Researching the Visual Michael Emmison, Philip

Smith, Margery Mayall, 2012-12-18 This second edition provides an excellent overview of the field by covering the traditional themes and current trends in image centred photographic visual inquiry but extends this by demonstrating the rich possibilities available through the analysis of everyday objects, places and interactions. The book includes chapters on researching 2D and 3D visual data, along with lived and living visual data, and also features a brand new chapter on researching the virtual world of the internet. Drawing on theoretical traditions as diverse as semiotics, ethnomethodology, symbolic interactionism and material culture studies, the second edition provides an invaluable guide for researchers interested in conducting innovative visual inquiry. Packed with exercises and projects, the book makes it easy for students to undertake their own research with limited resources and budget. The new edition also features helpful icons alerting researchers to important ethical considerations that are vital in the field of visual research. Generously illustrated with images and diagrams, this new edition is the perfect companion to those doing projects, dissertations or theses involving visual research.

Strategic Financial Management Casebook Rajesh

Kumar,2017-01-05 Strategic Financial Management Casebook strategically uses integrative case studies—cases that do not emphasize specific subjects such as capital budgeting or value based management—to provide a framework for understanding strategic financial management. By featuring holistic

presentations, the book puts readers into the shoes of those responsible for the world's largest wealth creators. It covers strategies of growth, mergers and acquisitions, financial performance analysis over the past decade, wealth created in terms of stock returns since its listing in stock market, investment and financial decisions, cost of capital, and corporate valuation. In addition, the casebook also discusses corporate restructuring activities undertaken by each company. Each chapter follows a template to facilitate learning, and each features an Excel-based case analysis worksheet that includes a complete data set for financial analysis and valuation. Introduces a conceptual framework for integrating strategy and finance for value creation Emphasizes the roles of corporate governance, corporate social responsibility, and risk management in value creation Encourages an analysis of investment, financing, and dividend decisions Examines non-financial factors that contribute to value

Popular Photography ,2009

Advances in Location-Based Services Georg Gartner,Felix Ortig,2011-11-02 This book gives a general picture of research-driven activities related to location and map-based services. The interdisciplinary character of the topic leads to a variety of contributions with backgrounds from academia to business and from computer science to geodesy. While cartography is aiming at efficient communication of spatial information, the development and availability of technologies like mobile networking, mobile devices or short-range sensors lead to interesting new possibilities of achieving this aim. By trying to make use of the available technologies, a variety of related disciplines looks specifically at user-centered and context-aware system development, especially in wayfinding and navigation systems.

Camera Constructs Andrew Higgott,Timothy

Wray,2016-12-05 Photography and architecture have a uniquely powerful resonance - architectural form provides the camera with the subject for some of its most compelling imagery, while

photography profoundly influences how architecture is represented, imagined and produced. *Camera Constructs* is the first book to reflect critically on the varied interactions of the different practices by which photographers, artists, architects, theorists and historians engage with the relationship of the camera to architecture, the city and the evolution of Modernism. The title thus on the one hand opposes the medium of photography and the materiality of construction - but on the other can be read as saying that the camera invariably constructs what it depicts: the photograph is not a simple representation of an external reality, but constructs its own meanings and reconstructs its subjects. Twenty-three essays by a wide range of historians and theorists are grouped under the themes of 'Modernism and the Published Photograph', 'Architecture and the City Re-imagined', 'Interpretative Constructs' and 'Photography in Design Practices.' They are preceded by an Introduction that comprehensively outlines the subject and elaborates on the diverse historical and theoretical contexts of the authors' approaches. *Camera Constructs* provides a rich and highly original analysis of the relationship of photography to built form from the early modern period to the present day.

The Role of Digital Libraries in a Time of Global Change

Gobinda Chowdhury,Chris Khoo,Jane Hunter,2010-06-18 The year 2010 was a landmark in the history of digital libraries because for the first time this year the ACM/IEEE Joint Conference on Digital Libraries (JCDL) and the annual International Conference on Asia-Pacific Digital Libraries (ICADL) were held together at the Gold Coast in Australia. The combined conferences provided an opportunity for digital library researchers, academics and professionals from across the globe to meet in a single forum to disseminate, discuss, and share their valuable search. For the past 12 years ICADL has remained a major forum for digital library researchers and professionals from around the world in general, and for the Asia-Pacific region in particular. Research and development activities in digital libraries that began almost two decades ago have gone through some distinct phases: digital libraries have evolved from mere networked collections of digital objects to robust information services designed for both specific applications as well as global audiences. Consequently, researchers have focused on various challenges ranging from technical issues such as networked infrastructure and the creation and management of complex digital objects to user-centric issues such as usability, impact and evaluation. Simultaneously, digital preservation has emerged and remained as a major area of influence for digital library research. Research in digital libraries has also been influenced by several socio-economic and legal issues such as the digital divide, intellectual property, sustainability and business models, and so on. More recently, Web 2.

Computer Vision -- ECCV 2014 David Fleet,Tomas Pajdla,Bernt Schiele,Tinne Tuytelaars,2014-08-14 The seven-volume set comprising LNCS volumes 8689-8695 constitutes the refereed proceedings of the 13th European Conference on Computer Vision, ECCV 2014, held in Zurich, Switzerland, in September 2014. The 363 revised papers presented were carefully reviewed and selected from 1444 submissions. The papers are

organized in topical sections on tracking and activity recognition; recognition; learning and inference; structure from motion and feature matching; computational photography and low-level vision; vision; segmentation and saliency; context and 3D scenes; motion and 3D scene analysis; and poster sessions.

Transportation And Highway Engineering Dr. Syed Omar Ballari, Dr. S. Thenmozhi, Rajneesh Sharma, Dr. Tarun Gehlot, 2022-08-30 There can be no thriving local or national economy without a reliable and well-maintained land transportation network. In order to facilitate economic expansion and social development, society relies on a reliable and convenient land transportation network, and roads have always been and will always be an integral part of this system. Road's relevance and utility have grown with the development of faster and more efficient forms of transportation and the rapid acceleration of economic activity in modern human civilization. However, when careful consideration is not given to road development at the stages of planning, design, building, and management, the potential for negative consequences has increased in proportion. The discipline of highway engineering has to go beyond just satisfying the fundamental necessities of delivering safe and rapid access from one location to another, to an area of study that not only includes "the structural and functional requirements of highways" and city streets, but also handles the socio-economic and environmental implications of road network growth, allowing us to maximise the advantages and limit the negative effects of road construction. These softer elements of "highway engineering" and the social duties of highway engineers are not fully covered in the traditional engineering curriculum. This book has five chapters devoted to Transportation & Highway Engineering in an effort to give these subjects the attention they deserve. Most experts believe that in today's world, a highway engineer has to be well-versed in topics as diverse as highway funding, access management,

environmental implications, road safety, and noise. Students at both the undergraduate and graduate levels of civil engineering as well as highway engineering should find the five chapters adequate for understanding the environmental and social obligations of a highway engineer. There is also a comprehensive and up-to-date analysis of the movement toward privati.

Semantic Multimedia Thierry Declerck, Michael

Granitzer, Marcin Grzegorzek, Massimo Romanelli, Stefan R ger, Michael Sintek, 2011-08-19 This book constitutes the revised selected papers of the 5th International Conference on Semantics and Digital Media Technologies, SAMT 2010, held in Saarbr cken, Germany, in December 2010. As a result of a highly selective review procedure, 12 full papers and 4 short papers were accepted for publication. The contributions present novel approaches for managing, distributing and accessing large amounts of multimedia material. The topics covered include semantic search, analysis and retrieval of images, audio, video, 3D/4D material as well as of computer generated multimedia content. Also addressed are issues relating to semantic metadata management, semantic user interfaces, and semantics in visualization and computer graphics.

Photographing Charleston, Savannah & the Coastal Islands: Where to Find Perfect Shots and How to Take Them

Jeff Dodge, 2011-06-06 Invaluable advice by regional experts and master photographers on where to find the most stunning sites at their peak and how to shoot them. Gracious, historic Charleston, South Carolina, has long been a favorite travel destination. Lovely, romantic Savannah, Georgia, is a gem of the Old South. The many barrier islands running along the coast between them offer miles of beaches, great wildlife viewing, dramatic seascapes, and lush wetlands. The entire area provides diverse opportunities for photographers at all levels of expertise, and this new guide shows you where to find its best and most photogenic antebellum architecture, historic sites, and wild vistas. Maps and GPS coordinates will help you find precise locales, and the advice on when and how best to capture them on film will help make your excursions fruitful as well as enjoyable.
