2006 Information and Communications for Development ,2006-01-01 The report is essential reading for policy makers, government workers, and academics pursuing the goal of equitable, sustainable development across the world. - N. R. Narayana Murthy, Chairman and Chief Mentor Infosys Technologies Ltd. Information and communication technology (ICT) is rapidly evolving, changing rich and poor societies alike. It has become a powerful tool for participating in the global economy and for offering new opportunities for development efforts. ICT can and should advance economic growth and reduce poverty in developing countries. It has been 20 years since the first telephone operator was privatized, a little over 10 since the World Wide Web emerged, and 5 since the telecommunications bubble burst. How have the ICT sector and its role in development evolved? What have we learned? How can we move forward? Information and Communications for Development 2006: Global Trends and Policies contains lessons from both developed and developing countries. It examines the roles of the public and private sectors, identifying the challenges and the benefits of adopting and expanding ICT use. The report assesses topics essential to building an information society, including investment, access, diffusion, and country policies and strategies. Assessing what has worked, what hasn't, and why, this report is an invaluable guide for understanding how to capture the benefits of ICT around the world.

Telematic Embrace Roy Ascott,2003 Annotation Telematic Embrace combines a provocative collection of writings from 1964 to the present by the preeminent artist and art theoretician Roy Ascott, with a critical essay by Edward Shanken that situates Ascott's work within a history of ideas in art, technology, and philosophy.

Green Communications and Networking F. Richard Yu,Xi Zhang,Victor C.M. Leung,2016-04-19 Green Communications and Networking introduces novel solutions that can bring about significant reductions in energy consumption in the information and communication technology (ICT) industry-as well as other industries, including electric power. Containing the contributions of leading experts in the field, it examines the latest research advances

Radical Media John D. H. Downing,2000-08-18 This is an entirely new edition of the author's 1984 study (originally published by South End Press) of radical media and movements. The first and second sections are original to this new edition. The first section explores social and cultural theory in order to argue that radical media should be a central part of our understanding of media in history. The second section weaves an historical and international tapestry of radical media to illustrate their centrality and diversity, from dance and graffiti to video and the internet and from satirical prints and street theatre to culture-jamming, subversive song, performance art and underground radio. The section also includes consideration of ultra-rightist media as a key contrast case. The book's third section provides detailed case studies of the anti-fascist media explosion of 1974-75 in Portugal, Italy's long-running radical media, radio and access video in the USA, and illegal media in the dissolution of the former Soviet bloc dictatorships.

ICT in Agriculture (Updated Edition) World Bank,2017-06-27 Information and communication technology (ICT) has always mattered in agriculture. Ever since people have grown crops, raised livestock, and caught fish, they have sought information from one another. Today, ICT represents a tremendous opportunity for rural populations to improve productivity, to enhance food and nutrition security, to access markets, and to find employment opportunities in a revitalized sector. ICT has unleashed incredible potential to improve agriculture, and it has found a foothold even in poor smallholder farms. ICT in Agriculture, Updated Edition is the revised version of the popular ICT in Agriculture e-Sourcebook, first launched in 2011 and designed to support practitioners, decision makers, and development partners who work at the intersection of ICT and agriculture. Our hope is that this updated Sourcebook will be a practical guide to understanding current trends, implementing appropriate interventions, and evaluating the impact of ICT interventions in agricultural programs.

Slowly Sudden Taj Keshavarz,2015-06-28 The dinner with Emma was a gift after the tense period in Budapest. While eating, I looked at her face as she was talking, animated, relaxed, laughing,

with short periods of seriousness. I wished I could take pictures in those moments, moments that I had missed, moments that I usually miss. I often thought about my pictures, what sort of photographer was I? A portrait photographer? A journalist? In that moment, thinking of taking pictures of her while she was eating, of the way she closed her eyes with each bite, and laughed under the calming light in the room, I considered myself a photographer of moods. Mark works in a current affairs magazine as a photographer. He spends his time bickering and philosophising with his friends. Young to middle aged, Mark and his friends pass their moments avoiding commitments, shunning what goes on around them. There are times to make decisions often made through no action. Responsibilities dissolve in comfort, and emotions seem to be foreign phenomena in their life under illusion of personal liberty. Can this all change?

The Virtual Community, revised edition Howard Rheingold,2000-10-23 Howard Rheingold tours the virtual community of online networking. Howard Rheingold has been called the First Citizen of the Internet. In this book he tours the virtual community of online networking. He describes a community that is as real and as much a mixed bag as any physical community—one where people talk, argue, seek information, organize politically, fall in love, and dupe others. At the same time that he tells moving stories about people who have received online emotional support during devastating illnesses, he acknowledges a darker side to people's behavior in cyberspace. Indeed, contends Rheingold, people relate to each other online much the same as they do in physical communities. Originally published in 1993, *The Virtual Community* is more timely than ever. This edition contains a new chapter, in which the author revisits his ideas about online social communication now that so much more of the world's population is wired. It also contains an extended bibliography.

Fetal Heart Rate Monitoring Freeman,Thomas J. Garite,Michael P. Nageotte,Lisa A. Miller,2012 Fetal heart rate monitoring is widely used by almost every obstetrician as a way to document the case and to help decrease health care costs. This is a short reference on the physiologic benefits, instrumentation, application and interpretation of fetal heart rate monitoring. The second half of the book uses actual FHR strips and cases to illustrate various anomalies (fetal distress, fetal distress in prematurity, fetus with CNS dysfunction). Several new drugs have been introduced for use during labor that effect FHR--Provided by publisher.

Toxic Loopholes Craig Collins,2010-03-08 The EPA was established to enforce the environmental laws Congress enacted during the 1970s. Yet today lethal toxins still permeate our environment, causing widespread illness and even death. *Toxic Loopholes* investigates these laws, and the agency charged with their enforcement, to explain why they have failed to arrest the nation's rising environmental crime wave and clean up the country's land, air and water. This book illustrates how weak laws, legal loopholes and regulatory negligence harm everyday people struggling to clean up their communities. It demonstrates that our current system of environmental protection pacifies the public with a false sense of security, dampens environmental activism, and erects legal barricades and bureaucratic barriers to shield powerful polluters from the wrath of their victims. After examining the corrosive economic and political forces undermining environmental law making and enforcement, the final chapters assess the potential for real improvement and the possibility of building cooperative international agreements to confront the rising tide of ecological perils threatening the entire planet.

A Small Dose of Toxicology Steven G. Gilbert,2004-02-18 Everyday, we come into contact with many relatively harmless substances that could, at certain concentrations, be toxic. This applies not only to obvious candidates such as asbestos, lead, and gasoline, but also to compounds such as caffeine and headache tablets. While the field of toxicology has numerous texts devoted to aspects of biology, chemis

Working with Smallholders International Finance Corporation,2023-11-01 Smallholder farmers are the stewards of more than 80 percent of the world's farms. These small family businesses produce about one-third of the world's food. In Africa and Asia, smallholders dominate the production of food crops, as well as export commodities such as cocoa, coffee, and cotton. However, smallholders and farm workers remain among the poorest segments of the population, and they are on the frontline of climate change. Smallholder farmers face constraints in accessing inputs, finance, knowledge, technology, labor, and markets. Raising farm-level productivity in a sustainable way is a key development priority. Agribusinesses are increasingly working with smallholder farmers in low- and middle-income countries to secure agricultural commodities. More productive smallholders boost rural incomes and economic growth, as well as reduce poverty. Smallholders also represent a growing underserved market for farm inputs, information, and financial services. *Working with Smallholders: A Handbook for Firms Building Sustainable Supply Chains* (third edition) shows agribusinesses how to engage more effectively with smallholders and to develop sustainable, resilient, and productive supply chains. The book compiles practical solutions and cutting-edge ideas to overcome the challenges facing smallholders. This third edition is substantially revised from the second edition and incorporates new material on the potential for digital technologies and sustainable farming. This handbook is written principally to outline opportunities for the private sector. The content may also be useful to the staffs of governmental or nongovernmental development programs working with smallholders, as well as to academic and research institutions.

Green Networking Francine Krief,2012-12-13 This book focuses on green networking, which is an important topic for the scientific community composed of engineers, academics, researchers and industrialists working in the networking field. Reducing the environmental impact of the communications infrastructure has become essential with the ever increasing cost of energy and the need for reducing global CO2 emissions to protect our environment. Recent advances and future directions in green networking are presented in this book, including energy efficient networks (wired networks, wireless networks, mobile networks), adaptive networks (cognitive radio networks, green autonomic networking), green terminals, and industrial research into green networking (smart city, etc.).

Global Corruption Report 2001 Robin Hodess,Jessie Banfield,Toby Wolfe,2001 The Global Corruption Report 2001 is the new annual publication of Transparency International, the leading global anti-corruption NGO. By providing an overview of the state of corruption around the globe, the Global Corruption Report fills a significant gap in the existing literature. It assembles news and analysis on corruption and the fight against it around the world, highlighting international and regional trends, and significant instances of reform. It also reveals the links between global, regional and national developments in the corruption field, and does so from the independent perspective of an NGO. The book includes reports by leading experts on topical issues such as political party funding, money laundering, and corruption in international sport, exploring in particular the global nature of these themes. It also contains 12 regionally-focused reports, written by journalists from around the world. The report's final data and research section delivers a unique survey of the contemporary corruption and anti-corruption research terrain, with contributions from a range of IGOs, NGOs, the private sector, and academics. It also contains TI's own well-known Corruption Perceptions Index (CPI). The Global Corruption Report is a must have publication for policy-makers, business people, lawyers, journalists, academics, and anti-corruption activists the world over.

The Anarchist Cookbook William Powell,2018-02-05 The Anarchist Cookbook will shock, it will disturb, it will provoke. It places in historical perspective an era when Turn on, Burn down, Blow up are revolutionary slogans of the day. Says the author This book... is not written for the members of

fringe political groups, such as the Weatherman, or The Minutemen. Those radical groups don't need this book. They already know everything that's in here. If the real people of America, the silent majority, are going to survive, they must educate themselves. That is the purpose of this book. In what the author considers a survival guide, there is explicit information on the uses and effects of drugs, ranging from pot to heroin to peanuts. There i detailed advice concerning electronics, sabotage, and surveillance, with data on everything from bugs to scramblers. There is a comprehensive chapter on natural, non-lethal, and lethal weapons, running the gamut from cattle prods to sub-machine guns to bows and arrows.

Knowledge for a Sustainable World Tor Halvorsen,Hilde Ibsen,2015-12-07 The search for answers to the issue of global sustainability has become increasingly urgent. In the context of higher education, many universities and academics are seeking new insights that can shift our dependence on ways of living that rely on the exploitation of so many and the degradation of so much of our planet. This is the vision that drives SANORD and many of the researchers and institutions within its network. Although much of the research is on a relatively small scale, the vision is steadily gaining momentum, forging dynamic collaborations and pathways to new knowledge. The contributors to this book cover a variety of subject areas and offer fresh insights about chronically under-researched parts of the world. Others document and critically reflect on innovative approaches to cross-continental teaching and research collaborations. This book will be of interest to anyone involved in the transformation of higher education or the practicalities of cross-continental and cross-disciplinary academic collaboration. The Southern African-Nordic Centre (SANORD) is a network of higher education institutions from Denmark, Finland, Iceland, Norway, Sweden, Botswana, Namibia, Malawi, South Africa, Zambia and Zimbabwe. Universities in the southern African and Nordic regions that are not yet members are encouraged to join.

Earth Matters Pamela Wasserman,1998 This teacher's guide helps students explore the connection between human population growth and the well-being of the planet. Twelve readings and 34 activities introduce high school students to global society and environmental issues such as climate change, biodiversity loss, gender equality, economics, poverty, energy, wildlife endangerment, waste disposal, food and hunger, water resources, air pollution, deforestation, and population dynamics. Teaching strategies include role playing simulations, laboratory experiments, problem-solving challenges, and mathematical exercises, cooperative learning projects, research, and discussion. These activities were designed to develop a number of student skills including critical thinking, research, public speaking, writing, data collection and analysis, cooperation, decision making, creative problem solving, reading comprehension, conflict resolution and values clarification. Each chapter and activity can be used alone to illustrate points or be inserted into existing curriculum. Activity subject areas are listed along with a quick list reference of the summary of activities. A reference guide of activities linked to National Standards is also included. Contains suggested resources, including books, periodicals, audiovisuals, hardbooks and wall charts, software, and internet sites, for each topic area. (SJR)
