Handbook of Research in Social Studies Education Linda S. Levstik,Cynthia A. Tyson,2010-04-15 This Handbook outlines the current state of research in social studies education – a complex, dynamic, challenging field with competing perspectives about appropriate goals, and on-going conflict over the content of the curriculum. Equally important, it encourages new research in order to advance the field and foster civic competence; long maintained by advocates for the social studies as a fundamental goal. In considering how to organize the Handbook, the editors searched out definitions of social studies, statements of purpose, and themes that linked (or divided) theory, research, and practices and established criteria for topics to include. Each chapter meets one or more of these criteria: research activity since the last Handbook that warrants a new analysis, topics representing a major emphasis in the NCSS standards, and topics reflecting an emerging or reemerging field within the social studies. The volume is organized around seven themes: Change and Continuity in Social Studies Civic Competence in Pluralist Democracies Social Justice and the Social Studies Assessment and Accountability Teaching and Learning in the Disciplines Information Ecologies: Technology in the Social Studies Teacher Preparation and Development The Handbook of Research in Social Studies is a must-have resource for all beginning and experienced researchers in the field.

<u>U.S. Conflicts in the 21st Century [3 volumes]</u> Spencer C. Tucker,2015-12-14 This three-volume reference work provides an up-to-date presentation and analysis of the U.S. wars of the 21st century, addressing their backgrounds, causes, courses, and consequences. It serves as an indispensable resource for students seeking to understand the role of the United States in the world today. Addressing the U.S. conflicts in Iraq, Afghanistan, and the Global War on Terror from the year 2001 to the present, this comprehensive, three-volume encyclopedia covers the significant individuals, key events, and important places involved in these recent military events. Beginning with the rise of Al Qaeda in the 1990s and the attacks on September 11, 2001, and covering events through ISIS's dramatic surge in Iraq and Syria, the hundreds of detailed entries also examine historical trends; nations and ethnicities involved in the conflicts; influential figures and organizations; economic, political, diplomatic, and cultural influences; wars, campaigns, and battles; and important weapons systems. The set's A–Z organization makes it an easy-to-use ready reference for high school and college students. Perspective essays on several controversial topics—such as the use of torture and the effects of the Patriot Act—serve to inspire readers to apply critical thinking. A detailed chronology is provided to help students place all the important events that have occurred in the Afghanistan War, Iraq War, and War on Terror. Each of the chronologically arranged primary documents is introduced with a brief overview to provide important background information and context.

Literate Education in the Hellenistic and Roman Worlds Teresa Morgan,1998 This book offers an assessment of the content, structures and significance of education in Greek and Roman society. Drawing on a wide range of evidence, including the first systematic comparison of literary sources with the papyri from Graeco-Roman Egypt, Teresa Morgan shows how education developed from a loose repertoire of practices in classical Greece into a coherent system spanning the Hellenistic and Roman worlds. She examines the teaching of literature, grammar and rhetoric across a range of social groups and proposes a model of how the system was able both to maintain its coherence and to accommodate pupils' widely different backgrounds, needs and expectations. In addition Dr Morgan explores Hellenistic and Roman theories of cognitive development, showing how educationalists claimed to turn the raw material of humanity into good citizens and leaders of society.

Handbook of Teen and Novice Drivers Donald L Fisher,Jeff Caird,William Horrey,Lana Trick,2016-09-19 Despite a growing body of research and targeted remediation, teenage and novice drivers continue to be six to nine times more likely to die in a crash than they are when they are just a few years older. Social learning towards a sustainable world Arjen E.J. Wals,2023-08-28 This comprehensive volume - containing 27 chapters and contributions from six continents - presents and discusses key principles, perspectives, and practices of social learning in the context of sustainability. Social learning is explored from a range of fields challenged by sustainability including: organizational learning, environmental management and corporate social responsibility; multi-stakeholder governance; education, learning and educational psychology; multiple land-use and integrated rural development; and consumerism and critical consumer education. An entire section of the book is devoted to a number of reflective case studies of people, organizations and communities using forms of social learning in moving towards sustainability. 'This book brings together a range of ideas, stories, and discussions about purposeful learning in communities aimed at creating a world that is more sustainable than the one currently in prospect. ...The book is designed to expand the network of conversations through which our society can confront various perspectives, discover emerging patterns, and apply learning to a variety of emotional and social contexts.' From the Foreword by Fritjof Capra, co-founder of the Center of Ecoliteracy. 'Joining what is so clear and refreshing in this book with the larger movements toward a critically democratic and activist education that is

worthy of its name, is but one step in the struggle for sustainability. But it is an essential step if we are to use the insights that are included in this book.' From the Afterword by Michael Apple, author of 'Educating the Right Way: Markets, Standards, God, and Inequality'.

Going to School in East Asia Gerard Postiglione,Jason Tan,2007-09-30 Education in east Asia varies widely, due to the cultural and political histories of each country. The communist governments of China, North Korea, and Vietnam mandate schooling differently from the limited democracy of Hong Kong and the parliamentary government of Japan. The history of the educational philosophies, systems, and curricula of seventeen East Asian countries are described here, with a timeline highlighting educational developments, and a special day in the life feature, a personal account of what it is like for a student to attend school in that country.

The Socratic Method Today Lee Trepanier,2017-12-14 This exciting new textbook provides a sophisticated examination of the Socratic method for teaching political science students in higher education. It shows how the Socratic method is employed in the Platonic dialogs, compares its transformative approach to other student-centered teaching philosophies, and addresses the challenges of adopting the Socratic method in the contemporary classroom. The book is divided into three sections that integrate these practical aspects on the Socratic method with the theoretical considerations of Socratic philosophy while also addressing contemporary concerns about teaching and learning in higher education. Section One explores how the Socratic method is portrayed by Socrates in Plato's dialogs. Section Two compares the Socratic method with modern and contemporary accounts of teaching and learning. Section Three examines some of the contemporary challenges of practicing the Socratic method in the university classroom today and how teachers can overcome them. Written in a clear and engaging style, this timely intervention is essential reading for upper undergraduate students enrolled in courses that specialize in pedagogical techniques, political theory, Socratic philosophy, and law.
