**Here Hold My Drink and Watch This** Sunny Whitfield, 2021-07-19 With a medley of experiences from the earliest days as a student paramedic, qualified officer, humanitarian health assistant, and high altitude medical officer, this book has underpinned the story of an everyday paramedic. Whilst thousands of ambulance officers, emergency medical technicians and paramedics criss-cross their way through communities around the world to provide support to people, 'Here Hold My Drink and Watch This' has captured a rare insight into the real people of paramedicine. Written from a down-to-earth perspective, Sunny brings to life the challenging and confronting work paramedics are faced with on a daily basis yet also finds some humour and consolation amongst the confusion and chaos.

**International Review of Cytology** Kwang W. Jeon, 2004-06-25 The acclaimed International Review of Cytology series presents current advances and reviews in cell biology, both plant and animal. Articles address structure and control of gene expression, nucleocytoplasmic interactions, control of cell development and differentiation, and cell transformation and growth. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research.

**Receptor-like Kinases in Plants** Frans Tax, Birgit Kemmerling, 2012-01-20 Sequencing projects have revealed the presence of at least several hundred receptor kinases in a typical plant genome. Receptor kinases are therefore the largest family of primary signal transducers in plants, and their abundance suggests an immense signaling network that we have only just begun to uncover. Recent research findings indicate that individual receptor kinases fulfill important roles in growth and development, in the recognition of pathogens and symbionts or, in a few examples, in both growth and defense. This volume will focus on the roles of receptor kinases, their signaling pathways, and the ways in which these important signaling proteins are regulated.

### **Biomolecular Imaging at High Spatial and Temporal Resolution In Vitro and In Vivo**

Thomas Harry Sharp, 2013-10-31 As part of a collaboration between two different groups in chemistry and biochemistry, Thom Sharp presents here his thesis work on the development of new methods for cryoelectron microscopy. Throughout his Ph.D., Thom had to master a whole range of techniques including modelling, molecular biology and microscopy. Using these skills to tackle an outstanding problem, the pursuit of high-resolution structures of peptide-based materials, Thom highlights in this thesis his newly developed methods for analysing and processing this particular type of electron microscopy data. This thesis gives the first molecular description of a de-novo designed peptide-based material. In general, this research will have a huge impact on the peptide assembly field, and also in electron microscopy as it introduces new methods and approaches, all of which are Thom's inventions and are described in this thesis.

Industrial Engineering in the Age of Business Intelligence Fethi Calisir, 2022-08-24 This book gathers extended versions of the best papers presented at the Global Joint Conference on Industrial Engineering and Its Application Areas (GJCIE), held virtually on October 30-31, 2021, from Istanbul Technical University. Continuing the tradition of previous volumes, it highlights recent developments of industrial engineering at the purpose of using and managing digital and intelligent technologies for application to a wide range of field, including manufacturing, healthcare, e-commerce and mobility.

**First Responder** Jennifer Murphy, 2021-04-06 One woman's incredible story of life on the front lines as an emergency medical worker in New York City. On the streets of New York City, EMTs and paramedics do more than respond to emergencies; they eat and drink together, look out for each other's safety, mercilessly make fun of one another, date one other, and, most crucially, share terrifying experiences and grave injustices suffered under the city's long-broken EMS system. Their loyalty to one another is fierce and absolute. As Jennifer Murphy shows in the gripping and moving First Responder, they are a family. A dysfunctional family, perhaps, but what family isn't? Many in the field of pre-hospital emergency care have endured medical trauma and familial hardship themselves. Some are looking to give back. Some are desperate for family. Some were inspired by 9/11. Still others want to become doctors, nurses, firefighters, cops, and want to cut their teeth on the streets. As rescuers, they never want people to die or get hurt. But if they are going to die or get hurt, first responders want to be there. Despite the vital role they play New York City, EMTs are paid less than trash collectors, and far less than any other first responder makes, even though the burden of medical emergencies fall on the backs of EMTs and medics. Yet for Jennifer and her brothers and sisters, it's a calling more than a job. First responders are constantly exposed to infectious diseases, violence, and death. The coronavirus pandemic did not change that math; the public is just more aware of it. After 9/11, EMT training schools experienced a surge in applications from civilians wanting to become first responders, inspired by rescuers who responded to the terrorist attacks and rushed into the burning

towers when everyone else ran out. The same will almost certainly be true post-coronavirus as people are moved by a desire to help in times of crisis in a more direct way. Funny and heartwarming, inspiring and poignant, *First Responder* follows Jennifer's journey to becoming an EMT and working during and beyond the Covid-19 pandemic. She will bring readers inside an intense world filled with crisis, rescue, grief, uncertainty, and dark humor. *First Responder* will move readers to a greater understanding and appreciation of those fighting for them—wherever they live—in a world they hardly know or could imagine.

**18th European Symposium on Computer Aided Process Engineering** Bertrand Braunschweig, Xavier Joulia, 2008-05-15 The 18th European Symposium on Computer Aided Process Engineering contains papers presented at the 18th European Symposium of Computer Aided Process Engineering (ESCAPE 18) held in Lyon, France, from 1-4 June 2008. The ESCAPE series brings the latest innovations and achievements by leading professionals from the industrial and academic communities. The series serves as a forum for engineers, scientists, researchers, managers and students from academia and industry to: - present new computer aided methods, algorithms, techniques related to process and product engineering, - discuss innovative concepts, new challenges, needs and trends in the area of CAPE. This research area bridges fundamental sciences (physics, chemistry, thermodynamics, applied mathematics and computer sciences) with the various aspects of process and product engineering. The special theme for ESCAPE-18 is CAPE for the Users! CAPE systems are to be put in the hands of end users who need functionality and assistance beyond the scientific and technological capacities which are at the core of the systems. The four main topics are: - off-line systems for synthesis and design, - on-line systems for control and operation, - computational and numerical solutions strategies, - integrated and multi-scale modelling and simulation. Two general topics address the impact of CAPE tools and methods on Society and Education. \* CD-ROM that accompanies the book contains all research papers and contributions \* International in scope with guest speeches and keynote talks from leaders in science and industry \* Presents papers covering the latest research, key top areas and developments in Computer Aided Process Engineering

**Crop Improvement by Omics and Bioinformatics** Yan Zhao, Jun Li, Zhichao Wu, Xueqiang Wang, 2024-04-11 Crop improvement has been continuously driven by the demand for food security and sustainability. The caloric and nutritional needs of a growing world population require that global food production increase by one billion tons over the next few decades, but the current growth rate falls far short. Moreover, rapid changes in the environment are accelerating land degradation, aggravating pests and diseases, introducing extreme stresses, and reducing crop productivity. Genetic technologies and molecular breeding tools offer novel opportunities for modern crop breeding. In the past few decades, remarkable progress has been achieved in the discovery of genes for crop yield, quality, and resistance and in the dissection of plant molecular mechanisms. With the continuous advancement in sequencing technology, molecular markers, and gene editing, a large number of excellent crop varieties have been cultivated.

**Understanding Flowers and Flowering Second Edition** Beverley Glover, 2014-02 Beverley Glover provides an overview of the biology of flowers and considers how plants decide when to make flowers and how floral organs develop. She looks at why different shapes and colours exist, relating floral development to pollination biology.

*Cytoskeleton and G-proteins in the Regulation of Cancer* Noboru Kuzumaki, 1998

**The Molecular Biology and Biotechnology of Flowering** Brian R. Jordan, 2006 Containing contributions from experts from the USA, Europe and New Zealand, this book provides an overview of the molecular mechanisms associated with flowering. The first edition was published in 1993 as *The Molecular Biology of Flowering*. The second edition has been thoroughly revised and updated to cover the major advances that have been made in the area in the last thirteen years. It has also been extended to examine the new commercial opportunities provided by biotechnology. It explores three main themes: the external and internal regulation of flowering, floral development, and fertilisation and gametophyte development, and includes new chapters on the evolution of flowers, floral

senescence and apomixis.

**Dynamical Systems, Ergodic Theory and Applications** L.A. Bunimovich, S.G. Dani, R.L. Dobrushin, M.V. Jakobson, I.P. Kornfeld, N.B. Maslova, Ya.B. Pesin, J. Smillie, Yu.M. Sukhov, A.M. Vershik, 2000-04-05 This EMS volume, the first edition of which was published as *Dynamical Systems II*, EMS 2, familiarizes the reader with the fundamental ideas and results of modern ergodic theory and its applications to dynamical systems and statistical mechanics. The enlarged and revised second edition adds two new contributions on ergodic theory of flows on homogeneous manifolds and on methods of algebraic geometry in the theory of interval exchange transformations.

**Implementation Guide for IBM Elastic Storage System 3000** Brian Herr, Chiahong Chen, Farida Yaragatti, John Lewars, Jonathan Turner, Luis Bolinches, Olaf Weiser, Puneet Chaudhary, Ravindra Sure, Robert Guthrie, Stefan Roth, Todd M Tosseth, Vasfi Gucer, Wesley Jones, IBM Redbooks, 2021-06-28 This IBM® Redbooks publication introduces and describes the IBM Elastic Storage® Server 3000 (ESS 3000) as a scalable, high-performance data and file management solution. The solution is built on proven IBM Spectrum® Scale technology, formerly IBM General Parallel File System (IBM GPFS). IBM Elastic Storage System 3000 is an all-Flash array platform. This storage platform uses NVMe-attached drives in ESS 3000 to provide significant performance improvements as compared to SAS-attached flash drives. This book provides a technical overview of the ESS 3000 solution and helps you to plan the installation of the environment. We also explain the use cases where we believe it fits best. Our goal is to position this book as the starting point document for customers that would use ESS 3000 as part of their IBM Spectrum Scale setups. This book is targeted toward technical professionals (consultants, technical support staff, IT Architects, and IT Specialists) who are responsible for delivering cost-effective storage solutions with ESS 3000.

**Life Support** Mike Rubin, 2021-11-17 Mike Rubin's conversational style and self-deprecating humor appeal to healthcare providers and patients, educators and students, employers, and employees. Whether you're a rescuer or you aspire to be, you'll find entertainment, advice, and encouragement in *Life Support*.

**Ambulance Man** Brian Casey, 2022-01-15 Ride along with the calm and measured paramedics of 1980s ambulance work as they navigate speed and gore. Chronicled are the memories of a boy who followed the sirens' call into manhood utilizing grit and imagination to overcome hidden deficits. *Ambulance Man* is the sometimes funny, sometimes frightening, but always heartfelt story of a young man's entry into ambulance work. The police story has been widely written and portrayed, the firefighter unceasingly praised, yet it is the ambulance EMT or paramedic who suddenly appears at the side of the sick and injured, and remains a mystery to most. Experience the sights, sounds, strategies, and raw emotions of this uniquely intense and rewarding occupation.

**G Proteins, Cytoskeleton, and Cancer** Hiroshi Maruta, Kazuhiro Kohama, 1998 Building upon the pioneering work of Klaus Weber, who in the 1970s discovered a key to the malignant transformation of normal cells by tumor virus infection or mutations via the disruption of actin cables and subsequent induction of membrane ruffling occurring with oncogenes such as v-Ras and v-Src, the global contributors aim toward the quantum leap of creating an anticancer Holy Grail that would attenuate the malignant activity of oncogenic mutants. The two dozen papers are organized under the four major headings of: actin-cytoskeleton, Ras/Rho family GTPases, links between G proteins and actin, and new anticancer drugs (e.g. farnesyltransferase inhibitors, SCH51344, and azatyrosine).
