Tips include: Open curtains when the sun comes up to let the sun's energy in, but close them as soon as it gets dark to keep the warm air inside the house. Caulk around any old windows to prevent leaks. Close doors and lower heat in all zones you don't use every day, like the guest bedroom or the study. Invest in down comforters and wool blankets for the beds and turn your heat down you'll sleep better, and save on heating costs! Buy plastic sheeting and cover very drafty windows. It's inexpensive at the home improvement store, and it can save you a bundle. Replace your old storm door with a new one to prevent drafts. Lower the temperature on your water heater - this also helps to prevent scalding!
