Labor Arbitration Under Fire James L. Stern,Joyce M. Najita,1997 Labor arbitration was once seen as an integral part of bargaining and as a pioneering effort to create shop floor justice. But the decline of unions in status and power has raised profound questions about the future of labor arbitration. While labor unions seek justice for twenty-two million workers covered by collective bargaining, arbitration of employment disputes in the non-unionized sectors of the economy is on the increase, with arbitration procedures promulgated by the employer substituting for more expensive litigation. Moreover, arbitration may find a new role among unrepresented employees as the obligation to justify discharges is more widely adopted. This volume chronicles the development of labor arbitration, analyzes the paths it is now following, and suggests what the future may hold under changing conditions.

Renaissance Go-Betweens Andreas Höfele,Werner von Koppenfels,2011-12-22 The volume analyses some of the travelling and bridge-building activities that went on in Renaissance Europe, mainly but not exclusively across the Channel, true to Montaigne's epoch-making program of describing 'the passage'. Its emphasis on Anglo-Continental relations ensures a firm basis in English literature, but its particular appeal lies in its European point of view, and in the perspectives it opens up into other areas of early modern culture, such as pictorial art, philosophy, and economics. The multiple implications of the go-between concept make for structured diversity. The chapters of this book are arranged in three stages. Part 1 ('Mediators') focuses on influential go-betweens, both as groups, like the translators, and as individual mediators. The second part of this book ('Mediations') is concerned with individual acts of mediation, and with the 'mental topographies' they presuppose, reflect and redraw in their turn. Part 3 ('Representations') looks at the role of exemplary intermediaries and the workings of mediation represented on the early modern English stage. Key features High quality anthology on phenomena of cultural exchange in the Renaissance era With contributions by outstanding international experts

Designing Enterprise Applications with the J2EE Platform Inderjeet Singh,2002 Following her widely acclaimedAutobiography of Red(A spellbinding achievement --Susan Sontag), a new collection of poetry and prose that displays Anne Carson's signature mixture of opposites--the classic and the modern, cinema and print, narrative and verse. InMen in the Off Hours, Carson reinvents figures as diverse as Oedipus, Emily Dickinson, and Audubon. She views the writings of Sappho, St. Augustine, and Catullus through a modern lens. She sets up startling juxtapositions (Lazarus among video paraphernalia; Virginia Woolf and Thucydides discussing war). And in a final prose poem, she meditates on the recent death of her mother. With its quiet, acute spirituality, its fearless wit and sensuality, and its joyful understanding that the fact of the matter for humans is imperfection,Men in the Off Hoursshows us the most exciting poet writing in English today (Michael Ondaatje) at her best. From the Hardcover edition.

Chess and the Art of Enterprise Architecture Gerben Wierda,2015-01-01 Enterprise Architecture is the discipline of managing the complexities of the Business-IT landscape. It has been around since the 1980's, when for the first time computers were connected in networks, and the already serious (and unsolved) problem of the complexity of computer programs for relatively simple business needs turned into the huge problem of large networks of them in complex business landscapes. In spite of many 'best practices' and 'frameworks' that have been introduced, Enterprise Architecture is not a great success. After thirty years, we still have the same problems. Chaos is still everywhere. Projects still fail far too often. In this book, (hidden) assumptions behind the existing approaches to enterprise architecture are challenged, and a more realistic perspective that helps us battle the

complexities and unpredictabilities of today's Business-IT landscapes is described. Practical suggestions about enterprise architecture governance and products, based on real-world experience with the described approach, complete the book. From general management to IT professionals, everyone who is confronted with the problem of managing Business-IT landscapes can profit from the insights this book offers. No specialist prior knowledge is required. Gerben Wierda is author of Mastering ArchiMate, and was, amongst other things, Lead Architect of the Judiciary in The Netherlands, Lead Architect of APG Asset Management, and is now Team Coordinator Architecture & Design at APG. He holds an M.Sc in Physics from the University of Groningen and an MBA from RSM Erasmus, Rotterdam.

The Enterprise of Death Jesse Bullington,2011-03-24 As the witch-pyres of the Spanish Inquisition blanket Renaissance Europe in a moral haze, a young African slave finds herself the unwilling apprentice of an ancient necromancer. Unfortunately, quitting his company proves even more hazardous than remaining his pupil when she is afflicted with a terrible curse. Yet salvation may lie in a mysterious tome her tutor has hidden somewhere on the war-torn continent. She sets out on a seemingly impossible journey to find the book, never suspecting her fate is tied to three strangers: the artist Niklaus Manuel Deutsch, the alchemist Dr. Paracelsus, and a gun-slinging Dutch mercenary. As Manuel paints her macabre story on canvas, plank, and church wall, the young apprentice becomes increasingly aware that death might be the least of her concerns.

Mathematics for Human Flourishing Francis Su,2020-01-07 The ancient Greeks argued that the best life was filled with beauty, truth, justice, play and love. The mathematician Francis Su knows just where to find them.--Kevin Hartnett, Quanta Magazine This is perhaps the most important mathematics book of our time. Francis Su shows mathematics is an experience of the

mind and, most important, of the heart.--James Tanton, Global Math Project For mathematician Francis Su, a society without mathematical affection is like a city without concerts, parks, or museums. To miss out on mathematics is to live without experiencing some of humanity's most beautiful ideas. In this profound book, written for a wide audience but especially for those disenchanted by their past experiences, an award-winning mathematician and educator weaves parables, puzzles, and personal reflections to show how mathematics meets basic human desires-- such as for play, beauty, freedom, justice, and love--and cultivates virtues essential for human flourishing. These desires and virtues, and the stories told here, reveal how mathematics is intimately tied to being human. Some lessons emerge from those who have struggled, including philosopher Simone Weil, whose own mathematical contributions were overshadowed by her brother's, and Christopher Jackson, who discovered mathematics as an inmate in a federal prison. Christopher's letters to the author appear throughout the book and show how this intellectual pursuit can--and must--be open to all.
