America at the Mall Lisa Scharoun,2014-01-10 Since the construction of the first fully enclosed shopping center in 1952, the shopping mall has evolved into the heart of many suburban areas across the United States. More than simply a place to purchase goods, this veritable “temple of consumerism” has become a primary place for community and social interaction and an essential element in many citizens’ day-to-day lives. This study explores the spiritual, emotional and physical effects of the enclosed shopping mall on the public, chronicling the growth of the mall, its role in shaping urban and suburban life, its positive and negative impacts on society and the environment, and its future viability. As this work shows, the mall remains rich in symbolic influence, and in many ways mirrors the American condition.

The Darkest Side of Saturn Tony Taylor,2014-07-07 It’s 1997 at a mountaintop observatory in Southern California where spacecraft navigator Harris Mitchel and astronomer Diana Muse-Jones discover a dangerous asteroid which may hit the earth within two decades. As the asteroid tumbles through space towards an uncertain impact, Harris and Diana fight bitterly over how to announce their discovery. When Harris goes public to a skeptical world—at the cost of his and Diana’s careers—he sends their already turbulent relationship into a blaze of conflicting passions. As his notoriety builds, a fanatical preacher and his unhinged followers stalk him while an obnoxious radio personality provides disruptive help. Harris becomes an unwilling Pied Piper for his own overzealous followers hungry for belief and eager for guidance into an uncertain and tumultuous future. In this science fiction drama the characters battle each other in contests of Damn your world view! against a background of hard science, religion, romance, metaphysical speculation, and the forces of nature versus human passions and dreams. Meanwhile an asteroid hurtles through the solar system and global salvation or disaster hangs in the balance. “A courageous and visionary work ... an instant classic.” —BlueInk Reviews

Victor Babette Mann Huber,2006 Victor tells the unique story of a historic community in the Finger Lakes region, just south of Rochester. It chronicles Victor's past as a Seneca Indian capital to the coming of Massachusetts settlers in the 18th century through to life as it was in the 20th century. With over 200 photographs, this book shows how people in rural upstate New York lived, played, studied, worked, and worshiped. The images are from the town and village archives, the Victor Historical Society, the Ontario County Historical Society, and private collections. Many are previously unpublished photographs, and several are by Fred Locke, an amateur photographer who is considered to be the father of porcelain insulators.

Returning to Eden John Mazurk, 2018-02-15 For thousands of years, humankind questioned what happens when we die. Philosophers and religious leaders searched for an answer. Often, the answer was, after dying, one's spirit goes to a paradise. What happens when we no longer die? Do we ever go to a paradise? Returning to Eden is a story of what humankind needs to do when it achieves immortality in this existence. It will be at least 250 years before humankind achieves immortality. Preparing for that eventuality will be difficult. The book addresses not only the scientific advancements required for immortality but also religion, social mores and folkways, economic science, educational methods, political science, resources requirements, and other factors affected by humankind's achievement. The story takes place 100 years in the future, when technical advancements provide a means for communication using artificial intelligence devices augmenting university professors lecturing from different locations on Earth and Moon for a universal symposium. Unfortunately, for humankind, even 100 years in the future, people will still be engaged in hostile conflicts. These conflicts continually interrupt the symposium, and it takes the efforts of government and university security personnel to resolve the situation. How they do it is futuristic and not simple.
