Internet Marketing-Profits That Lie Hidden in Your Website

Lance Jepsen, 2008-09 Direct Web Sales Start with Good Web Design Many small business owners believe all that is needed for good website design is to hire a graphic artist to produce an online brochure for the company. That's fine, if you have no intention of using your website to generate actual sales. If your purpose is to make a direct sale through your website, it is crucial that you

understand what good website design really is. In *Internet Marketing: Profits That Lie Hidden in Your Website*, you'll discover how to design a direct sales website, how to write profitable sales copy, how to optimize your website for the major search engines- such as Yahoo, Google, MSN, and AOL Search-and how to use Google Adwords to your advantage. You don't need flash animations or fancy graphics to have a good website. Good design is all about focusing your marketing message exactly as you want it, and presenting it in such a way that when your customers do arrive, they'll be ready to buy.

Websites That Work Paul J Scott, 2016-05-13 Why do so many business owners pour time and money into their websites and get so little in return? Usually, it's because they aren't focusing on the right strategies. They waste resources chasing the wrong metrics, and don't know how to turn views and other forms of engagement into sales. They know they need to find customers online to stay competitive, but aren't sure how. Get your copy today and you'll start making money from your website, instead of sinking more of your budget into it.

There are free products that give marketing training at no cost. And yes, there are free ways to get traffic to your website without spending money on advertising. You can get unlimited free website traffic if you can figure out the online techniques to get you found and then to put them all together so you get a steady flow of visitors to your site day in and day out. Internet Marketing, Start-to-finish Catherine Juon, Dunrie Allison Greiling, Catherine Buerkle, 2011 This book is designed to help companies view Internet marketing strategically, bring together marketing, sales and operations functions that were previously separate and siloed, and systematically capture and apply data to drive dramatic improvements in performance. Drawing on their extensive experience with enterprise clients, Catherine Juon and Dunrie Greiling show how to implement a more iterative, measurable, and repeatable approach to Internet marketing, gain

Email Marketing, List Building, Traffic and Sales Generation

Director Brent Westbrook, 2013-09-07 For about 4 years my websites had been featured high up among Google's search results – for a lot of highly competitive keywords. To achieve this feat, I had to put in the hours ... thinking back, forget hours, it was more like weeks and months of hard work and effort. The positive was that business was doing well ... I was getting a decent amount of traffic, building a list and generating sales. Then out of the blue, Google attacked. First they closed down my Adwords account. Then they did what they called their 'Panda' update of their algorithm. In an instant, all my sites disappeared from Google ... all that hard SEO work, down the pan. They even closed down my 7

year old blog (I'd made a school boy error in using the Blogger platform which of course Google owned), a blog that was getting on average 950 visits per day. To say I was 'ticked off' is an understatement. In fact, I was very tempted to just 'throw my toys out of the pram' pack it all in! And, it wasn't just me who was greatly affected; thousands of marketers saw the same thing happen to their sites... with some poor souls literally losing everything. To see if there was any hope for my business, I started 'lurking' around the Internet Marketing forums to see how others were coping. Nothing I tried really seemed to replace the traffic that Google brought me. Although, I was interested in a method that a fellow Google 'Panda' victim was using. And so gave it a try. Results were patchy at first, but at least I could see the potential ... Gradually, I tweaked the method, tested different things, changed things about and results started to improve. I stuck with it. And now it's the ONLY traffic driving method I seriously use.
