Technology Innovation in Underground Construction Gernot Beer,2009-10-16 This richly-illustrated reference guide presents innovative techniques focused on reducing time, cost and risk in the construction and maintenance of underground facilities: A primary focus of the technological development in underground engineering is to ease the practical execution and to reduce time, cost and risk in the construction and maintenance of underground facilities such as tunnels and caverns. This can be realized by new design tools for designers, by instant data access for engineers, by virtual prototyping and training for manufacturers, and by robotic devices for maintenance and repair for operators and many more advances. This volume presents the latest technological innovations in underground design, construction, and operation, and comprehensively discusses developments in ground improvement, simulation, process integration, safety, monitoring, environmental impact, equipment, boring and cutting, personnel training, materials, robotics and more. These new features are the result of a big research project on underground engineering, which has involved many players in the discipline. Written in an accessible style and with a focus on applied engineering, this book is aimed at a readership of engineers, consultants, contractors, operators, researchers, manufacturers, suppliers and clients in the underground engineering business. It may moreover be used as educational material for advanced courses in tunnelling and underground construction.

Adventures in Bookbinding Jeannine Stein,2011-06-01 Each project in this book combines bookbinding with a specific craft such as quilting, jewelry making, or polymer clay, and offer levels of expertise: basic, novice, and expert. Illustrated step-by-step instructions and photographs demonstrate how to construct the cover pages, and a unique binding technique, easy enough for a beginner to master. Each project also features two other versions with the same binding geared to those with more or less experience. The novice version is for those who have no knowledge of the craft and want shortcuts, but love the look. For the quilter's book, for example, vintage quilt pieces become the covers so all that's needing in the binding. Or if you're interested in wool felting use an old sweater. This offers great opportunities for upcycling. The expert version is for those who have a great deal of knowledge and proficiency of a certain craft - the master art quilter, for example. For this version, an expert guest artist has created the cover and the author has created the binding. This offers yet another creative opportunity - the collaborative project. Since crafters often get involved with round-robins and other shared endeavors, this will show them yet another way to combine their skills. No other craft book offers the possibilities and challenges that Adventures in Bookbinding does. Readers will return to it again and again to find inspiration and ideas.

Medicine Meets Virtual Reality 19 James D. Westwood,Susan W. Westwood,2012 A physician who is treating a patient confronts a complex and incompletely understood living system that is sensitive to pain. An engineer or programmer who develops a new device, on the other hand, operates within the less emotional domains of materials and mathematics. The Medicine Meets Virtual Reality (MMVR) conference brings together physicians, scientists, engineers, educators, students, and others to bridge the gap between clinicians and technologists, and to create collaborative solutions to healthcare challenges. This book presents the proceedings of the Medicine Meets Virtual Reality conference (MMVR19), held in Newport Beach, California, USA, in February 2012. It includes papers on modeling and simulation, imaging, data visualization and fusion, haptics, robotics, telemedicine and medical intelligence networking, virtual and augmented reality, psychotherapy and physical rehabilitation tools, serious games, and other topics. MMVR stimulates interaction between developers and end users and promotes unorthodox problem-solving as a complement to rigorous scientific methodology. This book will interest all who are involved with the future of medicine. close

Cutting Your Losses from a Bad or Toxic Relationship Dr. J.A. McGruder Ph.D. CRC,2018-10-04 Life itself can be like riding a roller coaster. It's full of ups and downs, high and low points. Using the lyrics of an old gospel song by Linda Ronstadt, "Life is like a mountain railway with an engineer that's brave. We must make this run successful from the cradle to the grave," one of the greatest challenges we all face to navigate life's journey is developing healthy, godly relationships. One of our greatest failures in developing healthy relationships is well described by a story sharer in this book. She compares a bad or toxic relationship with the plight of sin. "Sin will take you farther than you want to go, keep you longer than you want to stay, and cost you more than you want to pay." Such can be said about a bad or toxic relationship. In Dr. McGruder's book Cutting Your Losses from a Bad or Toxic Relationship, he warns those who discover themselves in such a relationship and fail to heed warnings and escape from harm's way. Remaining in such a relationship can waste a significant portion of your life's journey,

and the result can tally up to emotional, mental, psychological, and spiritual gross costs. However, this book will provide insight on how to survive and thrive it all!
