. This book examines the new challenge in which firms receive sustainable funding that is in alignment with the company's spending capacity. The purpose of this book is to examine the main theoretical issues and practices regarding entrepreneurship and finance and their impact on performance, innovation and economic growth. It analyzes the fundamental aspects of entrepreneurship and studies ways in which financial institutions can better fulfill their primary function of feeding capital to businesses and the economy as a whole. Entrepreneurship and finance are fundamental to achieving success in economic and social activities. SMEs' existence and development depend on the initiatives of entrepreneurship and access to resources, especially those of a financial nature. During the recent economic crisis, several new financing instruments have appeared, especially with structures designed for helping SMEs make their way out of the recession. This book explores some of these tools in various global economies, such as France and Spain, providing an international, multidimensional perspective.
