Information and Communications for Development 2018 World Bank, 2018-11-08 The Information and Communications for Development series looks in depth at how information and communications technologies are affecting economic growth in developing countries. This new report, the fourth in the series, examines the topic of data-driven development, or how better information makes for better policies. The objective is to assist developing-country firms and governments in unlocking the value of the data they hold for better service delivery and decision making and to empower individuals to take more control of their personal data. We are undoubtedly experiencing a data revolution in which our ability to generate, process, and utilize information has been magnified many times over by the machines that we increasingly rely upon. This report is about how the data revolution is changing the behavior of governments, individuals, and firms and how these changes affect the nature of development: economic, social, and cultural. How can governments extract value from data to improve service delivery in the same way that private companies have learned to do for profit? Is it feasible for individuals to take ownership of their own data and to use it to improve their livelihoods and quality of life? Can developing-country firms compete with the internet majors on their own turf and be even more innovative in their use of data to serve local customers better? Though the report is aimed primarily at government policy makers, it also has great relevance for individuals concerned about how their personal data is used and how the data revolution might affect their future job prospects. For private sector firms, particularly those in developing countries, the report suggests how they might expand their markets and improve their competitive edge. For development professionals, the report provides guidance on how they might use data more creatively to tackle long-standing global challenges, such as eliminating extreme poverty, promoting shared prosperity, or mitigating the effects of climate change. The report's chapters explore different themes associated with the supply of data, the technology underlying it, and the demand for it. An overview chapter focuses on government use of data and presentation of definitions. Part I of the report then looks at the "supply side" of the data sector, with chapters on data connectivity and capacity (where data comes from, how it is stored, and where it goes) and data technology (specifically big data analytics and artificial intelligence) and how this is contributing to development. Part II looks at the sector's "demand side," with a chapter on people's use of data and another that examines how firms use digital platforms in the data economy and how that contributes to competitiveness. Part III brings together the policy implications for developing-country stakeholders, with a chapter considering government policies for data, including data protection and privacy. A closing Data Notes appendix looks at statistical indicators associated with the use of data and presents the 2018 update of the Digital Adoption Index (DAI), a composite indicator introduced in the 2016 World Development Report: Digital Dividends.

Textng: The Gr8 Db8 David Crystal, 2009-07-09 This book takes a long hard look at the text-messaging phenomenon and its effects on literacy, language, and society. Young people who seem to spend much of their time texting sometimes appear unable or unwilling to write much else. Media outrage has ensued. It is bleak, bald, sad shorthand, writes a commentator in the UK Guardian. It masks dyslexia, poor spelling, and mental laziness. Exam answers using textese and reports that examiners find them acceptable have led to headlines in the tabloids and leaders in the qualities. Do young people text as much as people think? Do adults? Does texting spell the end of literacy? Is there a panic in the media? David Crystal looks at the evidence. He investigates how texting began and who uses it, why and what for. He shows how to interpret its mix of pictograms, logograms, abbreviations, symbols, and wordplay, and how it works in different languages. He explores the ways similar devices have been used in different eras and discovers that the texting system of conveying sounds and meaning goes back a long way, all the way in fact to the origins of writing - and he concludes that far from hindering literacy, texting may turn out to help it. GSM and UMTS Friedhelm Hillebrand, 2001-11-28 GSM (Global System for Mobile Communication) provides a service to more than 500 million users throughout 168 countries worldwide. It is the world market leader serving 69 % of all mobile digital users and is currently evolving into UMTS (Universal Mobile Telecommunication System). By describing the critical decisions and the phases of the development this key text explains how the GSM initiative became a success in Europe and how it evolved to the global mobile communication system. Initially the strategy and technical specifications were agreed for Europe and the subsequent evolution to a global solution was achieved by incorporating all non-European requirements and by inviting all committed parties worldwide to participate. The process started in 1982 and the first GSM networks went into commercial service in 1992. The first UMTS networks are expected in 2002 and the fourth generation discussions have begun. * Presents a complete technical history of the development of GSM and the early evolution to UMTS * Clarifies the creation of the initial GSM second generation system in CEPT GSM, the evolution to a generation 2.5 system in ETSI SMG and the evolution to the Third Generation (UMTS) in ETSI SMG and 3GPP * Covers all of the services and system features together with the working methods and organisational aspects GSM and UMTS provides an interesting and informative read and will appeal to everyone involved in the mobile communications market needing to know how GSM and UMTS technologies evolved. The accompanying CD-ROM provides nearly 500 reference documents including reports of all standardisation plenary meetings, strategy documents, key decisions, the GSM Memorandum of Understanding and the report of the UMTS Task Force.

The Oxford Handbook of Language Policy and Planning James W. Tollefson, Miguel Pérez-Milans, 2018-05-07 This handbook provides a state-of-the-art account of research in language policy and planning (LPP). Through a critical examination of LPP, the handbook offers new direction for a field in theoretical and methodological turmoil as a result of the socio-economic, institutional, and discursive processes of change taking place under the conditions of late modernity. Late modernity refers to the widespread processes of late capitalism leading to the selective privatization of services (including education), the information revolution associated with rapidly changing statuses and functions of languages, the weakening of the institutions of nation-states (along with the strengthening of non-state actors), and the fragmentation of overlapping and competing identities associated with new complexities of language-identity relations and new forms of multilingual language use. As an academic discipline in the social sciences, LPP is fraught with tensions between these processes of change and the still-powerful ideological framework of modern nationalism. It is an exciting and energizing time for LPP research. This handbook propels the field forward, offering a dialogue between the two major historical trends in LPP associated with the processes of modernity and late modernity: the focus on continuity behind the institutional policies of the modern nation-state, and the attention to local processes of uncertainty and instability across different settings resulting from processes of change. The handbook takes great strides toward overcoming the long-standing division between top-down and bottom-up analysis in LPP research, setting the stage for theoretical and methodological innovation. Part I defines alternative theoretical and conceptual frameworks in LPP, emphasizing developments since the ethnographic turn, including: ethnography in LPP; historical-discursive approaches; ethics, normative theorizing, and transdisciplinary methods; and the renewed focus on socio-economic class. Part II examines LPP against the background of influential ideas about language shaped by the institutions of the nation-state, with close attention to the social position of minority languages and specific communities facing profound language policy challenges. Part III investigates the turmoil and tensions that currently characterize LPP research under conditions of late modernity. Finally, Part IV presents an integrative summary and directions for future LPP research.

Warhol-isms Andy Warhol, 2022-05-10 A unique collection of brilliant quotations from the legendary pop artist One of the most influential artists of his time and ours, Andy Warhol is nearly as renowned for what he said as for what he did. Indeed, he is so quotable that things he never said are endlessly and plausibly attributed to him, including, fittingly, the most celebrated fake Warhol saying—"In the future, everyone will be world-famous for 15 minutes." Warhol-isms separates legend from fact to present a unique and comprehensive collection of authentic quotations from the pop artist. Gathered from interviews and other primary sources, these deadpan, droll, ironic, and sincere gems—in which a superficial embrace of superficiality often disguises provocative, unconventional ideas—provide compelling insights into the life and work of an artist who has left an indelible mark on art and popular culture. Select quotations from the book: I think an artist is anybody who does something well.I went to [a psychiatrist] once, and he never called me back.They always say that time changes things, but you actually have to change them yourself.I've never met a person I couldn't call a beauty.New things are always better than old things.I'm still a commercial artist. I was always a commercial artist.
