Nanostructured Zinc Oxide Kamlendra Awasthi,2021-08-10 Nanostructured Zinc Oxide covers the various routes for the synthesis of different types of nanostructured zinc oxide including; 1D (nanorods, nanowires etc.), 2D and 3D (nanosheets, nanoparticles, nanospheres etc.). This comprehensive overview provides readers with a clear understanding of the various parameters controlling morphologies. The book also reviews key properties of ZnO including optical, electronic, thermal, piezoelectric and surface properties and techniques in order to tailor key properties. There is a large emphasis in the book on ZnO nanostructures and their role in optoelectronics. ZnO is very interesting and widely investigated material for a number of applications. This book presents up-to-date information about the ZnO nanostructures-based applications such as gas sensing, pH sensing, photocatalysis, antibacterial activity, drug delivery, and electrodes for optoelectronics. Reviews methods to synthesize, tailor, and characterize 1D, 2D, and 3D zinc oxide nanostructured materials Discusses key properties of zinc oxide nanostructured materials including optical, electronic, thermal, piezoelectric, and surface properties Addresses most relevant zinc oxide applications in optoelectronics such as light-emitting diodes, solar cells, and sensors

Environmental Sustainability Education for a Changing World Erika Péntzesné Kónya,Martin Haigh,Josef Křeček,2021-06-22 Globally, there is a need to promote and empower practical action towards better environmental conservation and greater sustainability; education aspires to achieve and motivate this – one mind at a time. This book advances a future-oriented vision of the development of environmental sustainability education in settings outside the high-school. It provides practical guidance for teacher practitioners and policy makers in community-oriented environmental sustainability education. It promotes a modern holistic approach to sustainability learning in and by the community through participative engagement with sustainability issues. Its special foci include working with volunteers and citizen scientists, through museums or through re-purposing Higher Education. Its approach emphasises the implementation of the United Nation's Sustainable Development Goals and cooperation with environmental management professionals. This book's cosponsors include the International Association for Headwater Control and FAO – European Forestry Commission's Working Party on the Management of Mountain Watersheds, as well as the International Environmental Education Conferences, Eger, Hungary and the Hungarian Academy of Science's Subcommittee on Future Studies. Community education has long been a goal for environmental management, whose practitioners realise that interventions, such as biodiversity conservation, are only truly sustainable when supported by the local land-user and stakeholder communities; this depends upon these stakeholders' understanding why intervention is necessary.

Nano-enabled Sustainable and Precision Agriculture Peng Zhang,Iseult Lynch,J.C. White,Richard D. Handy,2023-08-06 Nano-enabled Sustainable and Precision Agriculture is the first single-volume resource to cover this important field using a whole systems approach that considers both opportunities and challenges. The book provides a comprehensive understanding of the role of nanotechnology in agriculture from broad aspects, but also includes a comprehensive view of the interaction of nanomaterials with soil-plant systems. It highlights aspects not described in previous books, including the application of nanoinformatics and artificial intelligence in nano-enabled sustainable agriculture, the application of nanotechnology in alternative forms of agriculture such as hydroponics, and regulatory frameworks for this research field. The book addresses all these aspects by including sections on enhanced sustainability, reduced pollution and enhanced ecosystems' health, and the role of nanoinformatics and machine learning. Provides foundational insights and resources for each area, including soil science, water chemistry, nanoscience, plant science, microbiology and nanoinformatics Focuses on mechanisms of action, transformations and the underpinning chemistry and biochemistry Includes linkages and cross-referencing between chapters to ensure a cohesive and comprehensive resource

The Digestive Tract of Cephalopods: at the Interface Between Physiology and Ecology Giovanna Ponte, Eduardo Almansa, Paul Andrews, 2019-03-25 Aristotle in the *Historia animalium*, (Book IV) gives one of the earliest descriptions of the anatomy of the cephalopod digestive tract, comparing it to that of other molluscs. From dissections of cuttlefish several key features of the cephalopod digestive tract were described: the beak (“teeth”) and radula (“tongue”), the passage of the oesophagus through the brain en route to the crop and stomach. The stomach is described as having spiral convolutions like a trumpet snail shell suggesting that the structure described is actually the caecum. The gut then turns anteriorly so that the anal opening is near the funnel leading a modern author to comment that they “defaecate on their heads” (Leroi, 2014). In the intervening two millennia research on the cephalopod digestive tract has been sporadic with much of the current knowledge arising from a series of studies in the 1950s to the 1970s by A.M. Bidder, E. Boucaud -Camou, R. Boucher-Rodoni and K. Mangold which established the basic mechanisms of digestion and absorption (e.g., Bidder, 1950; Boucaud-Camou et al., 1976). The last 10 years has seen a resurgence of research on the digestive tract stimulated by interest in cephalopods (particularly *Octopus vulgaris* and *Sepia officinalis*) as candidate species for aquaculture and the potential impact of climate change on cephalopod ecology. Additionally, the inclusion of cephalopods in the European Union legislation regulating scientific research has necessitated improved understanding of dietary requirements and metabolism as well as the development of methods to monitor digestive tract function to ensure optimal care and welfare in the laboratory. Prompted by this resurgence of interest in the cephalopod digestive tract and an international workshop on the topic held in November 2015 we have collected a series of papers reflecting the current state-of-the art. The seventeen papers in this book combine original research publications and reviews covering a diversity of topics that are grouped under four main themes reflecting key topics in the physiology and ecology of the cephalopod digestive tract; feeding strategies, early life stages and aquaculture, anatomy and digestive physiology, care and welfare. This book provides a timely synthesis of ongoing research into the cephalopod digestive tract which we hope will stimulate further studies into this relatively neglected aspect of cephalopod biology. Molecular Physiology in Molluscs of Economic or Ecological Importance Xiaotong Wang, Youji Wang, 2019-10-24 As the largest marine phylum, molluscs comprise ~23% of all named marine organisms. Many molluscs have economic or ecological importance. With the development of molecular biology and omics techniques, significant gains have been made for molecular physiology in molluscs of economic or ecological importance.
