

Emergency Sound Effects

Michael Tierno

Federal Register ,1979-10

Location and Postproduction Sound for Low-Budget Filmmakers Michael Tierno,2020-05-19 This book covers everything you need to know to master the fundamentals of location sound recording and postproduction sound in a comprehensive one-stop guide. This user-friendly book provides real world situations to analyze the many kinds of location recording configurations and postproduction scenarios and offers easy-to-adopt, budget-conscious solutions to some of the most common issues that arise when working with sound. Chapters cover the theory of sound, preproduction with a sound emphasis, microphone selection, testing equipment, how to boom and mix on set, synchronization and time code, and editing sound while doing a picture cut in a traditional picture software platform. Additionally, the book discusses bringing a project into a Digital Audio Workstation and explores basic sound design, dialogue editing, Automated Dialogue Replacement, Foley, sound effects, music for film, re-recording the final mix, and outputting sound to finish a project. Accompanying examples allow readers the opportunity to try out the various techniques and drills on location, in postproduction, or both. Aimed at students, early career and independent filmmakers, as well as those considering a vocation in location and postproduction sound, *Location and Postproduction Sound for Low-Budget Filmmakers* makes achieving great sound attainable for all, and is an invaluable tool for anyone wanting to better understand the art of film sound.

Mastering Simulation, Second Edition Janice C. Palaganas,Beth Tamplet Ulrich,Mary E. (Beth) Mancini,2020-06-16 Simulation can be a valuable tool in academic or clinical

settings, but technology changes quickly, and faculty, students, and clinicians need to know how to respond. Understanding simulation scenarios and environments is essential when designing and implementing effective programs for interdisciplinary learners. In this fully revised second edition of *Mastering Simulation*, nationally known experts Janice Palaganas, Beth Ulrich, and Beth Mancini guide students and practitioners in developing clinical competencies and provide a solid foundation for improving patient outcomes. Coverage includes:

- Creating simulation scenarios and improving learner performance
- Designing program evaluations and managing risk and quality improvement
- Developing interprofessional programs and designing research using simulation

Sound Effects ,19??

Reading Sounds Sean Zdenek, 2015-12-23 The work of writing closed captions for television and DVD is not simply transcribing dialogue, as one might assume at first, but consists largely of making rhetorical choices. For Sean Zdenek, when captioners describe a sound they are interpreting and creating contexts, they are assigning significance, they are creating meaning that doesn't necessarily exist in the soundtrack or the script. And in nine chapters he analyzes the numerous complex rhetorical choices captioners make, from abbreviating dialogue so it will fit on the screen and keep pace with the editing, to whether and how to describe background sounds, accents, or slurred speech, to nonlinguistic forms of sound communication such as sighing, screaming, or laughing, to describing music, captioned silences (as when a continuous noise suddenly stops), and sarcasm, surprise, and other forms of meaning associated with vocal tone. Throughout, he also looks at closed captioning style manuals and draws on interviews with professional

captioners and hearing-impaired viewers. Threading through all this is the novel argument that closed captions can be viewed as texts worthy of rhetorical analysis and that this analysis can lead the entertainment industry to better standards and practices for closed captioning, thereby better serve the needs of hearing-impaired viewers. The author also looks ahead to the work yet to be done in bringing better captioning practices to videos on the Internet, where captioning can take on additional functions such as enhancing searchability. While scholarly work has been done on captioning from a legal perspective, from a historical perspective, and from a technical perspective, no one has ever done what Zdenek does here, and the original analytical models he offers are richly interdisciplinary, drawing on work from the fields of technical communication, rhetoric, media studies, and disability studies.

Advances in Usability, User Experience, Wearable and Assistive Technology

Tareq Z. Ahram, Christianne S. Falcão, 2021-07-07 This book addresses emerging issues in usability, interface design, human-computer interaction, user experience and assistive technology. It highlights research aimed at understanding human interactions with products, services and systems and focuses on finding effective approaches for improving the user experience. It also discusses key issues in designing and providing assistive devices and services for individuals with disabilities or impairment, offering them support with mobility, communication, positioning, environmental control and daily living. The book covers modeling as well as innovative design concepts, with a special emphasis on user-centered design, and design for specific populations, particularly the elderly. Further topics include virtual reality, digital environments, gaming, heuristic evaluation and forms

of device interface feedback (e.g. visual and haptic). Based on the AHFE 2021 Conferences on Usability and User Experience, Human Factors and Wearable Technologies, Human Factors in Virtual Environments and Game Design, and Human Factors and Assistive Technology, held virtually on 25-29 July, 2021, from USA, this book provides academics and professionals with an extensive source of information and a timely guide to tools, applications and future challenges in these fields.

Digital Radio Production Donald W. Connelly,2017-03-24 Today's broadcasting students need a well-balanced, hands-on, and relevant guide to the radio industry. Digital Radio Production provides exactly that, and more. Employing a holistic approach, Connelly shares his 20 years of experience and invaluable insights on the production person's role in a radio station. His extensive knowledge of sales, promotion, programming, announcing, and social media is thoughtfully revealed within the structures of both large and small markets. The text also focuses on the latest technologies and trends in combination with core concepts vital to a successful career in radio. Fully updated, the Third Edition enhances students' technical skills and knowledge of digital audio, recording, storage, audio processing, and special effects. Each chapter features suggested activities outside the classroom, key informative websites, and a glossary of industry terms. The text is accompanied by 93 audio examples of virtually every aspect of radio production (from

microphone techniques to commercial production samples), an outstanding selection of production music that can be creatively reworked and transformed, and a custom studio-tracking session with suggested activities. Access audio examples, production music, and a custom studio-tracking session here.
