Francesca Bacci, David Melcher

Vaideology Steve Vai, 2019-01-01 (Guitar Educational).

Experience must-know music knowledge and wisdom through the highly focused lens of legendary guitar virtuoso Steve Vai. This full-color instructional book written by Vai himself features in-depth discussions of the music theory fundamentals that every aspiring (and veteran) guitar player should know, packed with practical exercises, diagrams, tips, inspiring ideas and concepts, practice methods, and ways of looking at music that you may have never considered. Topics covered include: academic vs. experiential learning * reading and writing music * key signatures * chord scales * rhythm basics * guitar harmonics * modes * and much more.

Light and Sound Eve Hartman, Wendy

Meshbesh, 2016-08-15 An illustrated introduction to light and sound that covers acoustics, reflection, refraction, rainbows, and other related topics, and includes a quiz, a glossary, and a list of resources.

The Search for the Meaning of Space, Time, and Matter

Kai Woehler, 2009-02-23 The book gives a comprehensive introduction for interested general readers, into the development and structure of concepts, ideas and theory formation about the elementary building blocks of matter, the forces with which these particles interact and about the fundamental nature of space itself. Einsteins theory of the cosmos and the recent discovery of the presence of a dark energy which leads to an accelerated expansion of cosmic space, provide the background for the most astonishing recent developments in the search for the origin of space and matter. The String-Theory revolution has led to the notion that nature may not follow one unique set of laws to build worlds, but that innumerable many possible universes may exist, that worlds may be emerging and disappearing like biological species and that our existence may be extraordinarily rare and therefore precious. An introduction to the concept of emergence

in self-organizing systems is given to make the connection to the idea that Emergence may be the inherent creative property of space and matter at the quantum level.
