*Grassroots Sustainability Innovations in Sports Management: Emerging Research and Opportunities* Tortora, Marco, 2017-10-31 Progression in sustainable sports practices is an up-and-coming area of research that also has an overarching impact on other professional fields. Analyzing the latest trends and methods in this niche area allows for further advancements in the field of sustainability. *Grassroots Sustainability Innovations in Sports Management: Emerging Research and Opportunities* is a crucial resource that offers an in-depth discussion on growth in the sports sector and how incorporating sustainable practices in this field's rising trajectory can further enhance its impact. Highlighting pertinent topics including innovation dynamics, management studies, corporate social responsibility, and systemic change, this publication is ideal for academicians, students, and researchers that are interested in expanding their knowledge of intertwining sustainable actions with sports administration.

*The Evolution of Everything* Matt Ridley, 2015-10-27 "Mr. Ridley's best and most important work to date...there is something profoundly democratic and egalitarian—even anti-elitist—in this bottom-up approach: Everyone can have a role in bringing about change." —Wall Street Journal The New York Times bestselling author of *The Rational Optimist* and *Genome* returns with a fascinating argument for evolution that definitively dispels a dangerous, widespread myth: that we can command and control our world. Human society evolves. Change in technology, language, morality, and society is incremental, inexorable, gradual, and spontaneous. It follows a narrative, going from one stage to the next, and it largely happens by trial and error—a version of natural selection. Much of the human world is the result of human action but not of human design: it emerges from the interactions of millions, not from the plans of a few. Drawing on fascinating evidence from science, economics, history, politics, and philosophy, Matt Ridley demolishes conventional assumptions that the great events and trends of our day are dictated by those on high. On the contrary, our most important achievements develop from the bottom up. The Industrial Revolution, cell phones, the rise of Asia, and the Internet were never planned; they happened. Languages emerged and evolved by a form of natural selection, as did common law. Torture, racism, slavery, and pedophilia—all once widely regarded as acceptable—are now seen as immoral despite the decline of religion in recent decades. In this wide-ranging, erudite book, Ridley brilliantly makes the case for evolution, rather than design, as the force that has shaped much of our culture, our technology, our minds, and that even now is shaping our future.

**Sociology, Science, and the End of Philosophy** Sal Restivo, 2017-07-06 This book offers a unique analysis of how ideas about science and technology in the public and scientific imaginations (in particular about maths, logic, the gene, the brain, god, and robots) perpetuate the false reality that values and politics are separate from scientific knowledge and its applications. These ideas are reinforced by cultural myths about free will and individualism. Restivo makes a compelling case for a synchronistic approach in the study of these notoriously 'hard' cases, arguing that their significance reaches far beyond the realms of science and technology, and that their sociological and political ramifications are of paramount importance in our global society. This innovative work deals with perennial problems in the social sciences, philosophy, and the history of science and religion, and will be of special interest to professionals in these fields, as well as scholars of science and technology studies.

*Universal Spirituality and Human Physicality* Rudolf Steiner, 2014-09-04 'Our contemporaries – who wish to keep to a narrow-minded and superficial outlook, are annoyed to find that spiritual science continually seeks the whole picture – that it has to create a bridge between the body and the soul, and truly explores how the psyche becomes corporeal and the body becomes psychological.' How do the soul and the spirit live in human physical bodies? In our materialistic age, in which the very existence of the metaphysical is widely rejected, such questions are rarely posed let alone addressed. In this exceptional series of lectures, Rudolf Steiner speaks in scientific detail about the connection of the subtle aspects of human nature – our soul and spirit – to our physical constitution. At the heart of this course are the well-loved 'Bridge' lectures, which appear in English for the first time in their wider context. Steiner discusses the solid, fluid, air and warmth bodies, and how these are connected with the various ethers, the 'I' and human blood. He goes on to describe how ideals and ideas impact the various aspects of the human constitution – how morality is a source of 'world creativity' – with moral thinking imbuing life into substance and will. Moral ideas have a positive effect, he says, whereas theoretical ones have a negative impact. In the realm of the moral, a new natural world comes into being, and thus the moral order and the natural order are intertwined. This volume also features Steiner's classic lecture on the Isis legend and its renewal today as divine wisdom – Sophia. Other themes include the mystery of Christ as the connection between the spiritual and physical sun; the permeation of the life of thought with will (love) and permeation of the life of will with thoughts (wisdom); the path to freedom and love and their importance in the universe; the metamorphosis of head and limbs through successive lives on earth; the threefold nature of the human form (head, thorax, limbs), the threefold nature of the soul (thinking, feeling, will) and the threefold nature of the spirit (waking, dreaming, sleeping).

**Music Psychology** Ernst Kurth, 2022-03-14 The first edition of Ernst Kurth's *Musikpsychologie* appeared in 1931, and was regarded by contemporaneous psychologists as no less than the foundation for a new systematic approach to the perception and cognition of music. Time has hardly diminished Kurth's standing as an original scholar with a distinctive point of view. Music theorists, both in Europe and North America, regard him as an important figure in the history of music theory. Daphne Tan and Christoph Neidhöfer's first full translation provides English-speaking theorists the opportunity to delve deeper into his ideas. Indeed, Kurth's concerns – listening habits and habituation, metaphorical language, the limits of memory, and the role of the body in music experience, to name a few – are shared by many in the field today, especially scholars who work at the intersections of music theory, psychology, linguistics, and related disciplines. And while Kurth's approach lacks the scientific rigour of modern-day empirical musicology, *Musikpsychologie* nevertheless presents a source of testable hypotheses for those working in the area of music perception and cognition. This translation of *Musikpsychologie* also has the potential to inspire a new generation of composers, especially through the topics in the second section (energy, force, space, and matter) and, given the inherently interdisciplinary nature of this book and the number of philosophical and scientific sources Kurth incorporates, it will appeal to those interested in the history of science and particularly in the emergence of psychology as an academic discipline in the early 20th century.

**War in Human Civilization** Azar Gat, 2008 In this truly global study, Azar Gat sets out to unravel the 'riddle of war' throughout human history, from the early hunter-gatherers right through to the unconventional terrorism of

the twenty-first century.

**Japan in the World, the World in Japan** Center for Japanese Studies, 2020-08-06 In fall 1997 the Center for Japanese Studies at The University of Michigan celebrated its fiftieth anniversary. The November symposium featured more than fifty speakers, moderators, and musicians who celebrated the occasion and offered reminiscences on the Center's multifaceted scholarly and professional missions, discussions of the accomplishments of its alumni/ae, and perspectives on wartime and postwar Japan-U.S. relations. As the first American interdisciplinary institute devoted to education and research on Japan, The University of Michigan Center for Japanese Studies has a path-making legacy. This volume, which includes the public presentations from the November 1997 symposium, reflects that legacy and the university's long and continuing involvement in Asia, which dates back to the 1870s.

**Commons, Sustainability, Democratization** Hans Peter Hansen, Birger Steen Nielsen, Nadarajah Sriskandarajah, Ewa Gunnarsson, 2016-01-22 This book presents theoretical discussions and practical examples of Action Research from Scandinavia, Latin America and Africa, primarily dealing with how to combine nature conservation and management with local democratic community development, seeing the renewal of Commons as a way to transcend the present dichotomy between these two dimensions.

**Sound Tracks** John Connell, Chris Gibson, 2003-09-02 Sound Tracks is the first comprehensive book on the new geography of popular music, examining the complex links between places, music and cultural identities. It provides an interdisciplinary perspective on local, national and global scenes, from the 'Mersey' and 'Icelandic' sounds to 'world music', and explores the diverse meanings of music in a range of regional contexts. In a world of intensified globalisation, links between space, music and identity are increasingly tenuous, yet places give credibility to music, not least in the 'country', and music is commonly linked to place, as a stake to originality, a claim to tradition and as a marketing device. This book develops new perspectives on these relationships and how they are situated within cultural and geographical thought.

**Identity and Conflict** G. M. Tamas, 1995

**The Routledge Handbook of Global Historical Archaeology** Charles E. Orser, Jr., Andres Zarankin, Pedro Funari, Susan Lawrence, James Symonds, 2020-07-26 The Routledge Handbook of Global Historical Archaeology is a multi-authored compendium of articles on specific topics of interest to today's historical archaeologists, offering perspectives on the current state of research and collectively outlining future directions for the field. The broad range of topics covered in this volume allows for specificity within individual chapters, while building to a cumulative overview of the field of historical archaeology as it stands, and where it could go next. Archaeological research is discussed in the context of current sociological concerns, different approaches and techniques are assessed, and potential advances are posited. This is a comprehensive treatment of the sub-discipline, engaging key contemporary debates, and providing a series of specially-commissioned geographical overviews to complement the more theoretical explorations. This book is designed to offer a starting point for students who may wish to pursue particular topics in more depth, as well as for non-archaeologists who have an interest in historical archaeology. Archaeologists, historians, preservationists, and all scholars interested in the role historical archaeology plays in illuminating daily life during the past five centuries will find this volume engaging and enlightening.

**The Tibetan Exercises for Rejuvenation** Samael Aun Weor, 2010-09-14 The health and vitality of the physical body is essential for anyone who aspires towards the awakening of the consciousness. Initiated students of Tantric traditions are taught exercises called Yantra Yoga to promote health and fortitude needed for their rigorous self-development. Samael Aun Weor, a reincarnated lama from the Sacred Order of Tibet, teaches in this book a synthesized and refined sequence of Yantric exercises with profound benefits that anyone can experience. In addition, he provides a fascinating and often shocking perspective on the reality of our situation, and the tremendous urgency for us to change our ways. "I tell you, brothers and sisters, that we, the Gnostics, have precise methods in order to rejuvenate the organism and cure all sicknesses. It is unquestionable that we can learn how to heal ourselves. Each one of us can be converted into our own physician by learning how to heal ourselves without the necessity of "medicine" - lo and behold, the most beloved ideal. It is urgent to preserve the physical body in perfect health for many years so that we can use this precious physical vehicle for the realization of our own Inner Self." - Samael Aun Weor

**Imaginary Plots and Political Realities in the Plays of William Congreve** Maximillian E. Novak, 2020-06-30 William Congreve was deeply involved in the events of his turbulent times. That involvement reveals itself in works which have sometimes been regarded as entirely unengaged with the realities of his society. This book attempts to read Congreve's plays and his novella, *Incognita*, against the political and social upheaval of the period initiated by the rebellion of 1688. A strong supporter of the new world ushered in by William III and Mary, Congreve fought against the reactionary politics of the Jacobite opposition.

**East of Siam** Harry Alverson Franck, 1926

**Postcolonialism After World Literature** Lorna Burns, 2019-05-16 Postcolonial studies took shape in response to the nationalist and decolonization movements of the twentieth century. Today, a resurgent interest in world literature reflects an increased awareness of globalization. These twin projects are torn between a criticism that finds in the text the trace of capitalist modernity and one that accounts for the revolutionary potential of literature to challenge our global present. Postcolonialism After World Literature exposes what is at stake in this critical choice through a line of philosophical enquiry – Bruno Latour, Gilles Deleuze, and Jacques Rancière – that poses an alternative to the materialist strand of world literary criticism pioneered by Pascale Casanova and Franco Moretti. Engaging with these theorists and others, Lorna Burns contests world-systems theory as the basis for thinking about contemporary postcolonial and world literatures, and proposes a renewed framework that promotes literature's capacity to provoke dissent; to imagine new forms of belonging and relation for both national and world citizens; and to stage the shared equality of all. Moving between theory and the novels of Roberto Bolaño, J. M. Coetzee, Kamel Daoud, Dany Laferrière, Pauline Melville, Arundhati Roy and Kamila Shamsie, Postcolonialism After World Literature presents the case for rethinking world literature in light of the legacies of postcolonialism, and for reshaping postcolonial studies in an era of world literature. Lorna Burns is Lecturer in Postcolonial Literatures at the University of St Andrews, UK. She is the author of *Contemporary Caribbean Writing and Deleuze* (Bloomsbury, 2012).

Esoteric Medicine and Practical Magic Samael Aun Weor,2013-09-25 In ancient times, only the wisest were trusted with medical knowledge, for it bears power over life and death. The remedies and methods of those seers may have been abandoned by modern civilization, but they have been preserved, and retain their power. Throughout all of our most sacred traditions, it is known that Nature is the source for all genuine medicine. The teachings of Paracelsus, Galen, Tibetan tantras, and others all agree that a properly prepared individual can use Nature to cure any illness. Samael Aun Weor, founder of the International Gnostic Movement and author of more than sixty books, lived for many years in close contact with the mysterious natives of the Sierra Nevada of South America. He and his wife Litelantes compiled and verified the knowledge they had been given by the priests and doctors of that region, resulting in this book Esoteric Medicine and Practical Magic. This practical manual gives hundreds of techniques and practices to awaken consciousness, perform healing for oneself and others, and return to the core medical knowledge of the ages. This work features treatments for an incredible variety of illnesses and conditions, such as cancer, asthma, the common cold, and leprosy.
