The Home Edit Clea Shearer, Joanna Teplin, 2019-03-19 NEW YORK TIMES BESTSELLER • From the stars of the Netflix series *Get Organized with The Home Edit* (with a serious fan club that includes Reese Witherspoon, Gwyneth Paltrow, and Mindy Kaling), here is an accessible, room-by-room guide to establishing new order in your home. “A master class on how to arrange even your

most unattractive belongings—and spaces—in an aesthetically pleasing and easy-to-navigate way.”—Glamour (10 Books to Help You Live Your Best Life) Believe this: every single space in your house has the potential to function efficiently and look great. The mishmash of summer and winter clothes in the closet? Yep. Even the dreaded junk drawer? Consider it done. And the best news: it’s not hard to do—in fact, it’s a lot of fun. From the home organizers who made their orderly eye candy the method that everyone swears by comes Joanna and Clea’s signature approach to decluttering. The Home Edit walks you through paring down your belongings in every room, arranging them in a stunning and easy-to-find way (hello, labels!), and maintaining the system so you don’t need another do-over in six months. When you’re done, you’ll not only know exactly where to find things, but you’ll also love the way it looks. A masterclass and look book in one, The Home Edit is filled with bright photographs and detailed tips, from placing plastic dishware in a drawer where little hands can reach to categorizing pantry items by color (there’s nothing like a little ROYGBIV to soothe the soul). Above all, it’s like having your best friends at your side to help you turn the chaos into calm. Includes a link to download and print the labels from a computer (you will need 8-1/2

x 11-inch clear repositionable sticker project paper, such as Avery 4397).

The Mark Edyth Bulbring, 2016-12-16 Sarah Lotz, internationally acclaimed author of The Three, and Day Four, describes The Mark as: An entrancing, truly original novel packed with twists you won't see coming and a heroine that breaks the

mould. Unputdownable. In the future, the world has flipped. Ravaged by the Conflagration, the State of Mangeria is a harsh place where the sun beats down, people's lives are run by a heartless elite and law is brutally enforced. A mark at the base of the spine controls each person's destiny. The Machine decides what work you will do and who your life partner will be. Juliet Seven - Ettie - will soon turn 15 and her life as a drudge will begin, her fate-mate mate will be chosen. Like everyone else, her future is marked by the numbers on her spine. But Ettie decides to challenge her destiny. And in so doing, she fulfills the prophecy that was spoken of before she even existed.

Modern Folk Devils Martin Demant Frederiksen, Ida Harboe Knudsen, 2021-12-13 The devilish has long been integral to myths, legends, and folklore, firmly located in the relationships between good and evil, and selves and others. But how are ideas of evil constructed in current times and framed by contemporary social discourses? *Modern Folk Devils* builds on and works with Stanley Cohen's theory on folk devils and moral panics to discuss the

constructions of evil. The authors present an array of case-studies that illustrate how the notion of folk devils nowadays comes into play and animates ideas of otherness and evil throughout the world. Examining current fears and perceived threats, this volume investigates and analyzes how and why these devils are constructed. The chapters discuss how the devilish may take on many different forms: sometimes they exist only as a potential threat, other times they are a single individual or phenomenon or a visible group, such as refugees, technocrats, Roma, hipsters, LGBT groups, and rightwing politicians. Folk devils themselves are also given a voice to offer an essential complementary perspective on how panics become exaggerated, facts distorted, and problems acutely angled. Bringing together researchers from anthropology, sociology, political studies, ethnology, and criminology, the contributions examine cases from across the world spanning from Europe to Asia and Oceania.

A Companion to Psychological Anthropology Conerly

leading scholars in the field Offers an in-depth exploration of the concepts and topics that have emerged through contemporary ethnographic work and the processes of global change Key issues range from studies of consciousness and time, emotion, cognition, dreaming, and memory, to the lingering effects of racism and ethnocentrism, violence, identity and subjectivity

Science and Religion Paul Kurtz, 2013-06-24 In recent years a noticeable trend toward harmonizing the distinct worldviews of science and religion has become increasingly popular. Despite marked public interest, many leading scientists remain skeptical that there is much common ground between scientific knowledge and religious belief. Indeed, they are often antagonistic. Can an accommodation be reached after centuries of conflict? In this stimulating collection of articles on the subject, Paul Kurtz, with the assistance of Barry Karr and Ranjit Sandhu, have assembled the thoughts of scientists from various disciplines. Among the distinguished contributors are Sir Arthur C. Clarke (author of 2001: A Space Odyssey, and numerous other works of science fiction); Nobel Prize Laureate Steven Weinberg (professor of physics at the University of Texas at Austin); Neil deGrasse Tyson (Princeton University astrophysicist and director of the Hayden Planetarium);

James Lovelock (creator of the Gaia hypothesis); Kendrick Frazier (editor of the *Skeptical Inquirer*); Steven Pinker (professor of psychology at MIT); Richard Dawkins (zoologist at Oxford University); Eugenie Scott (physical anthropologist and executive director of the National Center for Science Education); Owen Gingerich (professor of astronomy at Harvard University); Martin Gardner (prolific popular science writer); the late Richard Feynman (Nobel Prize-winning physicist) and Stephen Jay Gould (professor of geology at Harvard University); and many other eminent scientists and scholars. Among the topics discussed are the Big Bang and the origin of the universe, intelligent design and creationism versus evolution, the nature of the soul, near-death experiences, communication with the dead, why people do or do not believe in God, and the relationship between religion and ethics.

The Pacific Northwest Raymond D. Gastil,Barnett

Singer,2010-04-23 The Pacific Northwest—for the purposes of this book mostly Oregon and Washington—has sometimes been seen as lacking significant cultural history. Home to idyllic environmental wonders, the region has been plagued by the notion that the best and brightest often left in search of greater things, that the mainstream world was thousands of miles away—or at least as far south as California. This book describes the Pacific Northwest’s search for a regional identity from the first Indian-European contacts through the late twentieth century, identifying those individuals and groups “who at least struggled to give meaning to the Northwest experience.” It places particular emphasis on writers and other celebrated individuals in the arts, detailing how their lives and works both reflected the region and also enhanced its sense of

self.

and Solanaceae. The various methods applicable to these species
are described in detail. Each chapter contains critical evaluation of
the scientific literature and an extensive list of references. This
