Solo Vicki McAuley,2010-09-01 On January 11th, 2007, Andrew McCauley set off from Tasmania in a sea kayak, aiming to be the first person to paddle the 1600 kilometres to New Zealand. A month later, New Zealand authorities received a garbled distress call from him. His kayak was spotted drifting and waterlogged just 80 kilometres from the New Zealand coast. His body was never found. Vicki McAuley, Andrew's wife and the mother of his young child, has written an extraordinary book about her husband and his final voyage. It is a love story, an adventure story and a meditation on what it is to feel most alive, even when so brazenly tempting death. Not since 'Into Thin Air' have we come closer to understanding the adrenaline rush of high adventure, and its tragic consequences.

**Speedlights & Speedlites** Lou Jones,2013-06-19 Canon Speedlites and Nikon Speedlights are small, off-camera flashguns that can provide big results - if you know how to use them properly. Acclaimed Boston photographers Lou Jones, Bob Keenan and Steve Ostrowski guide you through the technical and creative aspects of how to get the most out of these powerful tools in this indispensable guide, packed full of inspirational images and comprehensive diagrams of the lighting set ups used to capture them. They are significantly more advanced, lighter and considerably cheaper than a standard flashgun, and have many advantages. They are small (and cheap) enough that a number can be carried in your kit, and they can be used in combination, triggered wirelessly. They use through-the-lens (TTL) metering, which allows you to use the in-camera LCD and histograms to calculate the required power/direction, rather than havng to use a light meter or trial and error. They use proprietary, dedicated technology (from Canon and Nikon) that means there are no compatability issues. Getting the most out of them, however, remains a mystery - most photographers still just use their speedlights in the same way as a standard flash gun. This is where this book comes in.
