**Computer-Aided Architectural Design. "Hello, Culture"** Ji-Hyun Lee, 2019-06-13 This book constitutes selected papers of the 18th International Conference on Computer-Aided Architectural Design Futures, CAAD Futures 2019, held in Daejeon, Republic of Korea, in June 2019. The 34 revised full papers presented were carefully reviewed and selected from 194 submissions. The papers are organized in topical sections on theory, methodology and practice of architectural and interior design; support systems for design decisions; tools, methods and implementation of urban design; rethinking space and spatial behavior; fabrication and materialization; and shape studies.

**Unbiased Stereology** Vyvyan Howard, Matthew Reed, 2004-10-28 Unbiased Stereology, Second Edition is a practical guide to making unbiased 3-D measurements via the microscope. Only those stereological techniques which have been tried and tested by real application are included. Although this technology is essentially mathematical and statistical, the authors do not immerse the reader in complex analysis, but rather provide simple heuristic explanations and references to the original proof, and illustrate the theory by analogies drawn from everyday experience. To give practical experience in application of the techniques, exercises are provided at the end of each chapter, complete with detailed worked answers.

**Innovative Strategies for Teaching in the Plant Sciences** Cassandra L. Quave, 2014-04-11 Innovative Strategies for Teaching in the Plant Sciences focuses on innovative ways in which educators can enrich the plant science content being taught in universities and secondary schools. Drawing on contributions from scholars around the world, various methods of teaching plant science is demonstrated. Specifically, core concepts from ethnobotany can be used to foster the development of connections between students, their environment, and other cultures around the world. Furthermore, the volume presents different ways to incorporate local methods and technology into a hands-on approach to teaching and learning in the plant sciences. Written by leaders in the field, Innovative Strategies for Teaching in the Plant Sciences is a valuable resource for teachers and graduate students in the plant sciences.

**New Media for Educational Change** Liping Deng, Will W. K. Ma, Cheuk Wai Rose Fong, 2018-06-26 This book gathers selected papers presented at the Hong Kong Association for Educational Communications and Technology 2018 International Conference on the theme of "new media for educational change: effects on learning and reflection on practice". It contributes to a scholarly discussion that goes beyond what new media can contribute to education, and reflects on best practices as well as lessons learned by applying new media in a wide range of fields. Scholars from educational technology, journalism, higher education, etc. share their findings in a number of formats, such as empirical research, case studies of best practices, literature reviews, etc. The topics addressed include but are not limited to media practice, application of innovative technologies, MOOCs in higher education, social media for learning, gamification, learning analytics, and comparative studies.

**Brain Mapping**, 2015-02-14 Brain Mapping: A Comprehensive Reference offers foundational information for students and researchers across neuroscience. With over 300 articles and a media rich environment, this resource provides exhaustive coverage of the methods and systems involved in brain mapping, fully links the data to disease (presenting side by side maps of healthy and diseased brains for direct comparisons), and offers data sets and fully annotated color images. Each entry is built on a layered approach of the content – basic information for those new to the area and more detailed material for experienced readers. Edited and authored by the leading experts in the field, this work offers the most reputable, easily searchable content with cross referencing across articles, a one-stop reference for students, researchers and teaching faculty. Broad overview of neuroimaging concepts with applications across the neurosciences and biomedical research Fully annotated color images and videos for best comprehension of concepts Layered content for readers of different levels of expertise Easily searchable entries for quick access of reputable information Live reference links to ScienceDirect, Scopus and PubMed

**Occupational Therapy for Physical Dysfunction** Diane Drette, 2019-12-17 Designed to help students become effective, reflective practitioners, this fully updated edition of the most widely used occupational therapy text for the course continues to emphasize the “whys” as well as the “how-tos” of holistic assessment and treatment. Now in striking full color and co-edited by renowned educators and authors Diane Powers Drette and Sharon Gutman, *Occupational Therapy for Physical Dysfunction*, Eighth Edition features expert coverage of the latest assessment techniques and most recent trends in clinical practice. In addition, the book now explicitly integrates “Frames of Reference” to help students connect theories to practice and features a new six-part organization, thirteen all-new chapters, new pedagogy, and more.

*Vector Measures* Joseph Diestel, John Jerry Uhl, 1977-06-01 In this survey the authors endeavor to give a comprehensive examination of the theory of measures having values in Banach spaces. The interplay between topological and geometric properties of Banach spaces and the properties of measures having values in Banach spaces is the unifying theme. The first chapter deals with countably additive vector measures finitely additive vector measures, the Orlicz-Pettis theorem and its relatives. Chapter II concentrates on measurable vector valued functions and the Bochner integral. Chapter III begins the study of the interplay among the Radon-Nikodym theorem for vector measures, operators on  $L_1$  and topological properties of Banach spaces. A variety of applications is given in the next chapter. Chapter V deals with martingales of Bochner integrable functions and their relation to dentable subsets of Banach spaces. Chapter VI is devoted to a measure-theoretic study of weakly compact absolutely summing and nuclear operators on spaces of continuous functions. In Chapter VII a detailed study of the geometry of Banach spaces with the Radon-Nikodym property is given. The next chapter deals with the use of Radon-Nikodym theorems in the study of tensor products of Banach spaces. The last chapter concludes the survey with a discussion of the Liapounoff convexity theorem and other geometric properties of the range of a vector measure. Accompanying each chapter is an extensive survey of the literature and open problems.
