Elements of Military Art and Science H. Halleck,Stephen Ashley,2013-01-18 ELEMENTS OF MILITARY ART AND SCIENCE. Course Of Instruction In Strategy, Fortification, Tactics Of Battles. Military Tactics, Strategy, Art and Science to 1865. Military tactics, the science and art of organizing a military force, are the techniques for using weapons or military units in combination for engaging and defeating an enemy in battle. Changes in philosophy and technology over time have been reflected in changes to military tactics. In current military thought, tactics are the lowest of three planning levels. The highest tier of planning is the strategy, which is about how force is translated into political objectives, or more specifically how you bridge the means and ends of war together. An intermediate level, which converts strategy into tactics is the operational level that deals with formations of units. In common vernacular, tactical decisions are those made to achieve greatest immediate value and strategic decisions are those made to achieve the greatest overall value irrespective of immediate return. Learn how battles where fought and WHY they where fought that way by examining the minds behind the decisions.

Elements of Military Art and Science H. Wager Halleck,2015-07-23 Excerpt from Elements of Military Art and Science: Or, Course of Instruction in Strategy, Fortification, Tactics of Battles, & Embracing the Duties of Staff, Infantry, Cavalry, Artillery, and Engineers The following pages were hastily thrown together in the form of lectures, and delivered, during the past winter, before the Lowell Institute of Boston. They were written without the slightest intention of ever publishing them; but several officers of militia, who heard them delivered, or afterwards read them in manuscript, desire their publication, on the ground of their being useful to a class of officers now likely to be called into military service. It is with this view alone that they are placed in the hands of the printer. No pretension is made to originality in any part of the work; the sole object having been to embody, in a small compass, well established military principles, and to illustrate these by reference to the events of past history, and the opinions and practice of the best generals. Small portions of two or three of the following chapters have already appeared, in articles furnished by the author to the New York and Democratic Reviews, and in a Report on the Means of National Defence, published by order of Congress. Elements of Military Art and Science H. Wager Halleck,2017-03-14 Elements of Military Art and Science Course of Instruction in Strategy, Fortification, Tactics of Battles Military Tactics, Strategy, Art and Science to 1865 COURSE OF INSTRUCTION IN STRATEGY, FORTIFICATION & TACTICS OF BATTLES By H. Wager Halleck, A.M., Major General, U.S.A. Henry Wager Halleck (January 16, 1815 - January 9, 1872) was a United States Army officer, scholar, and lawyer. A noted expert in military studies, he was known by a nickname that became derogatory, Old Brains. He was an important participant in the admission of California as a state and became a successful lawyer and land developer. Halleck served as General-in-Chief of all Union armies during the American Civil War. All modern ethical writers regard unjust war as not only immoral, but as one of the greatest of crimes-murder on a large scale. Such are all wars of mere ambition, engaged in for the purpose of extending regal power or national sovereignty; wars of plunder, carried on from mercenary motives; wars of propagandism, undertaken for the unrighteous end of compelling men to adopt certain religious or political opinions, whether from the alleged motives of introducing a more orthodox religion, or of extending the area of freedom. Such wars are held in just abhorrence by all moral and religious people: and this is believed to be the settled conviction of the great mass of our own citizens. But in addition to that respectable denomination of Christians who deny our right to use arms under any circumstances, there are many religious enthusiasts in other communions who, from causes already noticed, have adopted the same theory, and hold all wars, even those in self-defence, as unlawful and immoral. This opinion has been, within the last few years, pressed on the public with great zeal and eloquence, and many able pens have been enlisted in its cause. One of the most popular, and by some regarded one of the most able writers on moral science, has adopted this view as the only one consonant with the principles of Christian morality.
