Supporting Life Skills for Children and Young People with Vision Impairment and Other Disabilities Fiona Broadley,2022-12-29 This practical resource is designed to help professionals, parents, and carers on their journey to independence with children and young people with vision impairments. Building on the ideas and practices introduced in Supporting Life Skills for Young Children with Vision Impairment and Other Disabilities, this book addresses middle childhood, the period from when the child starts school, through to the onset of puberty. It offers a wealth of practical strategies and activities to enhance key skills, including personal safety, advanced dressing, personal hygiene, dealing with puberty, social skills, time, money and organisational skills, eating, drinking and food preparation skills, and the transition to secondary school. This book: Addresses the main independent living skills areas for vision impaired children in middle childhood, by providing simple explanations of skills and offering practical strategies and techniques to support progression onto the next stage. Is written in a fully accessible style, with photocopiable pages and additional downloadable eResources. Provides a variety of documentation to chart the child's development and show progress over time. This invaluable resource puts the changes that occur during middle childhood into context and will help busy professionals, families and carers start preparing children with a vision impairment for adulthood, allowing them to become confident and independent individuals.

MOBILE COMMERCE BANDYOPADHYAY, KARABI,2022-12-19 Once the treasured piece of the elite class, mobile phones have now become a prerequisite of every commoner. From schoolchildren to pensioners, from bureaucrats to fruit vendors, all depend greatly on their mobile phones now. The reason can be given to its impeccable potential to perform various applications efficiently, within no time. This book on Mobile Commerce gives an in-depth insight on the role of a mobile in revolutionizing various industry verticals, specifically business and commerce. The book, in its second edition, shows the evolution of a mobile phone from a mere gadget meant for communication to a smarter one performing business transactions. The book is divided into seven parts discussing basic concepts, technologies, key players, new products, security and legal aspects, the future trends and the case studies. The book also discusses various technologically advanced handheld devices, like Smart phones, PDA's, Laptops, Tablets and Portable Gaming Consoles, in detail. Besides, the basic technology and concepts involved in application of mobile commerce is discussed comprehensively. The important concepts, like mobile marketing, mobile ticketing, mobile computing, mobile payments and mobile banking are discussed vis-a-vis latest technologies, like wireless and mobile communication technology, digital cellular technology, mobile access technology including 5G and 6G systems. The book also throws light on the issues, such as mobile security hazards, and the necessary measures to protect against the same. A chapter is devoted to laws governing the mobile phone usage and its privacy. The Case Studies are provided elucidating the role of mobile commerce in the real-life scenarios. This book is intended for the undergraduate and postgraduate students of Computer Applications, Electronics & Communication Engineering, Information Technology and Management. Surveillance Futures Emmeline Taylor,Tonya Rooney,2016-08-05 From birth to adulthood, children now find themselves navigating a network of surveillance devices that attempt to identify, quantify, sort and track their thoughts, movements and actions. This book is the first collection to focus exclusively on technological surveillance and young people. Organised around three key spheres of children's day-to-day life: schooling, the self and social lives, this book chronicles the increasing surveillance that children, of all ages, are subject to. Numerous surveillance apparatus and tools are examined, including, but not limited to: mobile phones, surveillance cameras, online monitoring, GPS and RFID tracking and big data analytics. In addition to chronicling the steady rise of such surveillance practices, the chapters in this volume identify and problematise the consequences of technological surveillance from a range of multidisciplinary perspectives. Bringing together leading scholars working across diverse fields - including sociology, education, health, criminology, anthropology, philosophy, media and information technology - the collection highlights the significant socio-political and ethical implications of technological surveillance throughout childhood and youth.

Plunkett's Wireless, Wi-Fi, Rfid & Cellular Industry Almanac 2007: Wireless, Wi-Fi, Rfid & Cellular Industry Market Research, Statistics, Trends & Lea Jack W. Plunkett,2006-07 The cell phone is the fastest-selling consumer electronic in the world. On a global basis, over 800 million cellular telephones are sold yearly. More camera-equipped cell phones are sold each year than stand alone digital cameras. Rapid development of new technologies is leading to ever more versatile, multipurpose mobile devices, including 3G Internet-enabled cell phones and PDAs. Meanwhile, wireless networking and wireless Internet access are developing and expanding on a global basis at a rapid rate. Booming technologies include such 802.11 standards as Wi-Fi and WiMax, as well as Ultra Wide Band (UWB) and Bluetooth. Telematics, intelligent transportation systems (ITS) and satellite radio will soon create an entertainment, navigation and communications revolution within automobiles and trucks. Meanwhile, RFID (radio frequency identification) will revolutionize wireless tracking, inventory and logistics at all levels, from manufacturing to shipping to retailing. These developments are creating challenges for legacy companies and opportunities for nimble marketers and managers. Plunkett's Wireless, Wi-Fi, RFID & Cellular Industry Almanac 2007 covers such sectors. Our coverage includes business trends analysis and industry statistics. We also include a wireless and cellular business glossary and a listing of industry contacts, such as industry associations and government agencies. Next, we profile hundreds of leading companies. Our company profiles, nearly 350, include complete business descriptions and up to 27 executives by name and title.

Travel Behavior Characteristics Analysis Technology Based on Mobile Phone Location Data Fei Yang,Zhenxing Yao,2022-03-19 This book is devoted to the technology and methodology of individual travel behavior analysis and refined travel information extraction. Traditional resident trip surveys are characterized by many shortcomings, such as subjective memory errors, difficulty in organization and high cost. Therefore, in this book, a set of refined extraction and analysis techniques for individual travel activities is proposed. It provides a solid foundation for the optimization and reconstruction of traffic theoretical models, urban traffic planning, management and decision-making. This book helps traffic engineering researchers, traffic engineering technicians and traffic industry managers understand the difficulties and challenges faced by transportation big data. Additionally, it helps them adapt to changes in traffic demand and the technological environment to achieve theoretical innovation and technological reform.

State, Society and Information Technology in Asia Alan Chong,Faizal Bin Yahya,2016-04-01 Many maintain that the arrival of computers networked across sovereign borders and physical barriers is a liberating force that will produce a global dialogue of liberal hues but this book argues that this dominant paradigm needs to be supplemented by the perspective of alterity in the impact of Information Technology in different regions. Local experts draw upon a range of Asian cases to demonstrate how alterity, defined here as a condition of privileging the hitherto marginal and subterranean aspects of a capitalist world order through the capabilities

of information and communications technologies, offers an alternative to the paradigm of inevitable material advances and political liberalization. Calling attention to the unique social and political uses being made of IT in Asia in the service of offline and online causes predominantly filtered by pre-existing social milieus the contributors examine the multiple dimensions of Asian differences in the sociology and politics of IT and show how present trends suggest that advanced electronic media will not necessarily be embraced in a smooth, unilinear fashion throughout Asia. This book will appeal to any reader interested in the nexus between society and IT in Asia.

Facebook Nation Newton Lee, 2014-10-16 Facebook's psychological experiments and Edward Snowden's NSA leaks epitomize a world of increasing information awareness in the social media ecosystem. With over a billion monthly active users, Facebook as a nation is overtaking China as the largest country in the world. President Barack Obama, in his 2011 State of the Union Address, called America "the nation of Edison and the Wright brothers" and "of Google and Facebook." U.S. Chief Information Officer Steven VanRoekel opines that America has become a "Facebook nation" that demands increased transparency and interactivity from the federal government. Ubiquitous social networks such as Facebook, Google+, Twitter, and YouTube are creating the technologies, infrastructures, and big data necessary for Total Information Awareness - a controversial surveillance program proposed by DARPA after the 9/11 attacks. NSA's secret PRISM program has reinvigorated WikiLeaks founder Julian Assange's accusation that "Facebook is the most appalling spying machine that has ever been invented." Facebook CEO Mark Zuckerberg once said, "We exist at the intersection of technology and social issues." This book offers discourse and practical advice on the privacy issue in the age of big data, business intelligence in social media, e-government and e-activism, as well as personal total information awareness. This expanded edition also includes insights from Wikipedian Emily Temple-Wood and Facebook ROI experts Dennis Yu and Alex Houg.

Inside the Smart Home Richard Harper, 2006-04-18 Using clear and accessible language this book examines the growing field of 'smart technology' for the home. The author first introduces the field before exploring the various background issues, including how the home differs from other environments. He then shows how these background issues affect the design and usability of these technologies. A detailed case study looks at the use of handheld and wearable digital technology in sheltered housing. The last section examines what it is like to live in a smart home and why they have so far failed to reach the levels of success originally predicted. Invaluable reading for anybody interested in designing smart technologies for the home.

The Caregiver's Toolbox Carolyn P. Hartley, Peter Wong, 2015-08-03 Millions of Americans are or will be amateur caregivers for ill spouses, parents, or friends. Caregivers today, more than ever, use technology to help manage schedules, medication routines and pharmacy reminders, legal and financial affairs, as well as travel and expenses. Yet recent insurance options and health care's emerging digital world make for an overwhelming, complex process. If you are one of the 64 million current caregivers, could you access your parents' critical documents in an emergency, using their user IDs and passwords? Do you know how often your parents or parents-in-law are taking medications, how often your loved one goes to the doctor, and how to be involved in medical and life decisions? Statistics show 85 percent of caregivers are not trained in caregiving, so many people are likely winging it, picking up pieces of information here and advice there. The Caregiver's Toolbox is your guide to cool apps and online tools, insider tips on how to reduce your medical bills, your privacy rights as a caregiver, where to go for free and low-cost help, and much more. It clearly shows which tools will relieve your stress, and those that may add stress. The authors dedicate much of their professional lives to helping people navigate the health care matrix. For updates on tools, applications, and emerging technology, visit the authors' website, www.caregivers-toolbox.com.

Disaster Education, Communication and Engagement Neil Dufty, 2020-03-10 A detailed guide to the design and evaluation of effective disaster learning programs Disaster Education, Communication and Engagement provides a much-needed evidence-based guide for designing effective disaster learning plans and programs that are tailored to local communities and their particular hazard risks. Drawing on the most recent research from disaster psychology, disaster sociology, and education psychology, as well as evaluations of disaster learning programs, the book contains practical guidance for putting in place a proven design framework. The book outlines the steps to take in order to tailor a disaster education, communication and engagement program and highlights illustrative examples of effective programs and activities from around the world. The author includes information on how to identify potential community learners and presents a methodology for understanding the at-risk community, its hazard risks, disaster risk reduction, and emergency management arrangements. Disaster Education, Communication and Engagement describes both country-wide campaigns and local disaster programs that involve community participation. This important resource: Presents a detailed framework to guide the design and evaluation of tailored disaster learning programs Includes information that links disaster resilience with sustainability and climate change learning Describes the 'disaster cycle' and reviews learning content and methods related to the cycle Explains effective ways to combine disaster education, disaster communications, and disaster-related engagement Contains material on using new technologies such as gamification, virtual reality, and social media Written for emergency managers, students of emergency management, and humanitarian courses, Disaster Education, Communication and Engagement is a hands-on guide filled with ideas and templates for designing and evaluating targeted disaster learning programs.

Location Technologies in International Context Rowan Wilken, Gerard Goggin, Heather A. Horst, 2019-01-21 Location Technologies in International Context offers the first international account of location technologies (in an expanded sense) and brings together a range of contributions on these technologies and their various cultures of use within the Global South. This collection asks: How, within the Global South, do location technologies differ across national markets, geo-linguistic communities and cultural contexts? What are the contrasting or shared meanings and practices associated with location technologies? And what innovative practices and new (or reinvigorated) theory may emerge from attention to the Global South? In exploring these questions, the collection contributes to our understanding of social, cultural, gendered and political relations on a global and local scale. Location Technologies in International Context is ideal for a range of disciplines, including cultural, communication and media studies; anthropology, sociology and geography; new media, Internet and mobile studies; and informatics and development studies.

Design and Quality Considerations for Developing Mobile Apps for Medication Management: Emerging Research and Opportunities Yap, Kevin, Ali, Eskinder Eshetu, Chew, Lita, 2020-07-31 Medication management is an essential component of therapeutic success in the treatment of chronic diseases. However, patients who do not regularly take their prescribed medications are a primary concern of health systems worldwide. A significant proportion of patients on chronic medications fail to adhere to their treatments, and suboptimal adherence leads to dire clinical and financial consequences on the personal level. Moreover, non-adherence can adversely impact public healthcare costs and the clinical outcomes of patients. Design and Quality Considerations for Developing Mobile Apps for Medication Management: Emerging Research and

Opportunities is a collection of innovative research that combines theory and practice on optimizing strategies to improve medication adherence and overall health and wellbeing in patients through the design of usable and reliable mobile app-based systems. Highlighting a broad range of topics including pharmaceutical care, quality assessment, and health behavior frameworks, this book is ideally designed for clinicians, pharmacists, healthcare providers, programmers, software developers, researchers, academicians, and students.
