Morpho-Syntactic Patterns in Spoken Korean English Sofia Rüdiger, 2019-07-15
Morpho-Syntactic Patterns in Spoken Korean English presents fundamental research on the use of English by South Korean speakers. Despite the extraordinary and vibrant status of the English language in South Korean society (demonstrated, for example, by the notion of English Fever), research on the forms of English in the South Korean context has been sadly neglected in the study of World Englishes. This monograph is the first to provide a rich and contextualized description of the Korean English morpho-syntactic

repertoire. It draws on the specifically compiled Spoken Korean English (SPOKE) corpus to shed light on Korean uses of plural marking, articles, pronouns, prepositions, and verbs in spoken English, and demonstrates that English is indeed the language of those who use it. This volume will be highly relevant for researchers interested in Expanding Circle Englishes, Asian Englishes, spoken language corpora, and morpho-syntactic variation.

OV and VO variation in code-switching Ji Young Shim, 2021-03-11 This monograph is intended as a contribution to the field of bilingualism from a generative syntax perspective at a variety of levels. It investigates code-switching between Korean and English and also between Japanese and English, which exhibit several interesting features. Due to their canonical word order differences, Korean and Japanese being SOV (Subject-Object-Verb) and English SVO (Subject-Verb-Object), a code-switched sentence between Korean/Japanese and English can take, in principle, either OV or VO order, to which little attention has been paid in the literature. On the contrary, word order is one of the most extensively discussed topics in generative syntax, especially in the Principles and Parameter's approach (P&P) where various proposals have been made to account of various order patterns of different languages. By taking the generative view that linguistic variation is due to variation in the domain of functional categories rather than lexical roots (e.g. Borer 1984; Chomsky 1995), this monograph investigates word order variation in Korean-English and Japanese-English code-switching, with particular attention

to the relative placement of the predicate (verb) and its complement (object) in two contrasting word orders, OV and VO, which was tested against Korean-English and Japanese-English bilingual speakers' introspective judgments. The results provide strong evidence indicating that the distinction between functional and lexical verbs plays a major role in deriving different word orders (OV and VO, respectively) in Korean-English and Japanese-English code-switching, which supports the hypothesis that parametric variation is attributed to differences in the features of a functional category in the lexicon, as assumed in minimalist syntax. In particular, the explanation pursued in this monograph is based on feature inheritance, a syntactic derivational process, which was proposed in recent developments the Minimalist Program. The monograph shows that by studying diverse and creative word order patterns of code-switching, we are at a better disposal to understand how languages are parameterized similarly or differently in a given domain, which is the very topic that generative linguists have pursued for a long time.

Korean-English Bilingualism in Early Childhood Sunny K. Park-

Johnson, 2024-03-12 This book gives an overview of the linguistic development of Korean-English bilingual children living in the US. It provides a detailed longitudinal account of English and Korean acquisition in early childhood, offering a close examination of Korean-American children's code-switching and morphology and syntax development during a time when their language dominance is shifting rapidly. The book sheds light on the broad and creative linguistic capabilities of bilingual children, expands our understanding of heritage language acquisition and furthers bilingualism research on typologically distinct language pairings. Researchers investigating heritage

language development in early childhood will find the extensive longitudinal data a rich source of comparison and the book will be a useful resource for scholars and graduate students interested in sequential bilingualism, second language acquisition and heritage speakers.

Fifty Helps For The Beginner In The Use Of The Korean Language A.L. Baird,
Foundations of Language Ray Jackendoff, 2002-01-24 How does human language work? How do we put ideas into words that others can understand? Can linguistics shed light on the way the brain operates? *Foundations of Language* puts linguistics back at the centre of the search to understand human consciousness. Ray Jackendoff begins by surveying the developments in linguistics over the years since Noam Chomsky's *Aspects of the Theory of Syntax*. He goes on to propose a radical re-conception of how the brain processes language. This opens up vivid new perspectives on every major aspect of language and communication, including grammar, vocabulary, learning, the origins of human language, and how language relates to the real world. *Foundations of Language* makes important connections with other disciplines which have been isolated from linguistics for many years. It sets a new agenda for close cooperation between the study of language, mind, the brain, behaviour, and evolution.

Standard Korean-English Dictionary for Foreigners Gene S. Rhie, B. J. Jones, 1986

English-Korean Romanized Dictionary Taebum Kim, 2017-03-04 This book lists approximately 9,000 core Korean words that can be searched with English equivalents. It's ideal for learners of Korean as a second language who want to communicate more effectively and also for learners of English who know

Korean. Korean is written with two different scripts: Hangul and Hanjja (Chinese character). While Hangul is mostly used, Chinese characters should be used in order to clarify meaning and almost 80% of Korean language derives from Chinese characters. English main entries are in alphabetical order and stressed syllables of them are in boldface type for clear communication in English. (The contrast between stressed and unstressed syllables is very important because it helps to create the rhythm of English.) Each main entry is followed by parts of speech label and the entry's Korean equivalents. All Korean equivalent for main entries are written in both roman letters and Korean writing: Hangul and Hanjja (Chinese characters) if applicable. [example: area [n.] ji yeok (지역), myeon jeok (면적)] Learners can select to learn Chinese characters according to their needs and levels. For those who know Chinese characters, it might be easier to learn Korean. Since many Korean prefer to use foreign words in daily conversation, Korean pronunciation of foreign words are romanized in this book for better communication with Korean. [example: picnic [n.] pi keu nik (피크닉), so pung (소풍)]* Please refer to the website for more information. www.corevoca.com
