The Last Lecture Randy Pausch, 2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. We cannot change the cards we are dealt, just how we play the hand. —Randy Pausch A lot of professors give talks titled The Last Lecture. Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—Really Achieving Your Childhood Dreams—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have . . . and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be

shared for generations to come.

The Magic of Self-Directed Work Teams Paul C. Palmes,2005-06-07 Northern Pipe Products is today experiencing unprecedented efficiencies, employee involvement, a vibrant and desired training program, record output per-man hour, and lowest overall waste in company history. What it did and learned over five years is the story of this book.The science of Self-Directed Work Teams resides in the realization that chance and stewardship are different sides of the same coin. Admitting to the obvious truth of infinite human variation dismantles the notion of truly controlling people. If not in their actions, surely in their minds and reflected in their attitudes people resent being told what to do. They much prefer to be told why something must be done and then allowed to apply their unique talents and strengths to manage the assignment. Leaders who understand and therefore respect

individual differences use diversity to create value, allowing the insights of others to create often-superior approaches. This story could have taken place in a hospital, school, supermarket, or any other organization that requires people to work together for the greater good. Regardless of the setting, be it computer service, healthcare, education, manufacturing or child care, what follows could just as well be your story. Because it's about people and their unlimited potential to achieve extraordinary things, the manufacture of pipe is simply a metaphor. Any group of people facing another day just like yesterday can choose to follow this path, regardless of the style or color of shoes they wear. True opportunity is one size fits all.
