Sustainable Tourism Policy and Planning in Africa Emmanuel Akwasi Adu-Ampong,Albert Nsom Kimbu,2020-12-17 Sustainable Tourism Policy and Planning in Africa offers an accessible and understandable overview of the challenges of integrating sustainability into tourism policy and planning in Sub-Saharan Africa and provides some interesting recommendations on how these could be overcome. Tourism is currently growing faster in Sub-Saharan Africa (SSA) and in many other developing regions compared to the rest of the world. Using case examples from different segments of the tourism sector in different country contexts, this volume therefore reassesses context specific tourism policies and planning mechanisms in SSA over the years. It considers how the increasing focus on sustainability is reflected in different areas of the tourism sector including food security, the human capacity management, service delivery, local communities and heritage management, climate change and the influence of colonial legacies on tourism policy planning. For many SSA countries, it has only been in the last two decades that the development of sustainable and achievable context specific policies and planning mechanisms has become the norm. The chapters provide examples of how different dimensions of sustainability are integrated into tourism policy and practice, and examine the extent to which these are shaping the present, and their implications for the future sustainability of the tourism sector. Sustainable Tourism Policy and Planning in Africa will be of great value to academics, private and third sector employees to better understand tourism in Sub-Saharan Africa. Eight of the chapters were originally published as a special issue of Tourism Planning and Development. These are now complimented with a new introductory chapter and a concluding chapter that sets out a future research agenda for sustainable tourism policy and planning.

Strengthening Road Safety Legislation World Health Organization,2013 This manual describes methods and resources for practitioners and decision-makers to use for enacting new laws or regulations or amending existing ones as part of a comprehensive road safety strategy. The manual covers steps to be taken to address five main risk factors and post-crash care. It can therefore be used to: \* develop an understanding of the framework of legislation and relevant processes that are applicable in a country \* review current national legislation and regulations and identify gaps that hinder implementation and enforcement of effective road safety measures \* identify available resources, including international agreements, evidence-based guidance and recommendations on effective measures, to improve legislation \* prepare action plans to strengthen national legislation and regulations for the five main risk factors and for post-crash care, including advocating for improvement. Other important topics should also be addressed to achieve a comprehensive national system of road safety legislation and regulation; however, they are beyond the scope of this manual. They include: vehicle and helmet manufacturing standards and testing, third-party insurance, victim's rights and compensation, a graduated driver licensing system, road audits and design standards and driving hours for commercial drivers.

**Tourism and National Parks** Stephen W. Boyd,Richard W. Butler,2000-06-22 Tourism and National Parks Issues and Implications Edited by Richard W. Butler, Professor of Tourism, School of Management Studies, University of Surrey, UK and Stephen W. Boyd, Senior Lecturer in the Geography Division, Staffordshire University, UK. National Parks have played a significant role as tourist attractions in many countries since their establishment in the nineteenth century. In some countries they are the major set of tourist attractions and the foundation of small

but often important tourism industries. Despite this, the relationship between tourism and national parks is not always a satisfactory one, and there is often considerable and vocal opposition to the continuance, and particularly expansion of, tourism in many national parks. The key focus of this book is the special relationship between national parks and tourism - how national park systems relate to tourism in a variety of contexts - from the historical development through to the role that they play today. International contributions from leading thinkers in the area raise issues such as, park origins and functions, management issues and future problems.
