The Translator in the Text Rachel May, 1994-11-23 What does it mean to read one nation's literature in another language? The considerable popularity of Russian literature in the English-speaking world rests almost entirely upon translations. In *The Translator and the Text*, Rachel May analyzes Russian literature in English translation, seeing it less as a substitute for the original works than as a subset of English literature, with its own cultural, stylistic, and narrative traditions.

How to Translate - English Translation Guide in European Union Nicolae Sfetcu,

The Oxford Guide to Literature in English Translation Peter France, 2000 This book, written by a team of experts from many countries, provides a comprehensive account of the ways in which translation has brought the major literature of the world into English-speaking culture. Part I discusses theoretical issues and gives an overview of the history of translation into English. Part II, the bulk of the work, arranged by language of origin, offers critical discussions, with bibliographies, of the translation history of specific texts (e.g. the Koran, the Kalevala), authors (e.g. Lucretius, Dostoevsky), genres (e.g. Chinese poetry, twentieth-century Italian prose) and national literatures (e.g. Hungarian, Afrikaans).

Thomas Mann in English David Horton, 2013-04-11 Thomas Mann owes his place in world literature to the dissemination of his works through translation. Indeed, it was the monumental success of the original English translations that earned him the title of 'the greatest living man of letters' during his years in American exile (1938-52). This book provides the first systematic exploration of the English versions, illustrating the vicissitudes of literary translation through a principled discussion of a major author. The study illuminates the contexts in which the translations were produced before exploring the transformations Mann's work has undergone in the process of transfer. An exemplary analysis of selected textual dimensions demonstrates the multiplicity of factors which impinge upon literary translation, leading far beyond the traditional preoccupation with issues of equivalence. *Thomas Mann in English* thus fills a gap both in translation studies, where Thomas Mann serves as a constant but ill-defined point of reference, and in literary studies, which has focused increasingly on the author's wider reception.

Analysing English-Arabic Machine Translation Zakarya Almahasees, 2021-11-30 Machine Translation (MT) has become widely used throughout the world as a medium of communication between those who live in different countries and speak different languages. However, translation between distant languages constitutes a challenge for machines. Therefore, translation evaluation is poised to play a significant role in the process of designing and developing effective MT systems. This book evaluates three prominent MT systems, including Google Translate, Microsoft Translator, and Sakhr, each of which provides translation between English and Arabic. In the book Almahasees scrutinizes the capacity of the three systems in dealing with translation between English and Arabic in a large corpus taken from various domains, including the United Nation (UN), the World Health Organization (WHO), the Arab League, Petra News Agency reports, and two literary texts: The Old Man and the Sea and The Prophet. The evaluation covers holistic analysis to assess the output of the three systems in terms of Translation Automation User Society (TAUS) adequacy and fluency scales. The text also looks at error analysis to evaluate the systems' output in terms of orthography, lexis, grammar, and semantics at the entire-text level and in terms of lexis, grammar, and semantics at the collocation level. The research findings contained within this volume provide important feedback about the capabilities of the three MT systems with respect to English-Arabic translation and paves the way for further research on such an important topic. This book will be of interest to scholars and students of translation studies and translation technology.

Based on an analysis of the two translations' textual and paratextual features, it reveals the fascinating ways in which language, gender and translation interact. The book is intended for anyone who is interested in gender and translation studies, particularly in applying the new corpus methodology to exploring the interface between gender and translation in the Chinese context.

German and English Dirk Siepmann, 2020-11-29 German and English: Academic Usage and Academic Translation focuses on academic and popular scientific/academic usage. The main perspective taken is that of a translator working from German into English, but the converse direction is also regularly taken into account. Most of the examples used are based on errors that occurred in real-life translation jobs. Additional practice materials and sample translations are available as
