Incidents may include any number of different situations, such as wildfires, hurricanes, other natural disasters, and other unplanned events such as traffic accidents. The guide is based on standards established by the Manual on Uniform Traffic Control Devices and the Sign and Poster Guidelines for the Forest Service (EM-7100-15).

A Guide for Highway Traffic Regulation in an Emergency United States. Federal Highway Administration. Office of Traffic Operations,1974 The nature, scope and operation of Emergency Highway Traffic regulation (EHTR) is discussed in this guide which was designed to help the states prepare plans which would work effectively, both individually and collectively. It will also serve as a tool to aid in the updating of the State's plan through the publication of changing national policies and programs. The general background of the EHTR is reviewed. The broad fields of civil emergency planning and natural disaster are briefly discussed. The organizations involved in emergency planning and in EHTR operations are reviewed. The functions, personnel, equipment and communications in EHTR operations, as well as aspects such as regulated routes, road-use permits and EHTR signs are also covered. The role of the military, and nuclear radiation hazards to highway transportation are considered.

**Federal Disaster Assistance and Emergency Relief Programs** Geoffrey Sullivan,2015 Nearly all major roads and bridges in the United States are part of the federal-aid highway system and are therefore eligible for assistance from the Emergency Relief Program (ER) of the Federal Highway Administration (FHWA). ER assistance is restricted to roads and bridges on the federal aid highway system, which essentially includes all public roads not functionally classified as either local or rural minor collectors. For disaster-damaged roads that are not federal-aid highways, states may request reimbursement for emergency road repairs from the Federal Emergency Management Agency (FEMA). FEMA may also allow limited funding under its Public Assistance Program for such things as snow removal and related operating costs during extreme snowfalls, which are not eligible for ER funds. This book describes FHWA assistance for the repair and reconstruction of highways and bridges damaged by disasters or catastrophic failures. It begins with a brief discussion of the legislative origins of federal assistance, and then addresses eligibility issues and program operation. Moreover, this book discusses agricultural disaster assistance; presents backgrounds on emergency agricultural land assistance programs; describes snow assistance and assistance for severe winter storms, the declaration process, the criteria used to make eligibility determinations, and the types of assistance that are provided after the President has issued a major disaster declaration for the incident; discusses federal non-agricultural programs for emergency water assistance during droughts; commercial fishery disasters; and examines the Disaster Unemployment Assistance (DUA) benefits.
