Beyond Semiotics Niall Lucy,2001-07-26 Where is semiotics now? As the promised science of the social life of signs in general, semiotics has not been good to its word. Although well-established institutionally today--through specialist journals, research centres, international conferences, professional associations and the like--semiotics now seems quaintly out of place in a world where text, culture and technology defy metadisciplinary, if not metaphysical, explanation. When the semiotician has finished explaining the music of Primal Scream, the textuality of an email message or the culture of the internet, most would believe there was still lots to be said. A generation ago, the radical humanities scholar turned to semiotics for the last word on news production, cinematic desire or the meaning of youth style. Today that last word (which is always the latest word too) is more likely to go to cultural studies, literary theory or postmodernism--all of which are in several senses 'beyond' semiotics even while remaining indebted to it. In addition, we can't so easily presume to separate notions of production and desire, say, or news and cinema, precisely because we can no longer say for sure where the differences lie between notions of text, culture and technology. *Beyond Semiotics* provides an approach to these three interdependent concepts of text, culture and technology, in order to show what semiotics had always had to marginalize, forget, or not see in the quest to professionalize itself. Meanwhile, outside the limitation of any discipline, the secular mysteries of text, culture and technology today continue to call for a response--not with the aim of laying bare the truth, but of opening up the sign.

The Real Citrix CCA Exam Preparation Kit Shawn Tooley,2009-05-18 The Citrix Certified Administrator (CCA) credential is the first tier of Citrix

certification. The CCA is most often sought out by IT professionals whose networks employ Citrix virtualization technology, and for those IT professionals who are seeking a broad base of general network expertise. The number of CCAs is estimated at between 65 and 70K, up from 45,000 in 2003. Citrix recently released a new version of its most popular product, XenApp (formerly Presentation Server). This new version is fully compatible with Windows Server 2008. To retain their CCA credential, all current CCAs will need to upgrade to the new software. This will be particularly important to those companies enrolled in Citrix partner programs, as current certification is a requirement of the program. When packaged with practice exams, this prep kit will offer an affordable, effective solution for CCA certification and re-certification. Complete exam-prep package includes full coverage of new XenApp 5.0 objectives Authored by a Citrix expert with hundreds of implementations to his credit This preparation kit can also be used as a reference guide for administrators who need to integrate XenApp 5.0 with their networks

Double Accounting for Goodwill Martin Bloom, 2013-05-13 Goodwill, sometimes purchased but often more significantly internally generated, is the major constituent of the value of many listed companies. Accounting aims to provide users of financial statements with useful information, and more than fifty current International Financial Reporting Standards prescribe accounting disclosure requirements in minute detail. However, these Standards dismiss internally generated goodwill with a single brief provision that it is not to be brought to account at all. The impairment regime now laid down for dealing with purchased goodwill contains severe flaws, while previous methods have also been found to be unsatisfactory. This book traces the history of the goodwill accounting controversy in detail and demonstrates that it has been a prime example of an issue 'conceived in a way that it is in principle unsolvable'. It explores the problem of recognising the importance of goodwill as a whole and finding a way of presenting meaningful information regarding it in the context of the financial statements. The author's proposed solution builds upon research undertaken and uses a Market Capitalization Statement, based on a modification of nineteenth century 'double accounting' in a modern context. Examples show that the proposed Market Capitalization Statement has the potential to provide significant information not currently available from conventional financial statements, which in turn are freed to present clearer information.
