High Alert Gregg Stoner, 2021-01-04 This book is broken down into two basic parts. Part one is how the Retired Senior Volunteer Patrol makes a difference in people's lives due to their daily duties as volunteers with the San Diego Police Department. The everyday duties of RSVP's are described in detail by providing interesting stories about each of the categories of jobs. Gregg and his wife Melody set no limits for their time spent going over-and-above volunteer requirements. Part two is about the special equipped license plate reader car that was used exclusively by the author in finding stolen cars, stolen license plates, and cars wanted for felony crimes. Gregg and Melody spent every available moment of their patrol time seeking stolen cars, and in the process became the most successful of all the RSVP volunteers at finding stolen cars setting a record for stolen car recoveries that will probably never be beat.

Future Crimes Marc Goodman, 2015-02-24 NEW YORK TIMES and WALL STREET JOURNAL BESTSELLER ONE OF THE WASHINGTON POST'S 10 BEST BOOKS OF 2015 One of the world's leading authorities on global security, Marc Goodman takes readers deep into the digital underground to expose the alarming ways criminals, corporations, and even countries are using new and emerging technologies against you—and how this makes everyone more vulnerable than ever imagined. Technological advances have benefited our world in immeasurable ways, but there is an ominous flip side: our technology can be turned against us. Hackers can activate baby monitors to spy on families, thieves are analyzing social media posts to plot home invasions, and stalkers are exploiting the GPS on smart phones to track their victims' every move. We all know today's criminals can steal identities, drain online bank accounts, and wipe out computer servers, but that's just the beginning. To date, no computer has been created that could not be hacked—a sobering fact given our radical dependence on these machines for everything from our nation's power grid to air traffic control to financial services. Yet, as ubiquitous as technology seems today, just over the horizon is a tidal wave of scientific progress that will leave our heads spinning. If today's Internet is the size of a golf ball, tomorrow's will be the size of the sun. Welcome to the Internet of Things, a living, breathing, global information grid where every physical object will be online. But with greater connections come greater risks. Implantable medical devices such as pacemakers can be hacked to deliver a lethal jolt of electricity and a car's brakes can be disabled at high speed from miles away. Meanwhile, 3-D printers can produce AK-47s, bioterrorists can download the recipe for Spanish flu, and cartels are using fleets of drones to ferry drugs across borders. With explosive insights based upon a career in law enforcement and counterterrorism, Marc Goodman takes readers on a vivid journey through the darkest recesses of the Internet. Reading like science fiction, but based in science fact, *Future Crimes* explores how bad actors are primed to hijack the technologies of tomorrow, including robotics, synthetic biology, nanotechnology, virtual reality, and artificial intelligence. These fields hold the power to create a world of unprecedented abundance and prosperity. But the technological bedrock upon which we are building our common future is deeply unstable and, like a house of cards, can come crashing down at any moment. *Future Crimes* provides a mind-blowing glimpse into the dark side of technological innovation and the unintended consequences of our connected world. Goodman offers a way out with clear steps we must take to survive the progress unfolding before us. Provocative, thrilling, and ultimately empowering, *Future Crimes* will serve as an urgent call to action that shows how we can take back control over our own devices and harness technology's tremendous power for the betterment of humanity—before it's too late.

Freedom in Chains James Bovard, 2015-08-25 Governments and bureaucracies are bigger and more controlling than ever. A citizen's own ability to control his or her own life has never been less than it has today. How did we get to this point? Jim Bovard, bestselling author of *Lost Rights*, looks at the development of the State into a behemoth that threatens to destroy the individual at the cost of preserving the idea of statism--the belief that government is inherently superior to the citizenry, that progress consists of extending the realm of governmental compulsion, and that vesting more arbitrary power in government officials will eventually make citizens happy. Reading through the history of the state and its war on the citizen, Bovard looks at thinkers as diverse as John Locke, Etienne de la Boetie, James Madison, and Bernard Bosanquet among others. He explores the original version of the idea of the state, the development of the welfare state, the progress of the state's judicial system from the original province of the courts into the lives of men and women and the ultimate fraud that is perpetrated as the state's benevolence. Controversial and essential reading in these times of the Leviathan state, *Freedom in Chains* is must reading for everyone who took Jim Bovard's *Lost Rights* to heart as well as anyone trying to understand how far we've come from our eighteenth century roots as a community of impassioned patriots to our sorry positions as wards of the state at the end of the 20th century.

Racial Profiling Steven J. Muffler, 2006 In recent years, racial profiling has drawn the attention of state and federal governments. In this book, racial profiling is defined as the practice of targeting individuals for police or security interdiction, detention, or other disparate treatment based primarily on their race, ethnicity, or national origin in the belief that certain minority groups are more likely to engage in unlawful behaviour. Assertions that law enforcement personnel at all levels unfairly target certain racial and ethnic groups, particularly but not exclusively for traffic stops and searches, have raised concerns about violations of the Constitution. The major debate on racial profiling centres on whether the practice should be prohibited entirely and whether data on traffic stops and searches should be collected to determine if the practice is occurring. This book gathers presents the major issues, available data, and analyses important to understanding on the most dangerous and divisive practices of our time.
