**Emergency** Stanley Stewart,2012-05-01 Emergency is a collection of true stories about events where disaster seems imminent. Yet each situation is concluded without loss of life thanks to the skill of the pilots and their crews, whose bravery and resourcefulness have earned them well-deserved commendations. Written by a British Airways First Officer, Stanley Stewart, who has spoken at first hand with the pilots

and crews involved in all the incidents recorded here, the book offers a unique insight into what really happened: not the passengers eye-view, which in many cases is already documented, but the view from the flight deck of the aircraft itself.

**Neutron Scattering** ,2013-11-22 This work covers in some detail the application of neutron scattering to different fields of physics, materials science, chemistry, biology, the earth sciences and engineering. Its goal is to enable researchers in a particular area to identify aspects of their work in which neutron scattering techniques might contribute, conceive the important experiments to be done, assess what is required to carry them out, write a successful proposal for one of the major user facilities, and perform the experiments under the guidance of the appropriate instrument scientist. The authors of the various chapters take account of the advances in experimental techniques over the past 25 years--for example, neutron reflectivity and spin-echo spectroscopy and techniques for probing the dynamics of complex materials and biological

systems. Furthermore, with the third-generation spallation sources recently constructed in the United States and Japan and in the advanced planning stage in Europe, there is an increasing interest in time-of-flight techniques and short wavelengths. Correspondingly, the improved performance of cold moderators at both reactors and spallation sources has extended the long-wavelength capabilities. Chapter authors are pre-eminent in their field Seminal experiments are presented as examples Provides guidance on how to plan, execute and analyse experiments
