**Gallows Rock** Yrsa Sigurdardottir, 2020-07-23 'Iceland's outstanding crime novelist' Daily Express On a jagged, bleak lava field just outside Reykjavik stands the Gallows Rock. Once a place of execution, it is now a tourist attraction. Until this morning, when a man was found hanging from it... The nail embedded in his chest proves it wasn't suicide. But when the police go to his flat, a further puzzle awaits: a four-year-old boy has been left there. He doesn't seem to have any link with the victim, his parents cannot be found, and his drawings show he witnessed something terrible. As detective Huldar hunts the killer, and child psychologist Freyja looks for the boy's parents, the mystery unfolds: a story of violence, entitlement, and revenge. Praise for Yrsa Sigurdardottir 'Iceland's outstanding crime novelist' Daily Express 'A magnificent writer' Karin Slaughter 'The undisputed queen of Icelandic Noir' Simon Kernick 'Believe all the hype - this is crime at its best' Heat NetGalley Reader Reviews 'Just as compelling as the previous books in the series. All of Yrsa Sigurðardóttir's books are extremely well written and a joy to read. There is plenty of suspense and twists in this story ( . . . ) I read this book in one sitting, I was unable to put it down. Highly recommended' 'There is such a skill to the author's writing, the way in which she creates tension and atmosphere and uses setting to bring and edge to the story, that it is difficult to put down. And she brings such a range of emotions out in me as a reader that I feel slightly battered myself when I finish reading . . . Truly powerful storytelling and characters I have come to love' 'I was hooked from the very first page and enthralled and completely drawn in throughout the book. ( . . . ) This is a story which builds and weaves perfectly. It's so twisty'

**Socrates** Paul Johnson,2012-11-27 “Spectacular . . . A delight to read.” —The Wall Street Journal From bestselling biographer and historian Paul Johnson, a brilliant portrait of Socrates, the founding father of philosophy In his highly acclaimed style, historian Paul Johnson masterfully disentangles centuries of scarce sources to offer a riveting account of Socrates, who is often hailed as the most important thinker of all time. Johnson provides a compelling picture of Athens in the fifth century BCE, and of the people Socrates reciprocally delighted in, as well as many enlightening and intimate analyses of specific aspects of his personality. Enchantingly portraying the sheer power of Socrates's mind, and its unique combination of steel, subtlety, and frivolity, Paul Johnson captures the vast and intriguing life of a man who did nothing less than supply the basic apparatus of the human mind.

**Algorithmic Trading with Interactive Brokers** Matthew Scarpino, 2019-09-03 Through Interactive Brokers, software developers can write applications that read financial data, scan for contracts, and submit orders automatically. Individuals can now take advantage of the same high-speed decision making and order placement that professional trading firms use. This book walks through the process of developing applications based on IB's Trader Workstation (TWS) programming interface. Beginning chapters introduce the fundamental classes and functions, while later chapters show how they can be used to implement full-scale trading systems. With an algorithmic system in place, traders don't have to stare at charts for hours on end. Just launch the trading application and let the TWS API do its work. The material in this book focuses on Python and C++ coding, so readers are presumed to have a basic familiarity with one of these languages. However, no experience in financial trading is assumed. If you're new to the world of stocks, bonds, options, and futures, this book explains what these financial instruments are and how to write applications capable of trading them.

**The New Evolution Diet** Arthur De Vany, 2011-12-20 Believe it or not, our DNA is almost exactly the same as that of our ancestors. While scientific advances in agriculture, medicine, and technology have protected man, to some degree, from dangers such as starvation, illness, and exposure, the fact remains that our cave-dwelling cousins were considerably healthier than we are. Our paleolithic ancestors did not suffer from heart disease, diabetes, high blood pressure, or obesity. In fact, a good deal of what we view as normal aging is a modern condition that is more akin to disease than any natural state of growing older. Our predecessors were incomparably better nourished than we are, and were incredibly physically fit. And certainly none of them ever craved a doughnut, let alone tasted one. In fact, the human preference for sweet tastes and fatty textures was developed in an environment where such treats were rare, and signaled dense, useful energy. This once-helpful adaptation is the downfall of many a dieter today. It's what makes it hard to resist fats and sweets, especially when they are all around us. We are not living as we were built to live. Our genes were forged in an environment where activity was mandatory—you were active or you starved or were eaten. This created strong selective pressure for genes encoding a smart, physically adept individual capable of very high activity levels. Humans are among the most active of species, and we carry energetically expensive brains to boot. Our energy expenditures rank high among all animals. At least they once did. The New Evolution Diet by Arthur De Vany, PhD is a roadmap back to the better health our ancestors once enjoyed. By eliminating modern foods, including carbohydrates, dairy, and all processed foods from our diets, we can undo much of the damage caused by our modern food environment. The plan is based on three simple principles: 1. Enjoy the pleasure of food and do not count or restrict calories. Eat three satisfying meals a day filled with non-starchy vegetables, fruits, and high-quality, lean proteins 2. Do not starve yourself, but do go hungry episodically, for brief periods, to promote a low fasting blood insulin level and increase metabolic fat-burning. 3. Exercise less, not more, but with more playfulness and intensity. The goal is to create a strong body with a high resting metabolism and a large physiologic capacity to move through life easily—not to burn calories.
