*The Elephant Keeper* Margriet Ruurs, 2017-10-03 In 14-year-old Aaron's village in Zambia, poaching for ivory is common practice, and elephants are feared because of the danger they pose to humans and the damage they often cause to crops so important to the villagers' livelihoods. But when Aaron encounters a newborn elephant in distress, his instinct is not to run away, but to jump to its rescue. This is the beginning of a beautiful bond of friendship and a meaningful vocation. This moving story, written by Margriet Ruurs and stunningly illustrated by Pedro Covo, is inspired by the true story of Aaron and Zambezi - a teenage Zambian boy and an orphaned baby elephant that was rescued from a swimming pool at a holiday lodge. Aaron had been a casual laborer, just trying to make enough money to support his family, but when gamekeepers noticed his natural ability to care for animals, he was offered a job as an elephant keeper at the Lilayi Elephant Nursery, where he still works to this day. Zambezi was

only one month old when he was found nearly drowning in a holiday lodge swimming pool. His mother had been killed by poachers and he'd been separated from his herd. Severely dehydrated, he'd tried to drink from the pool and had fallen in. Now Zambezi is nearly 6 years old and is doing very well. This unique informational picture book for middle-graders includes three non-fiction spreads, which provide intervals in the story and opportunities for classroom discussions. These spreads feature photos as well as information about elephants, poaching and the amazing work that is done at an elephant orphanage. At the end of the book there are suggestions for ways readers can help the cause.--

**Elephant Seals** Burney J. Le Beouf, Richard M. Laws, 2023-11-10 The largest of all seals, elephant seals rank among the most impressive of marine mammals. They are renowned for their spectacular recovery from near-extinction at the end of the nineteenth century when seal hunters nearly eliminated the entire northern species. No other vertebrate has come so close to extinction and made such a complete recovery. The physiological extremes that elephant seals can tolerate are also remarkable: females fast for a month while lactating, and the largest breeding males fast for over one hundred days during the breeding seasons, at which times both sexes lose forty percent of their body weight. Elephant seals dive constantly during their long foraging migrations, spending more time under water than most whales and diving deeper and longer than any other marine mammal. This first book-length discussion of elephant seals brings together worldwide expertise from scientists who describe and debate recent research, including the history and status of various populations, their life-history tactics, and other findings obtained with the help of modern microcomputer diving instruments attached to free-ranging seals. Essential for all marine mammalogists for its information and its methodological innovations, *Elephant Seals* will

also illuminate current debates about species extinctions and possible means of preventing them.
