Many of us can no longer focus on a single task or face-to-face conversation without wanting to reach out—or retreat—to the virtual world every few minutes. Science and technology reporter and recovering digital addict Daniel Sieberg has devised a foolproof 4-step plan to help you regain control, focus, and true connection in your life. Step 1//Re: Think: Consider how technology has overwhelmed our society and the effect it's had on your physical, mental, and emotional health. Step 2//Re: Boot: Take stock of your digital intake using Sieberg's Virtual Weight Index and step back from the device. Step 3//Re: Connect: Focus on restoring the relationships that have been harmed by the technology in your life. Step 4//Re: Vitalize: Learn how to live with technology—the healthy way, by optimizing your time spent e-mailing, texting, on Facebook, and web surfing. This program will enable families to communicate better, employees to be more productive, and friends to stay in touch. After reading thousands of forum threads over the years, author and scripting pioneer Danny Goodman has compiled a list of problems that frequently vex scripters of various experience levels. He has now applied state-of-the-art ECMA and W3C DOM standards and used best practices to create this extensive collection of practical recipes that can bring your web pages to life.The JavaScript & DHTML Cookbook is all about adding value to the content of a web page. Yet, rather than just cut-and-paste code, you also get explanations of how and why the code works, so you can learn to adapt the problem-solving techniques to your designs.The recipes range from simple tasks, such as manipulating strings and validating dates in JavaScript, to entire libraries that demonstrate complex tasks, such as cross-browser positioning of HTML elements and sorting tables. This book contains over 150 recipes on the following topics: Working with interactive forms and style sheets Presenting user-friendly page navigation

Creating dynamic content Producing visual effects for stationary content Positioning HTML elements Managing browser windows and multiple frames This book is the ideal companion to O'Reilly's JavaScript: The Definitive Guide and Dynamic HTML: The Definitive Reference. Twining Anastasia Salter,Stuart Moulthrop,2021-05-28 Hypertext is now commonplace: links and linking structure nearly all of our experiences online. Yet the literary, as opposed to commercial, potential of hypertext has receded. One of the few tools still focused on hypertext as a means for digital storytelling is Twine, a platform for building choice-driven stories without relying heavily on code. In Twining, Anastasia Salter and Stuart Moulthrop lead readers on a journey at once technical, critical, contextual, and personal. The book's chapters alternate careful, stepwise discussion of adaptable Twine projects, offer commentary on exemplary Twine works, and discuss Twine's technological and cultural background. Beyond telling the story of Twine and how to make Twine stories, Twining reflects on the ongoing process of making. While there have certainly been attempts to study Twine historically and theoretically... no single publication has provided such a detailed account of it. And no publication has even attempted to situate Twine amongst its many different conversations and traditions, something this book does masterfully. —James Brown, Rutgers University, Camden
