Efficient Information Searching on the Web Jonas Fransson,2010-05 Information searching on the Web has become part of our everyday life. Efficient Information Searching on the Web deals with different aspects which are important to become a better searcher. To search for information is one of the most common occupations on the Web. We do it for work, for studies and in our spare time. We search for information about illnesses, far away countries or spare parts for the car. The Web is an important source of information, no matter if you are a journalist, a student, a university researcher or a teacher. Everybody can become more effective when it comes to searching for information. Central matters of the book are: How does a search engine work? How may the search services be used more efficiently? What is the invisible Web? How can the information be managed once it is found?

**Open Source Intelligence Methods and Tools** Nihad A. Hassan,Rami Hijazi,2018-06-30 Apply Open Source Intelligence (OSINT) techniques, methods, and tools to acquire information from publicly available online sources to support your intelligence analysis. Use the harvested data in different scenarios such as financial, crime, and terrorism investigations as well as performing business competition analysis and acquiring intelligence about individuals and other entities. This book will also improve your skills to acquire information online from both the regular Internet as well as the hidden web through its two sub-layers: the deep web and the dark web. The author includes many OSINT resources that can be used by intelligence agencies as well as by enterprises to monitor trends on a global level, identify risks, and gather competitor intelligence so more effective decisions can be made. You will discover

techniques, methods, and tools that are equally used by hackers and penetration testers to gather intelligence about a specific target online. And you will be aware of how OSINT resources can be used in conducting social engineering attacks. Open Source Intelligence Methods and Tools takes a practical approach and lists hundreds of OSINT resources that can be used to gather intelligence from online public sources. The book also covers how to anonymize your digital identity online so you can conduct your searching activities without revealing your identity. What You'll Learn Identify intelligence needs and leverage a broad range of tools and sources to improve data collection, analysis, and decision making in your organization Use OSINT resources to protect individuals and enterprises by discovering data that is online, exposed, and sensitive and hide the data before it is revealed by outside attackers Gather corporate intelligence about business competitors and predict future market directions Conduct advanced searches to gather intelligence from social media sites such as Facebook and Twitter Understand the different layers that make up the Internet and how to search within the invisible web which contains both the deep and the dark webs Who This Book Is For Penetration testers, digital forensics investigators, intelligence services, military, law enforcement, UN agencies, and for-profit/non-profit enterprises

**Towards a new Nordic textile commitment** David Palm, Maria Elander, David Watson, Nikola Kiørboe, Kari-Anne Lyng, Stefán Gíslason, 2014 This report is the primary outcome from Part I of the project "Towards a new Nordic textile commitment - Collection, sorting, reuse and recycling" initiated by the Nordic Waste Group (NAG). The report for Part 2 will be published in December 2014. This report summarizes the work carried out in 2013. The four subreports will be the basis for the work to be performed in 2014 with the aim of creating a Voluntary Commitment and a Code of Conduct. The reports for 2013 are: • Mapping of current actors in the collection, sorting, reuse and recycling of used textiles and the management of textile wastes • Literature review of the traceability of global textile flows. • Definition and documentation of operational and best practice standards in the collection, sorting, reuse and recycling of used textiles and management of textile wastes. • Comparison with waste management of other waste streams. The report is part of the Nordic Prime Ministers' overall green growth initiative: "The Nordic Region - leading in green growth." **Exposed** Mia-Marie Hammarlin, 2019-09-15 This book illuminates the personal experience of being at the centre of a media scandal. It applies ethnological perspectives to empirical materials from a Swedish context to highlight the existential level of the phenomenon. How does it feel to be exposed through scandalisation? How does such an experience affect a person's everyday life? These are the urgent and fascinating questions that the book addresses. It also highlights the fusion between face-to-face communication and traditional news media. Gossip and rumour must be included in the idea of the media system for us to be able to understand the power of a media scandal, a finding leads to a critique of earlier research.

**Global Challenges in Integrated Coastal Zone Management** Einar Dahl, Josianne Støttrup, 2012-12-18 Growing pressure from increasingly diverse human activities coupled with climate change impacts threaten the functional integrity of coastal ecosystems around the globe. A multi-disciplinary approach towards understanding drivers, pressures and impacts in the coastal zone requires effective integration of data and information in policy and management, combining expertise from nature and social science, to reach a balanced and sustainable development of the coastal zone. This important book comprises the proceedings of The International Symposium on Integrated Coastal Zone Management, which took place in Arendal, Norway between 3-7 July 2011. The main objective of the Symposium was to present current knowledge and to address issues on advice and management related to the coastal zone. The major themes of papers included in this book are: Coastal habitats and ecosystem services Adaptation/mitigation to change in coastal systems Coastal governance Linking science and management Comprising a huge wealth of information, this timely and well-edited volume is essential reading for all those involved in coastal zone management around the globe. All libraries in research establishments and universities where marine, aquatic and environmental sciences, and fisheries and aquatic sciences are studied and taught will need copies of this important volume on their shelves.

**Who Watcheth** Helene Tursten, 2016 A woman is found dead in a cemetery, strangled and covered in plastic. Just a few days before her death, the victim had received a flower, an unintelligible note, and a photograph of herself. Detective Inspector Irene Huss and her colleagues on the Goteborg police force have neither clue nor motive to track in the case, and when similar murders follow, their search for the killer becomes increasingly desperate.

**Metadata and Semantic Research** Fabio Sartori, Miguel-Angel Sicilia, Nikos Manouselis, 2009-09-29 This volume constitutes the selected papers of the third international conference on Metadata and Semantic Research, MTSR 2009, held in Milan, Italy, in September/October 2009. In order to give a novel perspective in which both theoretical and application aspects of metadata research contribute in the growth of the area, this book mirrors the structure of the Congress, grouping the papers into three main categories: 1) theoretical research: results and proposals, 2) applications: case studies and proposals, 3) special track: metadata and semantics for agriculture, food and environment. The book contains 32 full papers (10 for the first category, 10 for the second and 12 for the third), selected from a preliminary initial set of about 70 submissions.

**Aesthetic Flexibility** Torbjörn Andersson, 2021-03-09 Competition among companies that produce complex or large product portfolios has created a need to use modularity strategies not only to flexibly manage technical complexity in a cost-effective manner but also to produce visually appealing products. This research aims to understand how the visual appearance of products is affected by modular product development strategies and creates coherent product brands. Thus, this study examines the intersection of design aesthetics, product portfolio management, product brand management, and design management. Specifically, this study aims to understand how such strategies constrain and generate possibilities when the industrial design process concerns itself with visual appearance. The main research approach has been qualitative multi-case methodology (Miles et al, 2014; Eisenhardt, 1989) and design theory building (Chakrabarti and Blessing, 2016) that collects data through interviews, experimentation, and theoretical studies based on findings in the literature. Sixteen face-to-face interviews were conducted with design vice presidents, senior designers, and senior design engineers at five Swedish manufacturers from the automotive, MedTech, consumer goods, commercial vehicles, and materials handling industries. This approach has resulted in the description of three theoretical models and a design method, product gist, for investigating prototypicality in a product category. Aesthetic flexibility reflects the requirement that under certain circumstances an industrial designer has to plan for future (as yet unknown) changes in a design. Each of the three theoretical models has a different focus: one model describes three ways manufacturing companies organise a strategic in-house design function; one model describes how design decisions are made on a general level through an intuitive and knowledge-based judgment process; and one model describes the strategies a manager needs to consider when developing an existing product portfolio and how the strategies influence industrial design practice. Understanding visual flexibility serves as a starting point for further investigations of how development strategies affect visual product design. This understanding provides industrial designers insight into how they can develop product systems that share design components across product lines to promote brand identity. The findings of this work illustrate and explain a complex and multi-faceted design phenomenon that many designers manage more or less intuitively today;

therefore, this study advances the understanding of the field for academics, teachers, and professional designers.

**Master Manipulator** James Ottar Grundvig, 2016-05-31 The explosive true story of fraud, embezzlement, and government betrayal. In 2000, the US Centers for Disease Control (CDC) carried out a secret mission to bury, skew, and manipulate data in six vaccine safety studies, in a coordinated effort to control the message that “vaccines do not cause autism.” They did so via secret meetings and backtesting health-care data. The CDC invested tens of millions of dollars in a foreign health-care data analytics startup run by Danish scientist Poul Thorsen, a move to ensure that no link ever surfaced. But fate had other ideas. The agency soon learned it couldn’t control Thorsen. In 2011, the US Justice Department indicted him for the theft of more than \$1 million of CDC grant money. Master Manipulator exposes the CDC’s hidden agenda for the cover-up. Influenced by Big Pharma money, future high-paying jobs, and political lobbyists, CDC executives charted a course different than what the findings of earlier vaccine safety studies revealed. The CDC needed an outsider to “flatten” the results of the data, while building an exit strategy: a fall guy in case the secret plan was exposed. Thorsen fit the bill nicely, conducting studies overseas. But the CDC’s plan backfired, as Thorsen took the money to the bank and the power went to his head. It would take years for his fraud scheme—funneling CDC grant money to a Danish university and then back to a CDC bank account he controlled—to play out. Master Manipulator is a true story of fraud and betrayal, and an insider’s view of what takes place behind the closed doors of agencies and drug companies, and with the people tasked to protect the health of American children. It’s a cautionary tale of the dangers of blind trust in the government and the health-care industry.

**Moving Safely** Vania Ceccato, 2013-09-12 The aim of Moving Safely is to provide both theoretical and empirical perspectives on safety conditions at subway stations. This book adopts an approach that is place-centered, focusing on the importance of physical and social environments of these transit settings on crime and perceived safety using Stockholm transportation system as a case study. It offers suggestions on how to plan safety at subway stations with a variety of passenger preferences, needs and resources.

**Environmental Justice in the Anthropocene** Stacia Ryder, Kathryn Powlen, Melinda Laituri, Stephanie A. Malin, Joshua Sbicca, Dimitris Stevis, 2021-06-10 Through various international case studies presented by both practitioners and scholars, Environmental Justice in the Anthropocene explores how an environmental justice approach is necessary for reflections on inequality in the Anthropocene and for forging societal transitions toward a more just and sustainable future. Environmental justice is a central component of sustainability politics during the Anthropocene – the current geological age in which human activity is the dominant influence on climate and the environment. Every aspect of sustainability politics requires a close analysis of equity implications, including problematizing the notion that humans as a collective are equally responsible for ushering in this new epoch. Environmental justice provides us with the tools to critically investigate the drivers and characteristics of this era and the debates over the inequitable outcomes of the Anthropocene for historically marginalized peoples. The contributors to this volume focus on a critical approach to power and issues of environmental injustice across time, space, and context, drawing from twelve national contexts: Austria, Bangladesh, Chile, China, India, Nicaragua, Hungary, Mexico, Brazil, Sweden, Tanzania, and the United States. Beyond highlighting injustices, the volume highlights forward-facing efforts at building just transitions, with a goal of identifying practical steps to connect theory and movement and envision an environmentally and ecologically just future. This interdisciplinary work will be of great interest to students, scholars, and practitioners focused on conservation, environmental politics and governance, environmental and earth sciences, environmental sociology, environment and planning, environmental justice, and global sustainability and governance. It will also be of interest to social and environmental justice advocates and activists.

**Discovering Hidden Gems in Foreign Languages** M.D. Miller, 2023-04-27 This book offers a practical approach to conducting research in foreign languages on topics with a global nexus. It introduces the problem researchers face when getting started with a research problem, such as setting up the research environment and establishing goals for the research. The researcher then needs to prepare and to conduct foreign-language research by generating key terms and searching the right places where the information they seek is most likely to be stored. Using the appropriate advanced search operators, the researcher narrows down the search results to the desired sources, thereby eliminating the irrelevant sources. Specialized knowledge of country-specific domains advances the specificity and relevance of the researcher’s efforts. The methods and tools demonstrated in this book are applicable to a variety of academic and practical fields. A doctor may ask “what are other experts in my field saying about ABC disease?” A sommelier may ask “where else in the world are XYZ grape varieties grown?” A businessman may ask “who are my global competitors in my market?” A doctoral student may ask “have any other students at universities abroad ever written a dissertation about my topic, too?” With the tools and techniques demonstrated in this book, all of these questions are answerable. This book concludes with chapters on translation and citation methods, and includes three case studies that demonstrate the practical use of the methods discussed above. This book targets academic researchers as well as students and faculty. This book will also be a good fit as an assigned reading for a college course on thesis/dissertation research.

**New Graphical Symbols for Many More** Annica Nordegren, Marie Arvinus, 2008 Contains the entries, presented by category, for the Swedish competition for designers of the new Swedish standard laying guidelines and policy for the design and use of graphical symbols.
