How to Read Raphael's Ephemeris Jeff Mayo,Peter West,2000 Raphael's Ephemeris is the essential tool for all astrologers for calculating the daily positions of the sun, moon and planets throughout 365 days of the year. This book offers a guide to unlocking the meaning of the Ephemeris. It helps beginners understand the use of the Ephemeris.

The American Ephemeris 1950-2050 at Noon Neil F. Michelsen,Rique Pottenger,2011-05 The American Ephemeris 1950-2050 at Noon, Trans-Century Edition, is published in response to multiple requests for a one hundred year ephemeris covering these most useful years. With the years 1950 through 2050, only one ephemeris needs to be at hand, especially when traveling, for an astrologer to do quick lookups of both birth data and future transits for most people he or she might encounter. Since the 1976 publication of the first version of The American Ephemeris, 1931-1980, Neil F. Michelsen's ground-breaking series of ephemerides for astrologers have consistently set standards for accuracy in astrology, becoming indispensable to astrologers worldwide at every level from student to professional. The tradition continues with the addition of this new tropical ephemeris spanning from mid 20th century through mid 21st century, which is published in two versions. This one is calculated for noon UT, and the other for Midnight UT. Rique Pottenger has revised and expanded the Michelsen programming with updated Jet Propulsion Laboratory data and improvements in the computer generating program that, for example, enable finding double ingresses in a single day, plus more accurate station times. A new formula increases the accuracy of the Galactic Center calculation. Other new features have been added, the most obvious of which are the dwarf planets Ceres and Eris, in response to the 2006 decisions of the International Astronomical Union. Monthly positions have also been added for the remaining three of the former four major asteroids in wide use among astrologers, Pallas, Juno and Vesta, and also for the centaur, Chiron. 978-1-934976-27-2 624 pages \$29.95

The American Ephemeris for the 21st Century at Noon Neil F. Michelsen,Rique Pottenger,1996-01-01 THE AMERICAN EPHEMERIS FOR THE 21ST CENTURY AT NOON 2000-2050, 2E is the #1 most essential astrological reference book. Daily planetary positions from 2000-2050, moon phases, eclipses, void of course times, aspects, direct and retrograde station times, and astrological weather are included.
