**Hearing Loss** National Research Council, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on Disability Determination for Individuals with Hearing Impairments, 2004-12-17 Millions of Americans experience some degree of hearing loss. The Social Security Administration (SSA) operates programs that provide cash disability benefits to people with permanent impairments like hearing loss, if they can show that their impairments meet stringent SSA criteria and their earnings are below an SSA threshold. The National Research Council convened an expert committee at the request of the SSA to study the issues related to disability determination for people with hearing loss. This volume is the product of that study. Hearing Loss: Determining Eligibility for Social Security Benefits reviews current knowledge about hearing loss and its measurement and treatment, and provides an evaluation of the strengths and weaknesses of the current processes and criteria. It recommends changes to strengthen the disability determination process and ensure its reliability and fairness. The book addresses criteria for selection of pure tone and speech tests, guidelines for test administration, testing of hearing in noise, special issues related to testing children, and the difficulty of predicting work capacity from clinical hearing test results. It should be useful to audiologists, otolaryngologists, disability advocates, and others who are concerned with people who have hearing loss.

Just as an artist must know every color in order to create a beautiful painting, a musician must know and hear all the notes of the musical palette in order to create good music. This Ear Training method has been developed to teach the student how to hear the way musical sounds are organized within a key. With proper application, the student will be able to instantly recognize: . Which notes other musicians are playing. . What key a chord progression is in. . What the notes in a given melody are. These are all invaluable tools for both playing and composing music. This Complete Method is recommended for students who have little or no music training or an advanced musician that needs to develop their aural recognition skills. This book contains all the information needed to work with the Beginning, Intermediate and Advanced CDs which as mentioned are available separately. These CDs are entitled: Ear Training One Note Beginning Ear Training One Note Intermediate Ear Training One Note Advanced These 3 CDs are also available in MP3 format. Both formats can be purchased from various on-line vendors. A list of recommended vendors can be found on the muse-eeek.com website.
