Peer-to-Peer Andy Oram,2001-02-26 The term peer-to-peer has come to be applied to networks that expect end users to contribute their own files, computing time, or other resources to some shared project. Even more interesting than the systems' technical underpinnings are their socially disruptive potential: in various ways they return content, choice, and control to ordinary users. While this book is mostly about the technical promise of peer-to-peer, we also talk about its exciting social promise. Communities have been forming on the Internet for a long time, but they have been limited by the flat interactive qualities of email and Network newsgroups. People can exchange recommendations and ideas over these media, but have great difficulty commenting on each other's postings, structuring information, performing searches, or creating summaries. If tools provided ways to organize information intelligently, and if each person could serve up his or her own data and retrieve others' data, the possibilities for collaboration would take off. Peer-to-peer technologies along with metadata could enhance almost any group of people who share an interest-technical, cultural, political, medical, you name it. This book presents the goals that drive the developers of the best-known peer-to-peer systems, the problems they've faced, and the technical solutions they've found. Learn here the essentials of peer-to-peer from leaders of the field: Nelson Minar and Marc Hedlund of target=new>Popular Power, on a history of peer-to-peer Clay Shirky of acceleratorgroup, on where peer-to-peer is likely to be headed Tim O'Reilly of O'Reilly & Associates, on redefining the public's perceptions Dan Bricklin, cocreator of Visicalc, on harvesting information from end-users David Anderson of SETI@home, on how SETI@Home created the world's largest computer Jeremie Miller of Jabber, on the Internet as a collection of conversations Gene Kan of Gnutella and GoneSilent.com, on lessons from Gnutella for peer-to-peer technologies Adam Langley of Freenet, on Freenet's present and upcoming architecture Alan Brown of Red Rover, on a deliberately low-tech content distribution system Marc Waldman, Lorrie Cranor, and Avi Rubin of AT&T Labs, on the Publius project and trust in distributed systems Roger Dingledine, Michael J. Freedman, and David Molnar of Free Haven, on resource allocation and accountability in distributed systems Rael Dornfest of O'Reilly Network and Dan Brickley of ILRT/RDF Web, on metadata Theodore Hong of Freenet, on performance Richard Lethin of Reputation Technologies, on how reputation can be built online Jon Udell of BYTE and Nimisha Asthagiri and Walter Tuvell of Groove Networks, on security Brandon Wiley of Freenet, on gateways between peer-to-peer systems You'll find information on the latest and greatest systems as well as upcoming efforts in this book.

School Leadership and Education System Reform Peter Earley, Toby Greany, 2017-01-12 How can school leaders shape organisations that offer consistently high quality, rounded and equitable education in the context of rapid change? How can wider school systems support and encourage all schools to succeed in this way? School Leadership and Education System Reform considers the ways in which school leadership and its practice has changed and developed in response to a rapidly changing educational scenario over the last decade to meet the ever-growing and changing demands of children, policy-makers and other stakeholders and considers future developments. Drawing together leading thinkers and researchers in the field of leadership and management this text takes an international perspective to consider what we know about school leadership and learning, and its practice. Theoretically and conceptually informed, the contributors draw on recent empirical research studies into leadership, learning and system reform to explore the key areas of school leadership and management with specific reference to student, adult and organisational learning. Key topics covered include: · The relationship between leadership and student learning · How leaders foster professional learning and evidence-informed improvement · The changing role and nature of accountability · System leadership and governance in networked systems · The balance between accountability, markets, and networks in 'self-improving' school systems · Emerging challenges and opportunities for leaders, such as the implications of new technologies Essential reading for those on postgraduate courses on leadership and management and those looking to develop their leadership practice, School Leadership and Education System Reform clearly sets out the key issues and provides discussion points and suggests resources to support and guide the reader through the wealth of information.
