## **A New Grey Approach for Using SWARA and PIPRECIA Methods in a Group Decision-Making Environment**

Dragisa Stanujkic, Darjan Karabasevic, Gabrijela Popovic, Predrag S. Stanimirovic, Muzafer Saracevic, Florentin Smarandache, Vasilios N. Katsikis, Alptekin Ulutas, 2021-07-01 The environment in which the decision-making process takes place is often characterized by uncertainty and vagueness and, because of that, sometimes it is very hard to express the criteria weights with crisp numbers. Therefore, the application of the Grey System Theory, i.e., grey numbers, in this case, is very convenient when it comes to determination of the criteria weights with partially known information. Besides, the criteria weights have a significant role in the multiple criteria decision-making process. Many ordinary multiple criteria decision-making methods are adapted for using grey numbers, and this is the case in this article as well. A new grey extension of the certain multiple criteria decision-making methods for the determination of the criteria weights is proposed. Therefore, the article aims to propose a new extension of the Step-wise Weight Assessment Ratio Analysis (SWARA) and Pivot Pairwise Relative Criteria Importance Assessment (PIPRECIA) methods adapted for group decision-making.

*Business Intelligence* Carlo Vercellis, 2011-08-10 Business intelligence is a broad category of applications and technologies for gathering, providing access to, and analyzing data for the purpose of helping enterprise users make better business decisions. Enabling Knowledge Creation Georg von Krogh, Kazuo Ichijo, Ikujiro Nonaka, 2000-06-01 When The Knowledge-Creating Company (OUP; nearly 40,000 copies sold) appeared, it was hailed as a landmark work in the field of knowledge management. Now, Enabling Knowledge Creation ventures even further into this all-important territory, showing how firms can generate and nurture ideas by using the concepts introduced in the first book. Weaving together lessons from such international leaders as Siemens, Unilever, Skandia, and Sony, along with their own first-hand consulting experiences, the authors introduce knowledge enabling--the overall set of organizational activities that promote knowledge creation--and demonstrate its power to transform an organization's knowledge into value-creating actions. They describe the five key knowledge enablers and outline what it takes to instill a knowledge vision, manage conversations, mobilize knowledge activists, create the right context for knowledge creation, and globalize local knowledge. The authors stress that knowledge creation must be more than the exclusive purview of one individual--or designated knowledge officer. Indeed, it demands new roles and responsibilities for everyone in the organization--from the elite in the executive suite to the frontline workers on the shop floor. Whether an activist, a caring expert, or a corporate epistemologist who focuses on the theory of knowledge itself, everyone in an organization has a vital role to play in making care an integral part of the everyday experience; in supporting, nurturing, and encouraging microcommunities of innovation and fun; and in creating a shared space where knowledge is created, exchanged, and used for sustained, competitive advantage. This much-anticipated sequel puts practical tools into the hands of managers

and executives who are struggling to unleash the power of knowledge in their organization.

***Decision Support Systems for Business Intelligence*** Vicki L. Sauter, 2014-08-21 Praise for the First Edition This is the most usable decision support systems text. [i]t is far better than any other text in the field —Computing Reviews Computer-based systems known as decision support systems (DSS) play a vital role in helping professionals across various fields of practice understand what information is needed, when it is needed, and in what form in order to make smart and valuable business decisions. Providing a unique combination of theory, applications, and technology, *Decision Support Systems for Business Intelligence, Second Edition* supplies readers with the hands-on approach that is needed to understand the implications of theory to DSS design as well as the skills needed to construct a DSS. This new edition reflects numerous advances in the field as well as the latest related technological developments. This Second Edition features: Expanded coverage of data mining with new examples Newly added discussion of business intelligence and transnational corporations Discussion of the increased capabilities of databases and the significant growth of user interfaces and models Emphasis on analytics to encourage DSS builders to utilize sufficient modeling support in their systems A thoroughly updated section on data warehousing including architecture, data adjustment, and data scrubbing Explanations and implications of DSS differences across cultures and the challenges associated with transnational systems Each chapter discusses various aspects of DSS that exist in real-world applications, and one main example of a DSS to facilitate car purchases is used throughout the entire book. Screenshots from JavaScript® and Adobe® ColdFusion are presented to demonstrate the use of popular software packages that carry out the discussed techniques, and a related Web site houses all of the book's figures along with demo versions of decision support packages, additional examples, and links to developments in the field. *Decision Support Systems for Business Intelligence, Second Edition* is an excellent book for courses on information systems, decision support systems, and data mining at the advanced undergraduate and graduate levels.
