Energy-Efficient Technologies for the Dismounted Soldier National Research

Council,Division on Engineering and Physical Sciences,Commission on Engineering and Technical Systems,Committee on Electric Power for the Dismounted Soldier,1997-12-30 This book documents electric power requirements for the dismounted soldier on future Army battlefields, describes advanced energy concepts, and provides an integrated assessment of technologies likely to affect limitations and needs in the future. It surveys technologies associated with both supply and demand including: energy sources and systems; low power electronics and design; communications, computers, displays, and sensors; and networks, protocols, and operations. Advanced concepts discussed are predicated on continued development by the Army of soldier systems similar to the Land Warrior system on which the committee bases its projections on energy use. Finally, the volume proposes twenty research objectives to achieve energy goals in the 2025 time frame.

Nanotechnology and Energy Kaufui V. Wong,2017-10-03 Nanotechnology is a vibrant research area and a growing industry. The properties of nanoparticles and nanofluids are different from those of macroparticles and macrofluids because the physical and chemical properties are very dissimilar when dimensions are at the nanometer range. The first successes in using nanofluids for cooling were achieved and commercialized for automobiles; hence, this subarea is rather profitable. Other nanotechnology research and developmental areas are cutting edge. The core scientific principles of all nanotechnology applications are based in physics, chemistry, and engineering. Nanotechnology is not taught in most programs of engineering yet, and this book on nanotechnology and energy includes a discussion of introducing nanotechnology to the curricula of engineering students. The book also introduces significant current research topics in nanoscience and nanotechnology. It is a textbook for advanced undergraduate- and graduate-level students of nanotechnology, as well as a useful reference book for researchers and professional engineers working in the fields of macromolecular science, nanotechnology, and chemistry, especially those with an interest in energy and the environment, and the automotive industry.

Customization 4.0 Stephan Hankammer, Kjeld Nielsen, Frank T. Piller, Günther

Schuh, Ning Wang, 2018-06-20 This proceedings volume presents the latest research from the worldwide mass customization & personalization (MCP) community bringing together new thoughts and results from various disciplines within the field. The chapters are based on papers from the MCPC 2017. The book showcases research and practice from authors that see MCP as an opportunity to extend or even revolutionize current business models. The current trends of Industrie 4.0, digital manufacturing, and the rise of smart products allow for a fresh perspective on MCP: Customization 4.0. The book places a new set of values in the centre of the debate: a world with finite resources, global population growth, and exacerbating climate change needs smart thinking to engage the most effective capabilities and resources. It discusses how Customization 4.0 fosters sustainable development and creates shared value for companies, customers, consumers, and the society as a whole. The chapters of this book are contributed by a wide range of specialists, offering cutting-edge research, as well as insightful advances in industrial practice in key areas. The MCPC 2017 has a strong focus on real life MCP applications, and this proceedings volume reflects this. MCP strategies aim to profit from the fact that people are different. Their objective is to turn customer heterogeneities into opportunities, hence addressing “long tail” business models. The objective of MCP is to provide goods and services that best serve individual customers’ needs with near mass production efficiency. This proceedings volume highlights the interdisciplinary work of thought leaders, technology developers, and researchers with corporate entrepreneurs putting these strategies into practice.
