Biotechnology in Europe and Latin America Bernardo Sorj,Mark Cantley,Karl Simpson,2010-01-01 The materials presented at the conference have been updated and edited, to give in this book an up-to-date picture of capabilities and common IV interests. Although inevitably any book on biotechnology is obsolete by the time it appears, there is nothing obsolescent about the dynamism now being displayed in the development of the bioindustries in both continents. We hope that the presentations assembled in this volume will testify to this dynamic development, and stimulate its further promotion. [excerpt taken from the book's Preface]

Working for Change Brian Harvey,2008

Employment and Technical Change in Europe Ken Ducatel,1994 Provides a review of current knowledge about the complex relationships between work and information technology. The book steers a course between approaches which are technologically determinist and those which reject the importance of information technology as a shaping factor on working life.

The Politics of High Tech Growth Sean O'Riain,2004-04-26 This book argues that beneath the Irish trade and foreign investment boom lies a more interesting story of regional innovation promoted by an alliance between the state and local technical communities. This alliance was governed through a decentralized set of state institutions, drawing on 'global' and 'local' economic and political resources. This 'Developmental Network State' has had a significant impact on the growth of Ireland's high tech cluster and is central to the emergence of an international network of 'global high tech regions' from Silicon Valley to Ireland, Taiwan, and Israel. The book provides a detailed study of the rise of the software industry in Ireland and of the state institutions and political conditions which promoted it. It shows how new 'network state' policies and institutions have been central to high tech regions elsewhere.

The Rise and Fall of Christian Ireland Crawford Gribben,2021-09-09 The Rise and Fall of Christian Ireland describes the emergence, long dominance, sudden division, and recent decline of Ireland's most important religion, as a way of telling the history of the island and its peoples. Throughout its long history, Christianity in Ireland has lurched from crisis to crisis. Surviving the hostility of earlier religious cultures and the depredations of Vikings, evolving in the face of Gregorian reformation in the eleventh and twelfth centuries and more radical protestant renewal from the sixteenth century, Christianity has shaped in foundational ways how the Irish have understood themselves and their place in the world. And the Irish have shaped Christianity, too. Their churches have staffed some of the religion's most important institutions and developed some of its most popular ideas. But the Irish church, like the island, is divided. After 1922, a border marked out two jurisdictions with competing religious politics. The southern state turned to the Catholic church to shape its social mores, until it emerged from an experience of sudden-onset secularization to become one of the most progressive nations in Europe. The northern state moved more slowly beyond the protestant culture of its principal institutions, but in a similar direction of travel. In 2021, 1,500 years on from the birth of Saint Columba, Christian Ireland appears to be vanishing. But its critics need not relax any more than believers ought to despair. After the failure of several varieties of religious nationalism, what looks like irredeemable failure might actually be a second chance. In the ruins of the church, new Patricks and Columbas shape the rise of another Christian Ireland.
