Lakeview Arkansas Emmanuel E. Egar, 2019-08-01 Lakeview is a beautiful town that is both unique and even peculiar. Unique because the town has no name. And yet, it has a name that it draws from the lake. Peculiar because of that funny synergy that unites the town and the lake. Without this curious synergy, the town would not exist. Yet without it, the lake would not exist. How do we separate the lake from the town or the town from the lake without inflicting mutual damage to both? This reminds us of that beauty from W.B. Yeats: How can we know the dancer from the dance?

Egar Allan Poe Letters Till Now Unpublished Edgar Allan Poe, 1925

The Rhetorical Implications of Chinua Achebe's *Things Fall Apart* Emmanuel Edame Egar, 2000 In *Things Fall Apart*, Chinua Achebe articulates and dramatizes a unique and peculiar kind of rhetoric- a rhetoric that emphasizes that man, and not language, is the site for social interaction. The oracle and the bull are synthesized, metamorphosed, laced, and condensed to form an alchemy which produces a cohesive communal community as the end result. This African rhetoric displays a language that is innocent, unlike the Western European rhetoric where language dramatizes multiple voices. This critical text focuses on Achebe's rhetoric from the Aristotelian style.

Black Women Poets of Harlem Renaissance Emmanuel Edame Egar, 2003 *Black Women Poets of Harlem Renaissance* presents a critical examination of the creative poetic achievements of five women writers during the Harlem Renaissance.

Investment Opportunity George B. Harpole, Ed M. Williston, Hiram Y. Hallock, 1979 A model of present-day computer-controlled sawmilling technology is modified for the manufacture of any desired width of EGAR dimension lumber from small logs. EGAR lumber is manufactured via headrig production of 2-inch-thick flitches which are in turn dried, edged full width, edge-glued, and gang-novelty-ripped to wide widths(EGAR). The EGAR system is compared to the unmodified version of the same computer-controlled sawmill. Both systems appear to be good investment opportunities; however, the 12 to 13 percent increase in lumber recovery gained by the EGAR system does not justify the additional investment required unless the EGAR sawmill is used to increase the amount of wide width dimension (2- by 10-in. and wider). Economic advantage of the EGAR system increases as the cost of roundwood increases relative to lumber prices. (Author).
