Temper Sands in Prehistoric Oceanian Pottery William R. Dickinson,2006-01-01 Oceanian ceramic cultures making earthenware pottery spread during the past 3500 years through a dozen major island groups spanning 6000 km of the tropical Pacific Ocean from western Micronesia to western Polynesia. Island potters mixed sand as temper into clay bodies during ceramic manufacture. The nature of island sands is governed by the geotectonics of hotspot chains, island arcs, subduction zones, backarc basins, and remnant arcs as well as by sedimentology. Because small islands with bedrock exposures of restricted character are virtual point sources of sand, many tempers are diagnostic of specific islands. Petrographic study of temper sands in thin section allows distinction between indigenous pottery and exotic pottery transported from elsewhere. Study of 2223 prehistoric Oceanian potsherds from 130 islands and island clusters indicates the nature of Oceanian temper types and documents 105 cases of interisland transport of ceramics over distances typically

The Gulf War Aftermath M. Sadiq,J.C. McCain,2012-12-06 In 1962 Rachel Carson warned of the consequences of man's pollution in her book *Silent Spring*, a book that some feel marks the real beginning of our environmental awareness. *Silent Spring* told of the consequences of our increasing pesticide use to birds. Almost 30 years after her warning, the western Arabian Gulf experienced its silent spring when approximately 100,000 to 250,000 waterbirds died, along with millions of other organisms, due to the massive oil spill that resulted due to Gulf war. The magnitude of our environmental problems has continued to grow during the last thirty years to a point where even the doomsday environmentalists could hardly have envisioned back in 1962. It seems the death of yet uncounted thousands of humans was not sufficient for Saddam Husain. His desire for power and infamy led him to unleash environmental war on mankind. At the end of the Gulf war he set ablaze the oil fields of Kuwait and released more oil into the sea than had been spilled at any time throughout history. These actions were despicable and an affront to civilized man. A quality environment should be a right of all mankind, and to wage war by deliberately polluting the earth cannot be tolerated.

Reeds Marine Distance Tables 16th edition Miranda Delmar-Morgan,2020-11-26 Reeds Marine Distance Tables are the perfect ready-reckoner for captains, navigators and owners of merchant and cruise ships large and small wanting a quick and accurate distance reference between all the regularly used commercial ports around the world. They are also of increasing value to the superyacht fleet. The book is divided into key 'market areas', and includes a pull-out map for area identification and easy see-at-a-glance port reference. Traffic Separation Schemes are calculated into the tables whilst the distance to any port not included can easily be determined by making an approximation from the next closest port. Useful tables of major 'turning points' around the world

(such as Cape Finisterre, Cape Horn and the Dover Straits), Transatlantic distances, world time zones, and time and speed conversion tables are also included. This edition has been improved and expanded. Emerging ports around the world have also been added to reflect modern trends and developments in shipping movements and expansions. Reeds Marine Distance Tables are an invaluable reference for ship owners, operators, brokers, navigators and superyacht skippers. Using this one reference, anyone can calculate the shortest or most economical distances between all the major ports in the world.
