Roswell S. Ripley EagleView Publishing Company,2011-04-29 This is the exciting story of Roswell S. Ripley. Although born in the North, Ripley became a famous Civil War general for the South. His brilliant mind, ingenuity, and soldier's directness made him sometimes difficult to work with, but gained him the respect of those who knew him. His defense of Charleston included placing torpedoes, capturing a Union ironclad, salvaging Dahlgren cannons from an ironclad he sank, and coping with Robert Smalls, the slave who stole his steamship. His life and his amazing achievements are a part of America's history that should never be forgotten.

An Eagle's View Paul Moss,2022-08-18 There are items that, if obtained, can open the heavens for further enlightenment before the second coming of the Lord. Through a series of surprise events, a cast of characters begins to come together—a “gathering of peoples” that, unbeknownst to some, have entered into a potentially dangerous and life-threatening situation dealing with the items mentioned above. One of these characters, Darren Brown, a Colorado native with a wife and three children, begins to feel disenfranchised, unsettled, and concerned about the world around him. As he sets off to find some personal answers, he is shortly swept into something that he knows nothing about, changing his and his family’s lives forever. Another character, Misty Butler, an elderly Native American widow, arrives on the scene and she too, after experiencing some powerful and emotional spiritual visions, is wrapped up into the plot. From the first chapter to the last, the plot twists and turns, leaving the reader in suspense over what will happen next.

Bald Eagle Vision 2 Jason O'Neil, 2021-07-13 In this novel, Rory Flynn, son of Matt Flynn, the co-inventor of the Red Box Antigravity Device which revolutionized global transportation, is the billionaire grandfather of Nolan Flynn. Grandpa takes his 17-year-old grandson on a week-long tour of the national capital region. Their Turbopod multi-vehicle (T-Pod) carries them to key sites around the Chesapeake Bay. The journey begins and ends at the family home, Beauvista, overlooking Jefferson's Monticello in Charlottesville, Virginia. The purpose of the tour is to educate the young man about the many "ISMs" like Americanism, Federalism, Racism, Socialism and Communism. In addition to the Capitol, the duo visits museums, galleries, monuments, golf courses and French restaurants. Grandpa wants his grandson to "smell the roses along the way." The youth has a rude awakening during a visit to a Middle School where the ugliness of the white versus black racism is taught. The role of the Teacher's Unions in brainwashing the students with racism in order to divide the country for the Socialist government is clear. In addition, Nolan gets a lifetime lesson about how the Chinese Communists have infiltrated American society in preparation for a complete take-over. In the end, Nolan realizes why the Flynn Family has been dedicated to the fight against Socialism and Communism for decades. The tour convinces the savvy youth to take up the torch for American Patriotism. He takes pride in his new vision, much like that of the Bald Eagle, to dedicate his life to the fight against the ugly "ISMs" attempting to end our Democracy and Free-Enterprise economy and turn our country into a Third-World state controlled by Beijing.

The Rio Grande Barbara J. McIntyre, 2011 Photographer Adriel Heisey has captured the spirit of the Rio Grande with his awe-inspiring aerial images of the river. Heisey follows the waterway from its headwaters in the San Juan Mountains of southern Colorado, through New Mexico, then as it straddles and defines the Texas-Mexico border and finally culminates with its outpouring into the Gulf of Mexico. Heisey's images bring to life the unmistakable signature of water that the Rio Grande represents in the arid southwestern landscape.

Deep Change Gerald Ponder, David Strahan, 2005-11-01 This book presents cases of schools (Part One) and programs at the district level and beyond (Part Two) in which reform, while driven by high-stakes accountability, became larger and deeper through data-driven dialogue, culture change, organizational learning, and other elements of high performing cultures. Commentaries on cross-case patterns by Ann Lieberman and Michael Fullan and a chapter on now what? first steps provide implications for initiating deep change that results in improved student learning outcomes even in challenging activity settings.

Remote Sensing of Impervious Surfaces Qihao Weng, 2007-10-03 Remote sensing of impervious surfaces has matured using advances in geospatial technology so recent that its applications have received only sporadic coverage in remote sensing literature.

Remote Sensing of Impervious Surfaces is the first to focus entirely on this developing field. It provides detailed coverage of mapping, data extraction, and modeling techniques specific to analyzing impervious surfaces, such as roads and buildings. Written by renowned experts in the field, this book reviews the major approaches that apply to this emerging field as well as current challenges, developments, and trends. The authors introduce remote sensing digital image processing techniques for estimating and mapping impervious surfaces in urban and rural areas. Presenting the latest modeling tools and algorithms for data extraction and analysis, the book explains how to differentiate roads, roofs, and other manmade structures from remotely sensed images for individual analysis. The final chapters examine how to use impervious surface data for predicting the flow of storm- or floodwater and studying trends in population, land use, resource distribution, and other real-world applications in environmental, urban, and regional planning. Each chapter offers a consistent format including a concise review of basic concepts and methodologies, timely case studies, and guidance for solving problems and analyzing data using the techniques presented.

Re-envisioning Advances in Remote Sensing Ripudaman Singh, 2022-03-17 Re-envisioning Advances in Remote Sensing: Urbanization, Disasters and Planning aims at portraying varied advancements in remote sensing applications, particularly in the fields of urbanization, disaster management and regional planning perspectives. The book is organized into three sections of overlapping areas of research covering chief remote sensing applications. Apart from introducing the advances in remote sensing through Indian remote sensing developments, it depicts the broader themes of: urbanization and its impacts; geospatial technology for disaster management; and, remote sensing applications in models and planning. It also provides outlook to future research agenda for remote sensing. Features: • Depicts advances in remote sensing in major fields through applications of geospatial technologies. • Covers remote sensing applications in varied aspects of urbanization, urban problems and disasters. • Includes advancements in remote sensing in model building and planning perspectives. • Analyses the usage of smartphones and other digital devices in mapping urban problems and monitoring disaster risks. • Explores future agenda for remote sensing advances and its ever-widening horizon. This book would be of interest to all the researchers and graduate students pursuing studies in the fields of remote sensing, GIS, geospatial technologies, urbanizations, disaster management, regional planning, environmental sciences, natural resource management and related fields.
