World Rules for Equine Drug Testing and Therapeutic Medication Regulation: 2012 Policy of the National Horsemen's Benevolent and Protective Association Thomas Tobin, Kimberly Brewer, Kent H. Stirling, 2011-12-01 An essential guide for racehorse owners, trainers, and veterinarians, this volume discusses 1.) zero tolerance for performance-altering substances in horses, 2.) thresholds or regulatory limits for therapeutic medications and endogenous or environmental substances, 3.) the need for scientifically established medication withdrawal-time guidelines, and 4.) national standards for administrative procedures, laboratory accreditation, the reporting of chemical identifications and their quantitative determination, and independent analysis and review. Also presented are current thresholds and withdrawal-time guidelines as set forth by racing authorities.

Equine Drug Testing and Therapeutic Medication Regulation Kent Stirling, Thomas Tobin, 2009-08 The National Horsemen's Benevolent & Protective Association presents its Proposed National Policy on Drug Testing and Therapeutic Medication Regulation for Association of Racing Commissioners International (ARCI) Class 1, 2, 3, 4, and 5 substances. This document defines the relevant terms, and sets forth the regulatory need and scientific basis, for policies which include 1.) zero tolerance for performance-altering substances in horses, 2.) thresholds or regulatory limits for therapeutic medications and endogenous or environmental substances, 3.) the need for scientifically established medication withdrawal-time guidelines, and 4.) national standards for administrative procedures, laboratory accreditation, the reporting of chemical identifications and their quantitative determination, and independent analysis and review. Also, compiled here are the current thresholds and withdrawal-time guidelines as set forth by U.S. racing authorities.

The Horse Nutrition Bible Ruth Bishop, 2005-10-01 Compatibility of Pharmaceutical Products and Contact Materials Dennis Jenke Important safety aspects of compatibility for therapeutic products and their manufacturing systems, delivery devices, and containers Compatibility of Pharmaceutical Products and Contact Materials helps pharmaceutical, toxicology, analytical, and regulatory affairs professionals assess the safety of leachable and extractable chemicals associated with drug product packaging, manufacturing systems, and devices. The most comprehensive resource available, its coverage includes the strategies, tactics, and regulatory requirements for performing safety assessments, along with the means for interpreting results. Structured around a logical framework for an extractables and leachables safety assessment and closely linked to the pharmaceutical product development process, Compatibility of Pharmaceutical Products and Contact Materials directly addresses the

fundamental questions of what activities need to be performed to completely, efficiently, and effectively address the issue of product safety from an extractables and leachables perspective? and when do the various required activities need to be performed? Specifically, the chapters describe: Pertinent regulations and practical ways to meet guidelines Coordinating manufacturing, storage, and delivery systems development and qualification with therapeutic product development Materials characterization and the materials screening process Component and/or system qualification (illustrated by several case studies) Performing validation/migration studies and interpreting and reporting the results Creating a product registration dossier and putting it through regulatory review Product maintenance (Change Control) from an extractables and leachables perspective Likely future developments in extractables and leachables assessment Additionally, the book's appendix provides a database, including CAS registry numbers, chemical formulas and molecular weights of extractable/leachable substances that have been reported in the chemical literature. Detailing the interconnected roles played by analytical chemistry, biological science, toxicology, and regulatory science, Compatibility of Pharmaceutical Products and Contact Materials supplies a much-needed, comprehensive resource to all those in pharmaceutical product or medical device development.

Understanding Equine Business Basics Milton C. Toby, Karen L. Perch, 2023-06 Operating a horse business can be a fulfilling experience on many levels. But like any business activity, a horse business comes with its share of drudgery. The books must be balanced, the bills paid, and tax returns filled. In Understanding Equine Business Basics, lawyers Milton Toby and Karen Perch give an overview of issues and potential problems that confront every owner. They discuss ownership options, business records you should keep, employer-employee relations, and buying and selling. The authors also explain IRS regulations that govern horse ownership and how an owner might qualify for a tax deduction. This book is an essential guide for anyone who operates a horse business.

Standards for Permanent, Privately Owned Horse Quarantine Facilities (US Animal and Plant Health Inspection Service Regulation) (Aphis) (2018 Edition) The Law The Law Library, 2018-06-18 Standards for Permanent, Privately Owned Horse Quarantine Facilities (US Animal and Plant Health Inspection Service Regulation) (APHIS) (2018 Edition) The Law Library presents the complete text of the Standards for Permanent, Privately Owned Horse Quarantine Facilities (US Animal and Plant Health Inspection Service Regulation) (APHIS) (2018 Edition). Updated as of May 29, 2018 We are amending the regulations pertaining to the importation of horses to establish standards for the approval of permanent, privately owned quarantine facilities for horses. We are taking this action because regional and seasonal demand for quarantine services for horses often exceeds the space available at existing facilities. Allowing imported horses to be quarantined in permanent, privately owned quarantine facilities that meet the criteria established in this rule will facilitate the importation of horses while continuing to protect against the introduction of communicable diseases of horses. This book contains: - The complete text of the Standards for Permanent, Privately Owned Horse Quarantine Facilities (US Animal and Plant Health Inspection Service Regulation) (APHIS) (2018 Edition) - A table of contents with the page number of each section

An Overview of Safety and Health for Workers in the Horse-racing Industry ,2009 Data show that between the years 1998 and 2006 an estimate of more than 14,000 occupational injuries associated with the horse-racing industry were treated in U.S. hospital emergency rooms. Further, between 1992 and 2006, 79 deaths occurred to those working in this industry. These numbers are almost certainly underestimates of the true numbers. The data demonstrate that jockeys are not the only workers exposed to hazards in this industry. Trainers, grooms, exercise riders, and various others encounter many of the same hazards as jockeys, and it is important that these occupations have the same health and safety protections, for example, wearing safety vests and helmets when in close proximity with horses. The true risk for injuries in this industry cannot be properly evaluated without sustained data collection over an extended period of time, including collecting data on the number of workers in this industry and the injuries and fatalities that occur. It is not within the scope of current national surveillance systems to collect data to the detail necessary to accurately capture these injuries. Furthermore, without appropriate denominator data, injury rates cannot be calculated. The calculation of injury rates would allow for meaningful comparisons to workers in other industries. In order to accurately collect these data, a standardized injury report form could be created to collect critical information about injury incidents. This information could then be recorded and maintained in a centralized database. The development of such a system would allow for meaningful analyses to determine the etiology of injury in the United States for this industry. Northern California has implemented a system where track-side Board of Stewards provide independent reports on the purported cause, final reported status, and outcomes of injuries to jockeys. Other states could use the Northern California system as a model for their own horse racing injury surveillance. The variation of regulations between states creates an additional complication for worker safety and health. Safety and health concerns could be more easily managed if regulations were more synchronized among states. This would help improve health and safety requirements and PPE use regulations. To be competitive in this sport, jockeys must be vigilant in maintaining a low body weight. To keep a minimum weight, jockeys often resort to weight-reducing techniques, commonly known in the industry as 'wasting' and 'flipping.' These techniques pose a hazard to a jockey's long-term health. These activities may also lead to more immediate hazards if a jockey is dehydrated or otherwise not fit to ride. Representatives in other sports where weight can be an issue, like wrestling, have examined alternatives to weight requirements for keeping athletes healthy, such as minimum body fat requirements [NFHS 2006]. These alternatives should be evaluated for relevance in the horse-racing industry. Also, providing some form of health and nutritional education to jockeys would be prudent. Many opportunities exist for research regarding worker safety and health in the horse-racing industry and injury prevention. The possibility for lead exposure should be quantitatively assessed. If it is found that the exposure limits exceed current standards, this hazard could be remedied either by using an alternative to lead weights, such as weighted pads, or by encapsulating all lead weights. An evaluation of the effect of silica or synthetic fibers on the respiratory health of workers also is needed. The potential benefits of synthetic surfaces for the well-being of the horse should be weighed against possible respiratory ailments that

jockeys and horses may suffer. As with all emerging safety and health issues, NIOSH will do its best to continue monitoring the health and safety of these workers. An effort on the part of horse-racing industry representatives (race tracks, racing commissions, and horse owners) can be taken to lessen the many hazards faced by workers in the horse-racing industry. However, the responsibility to improve the safety and health of employees in this industry lies among all participants. Below are some measures for consideration. Industry Representatives (Race Tracks, Racing Commissions, and Horse Owners): 1. Make safety and health issues a part of the everyday, decision-making processes (e.g., whether races are held, conditions for canceling a race, assessments of a jockey's fitness to ride); 2. Work with jockeys and other professional associations to ensure adequate insurance and support for injured workers, while encouraging primary injury prevention practices; 3. Assess the health implications of the current weight requirements and options for adjusting weights consistently in consultation with health experts; 4. Develop and maintain a track-, state-, or corporate-level monitoring system to collect data on workers and their injuries and illnesses, which could serve as a model for developing a national-level surveillance system; 5. Develop standards for quality on-track and off-track medical care for all facilities that include the use of staff certified in Advanced Cardiac Life Support and adequate medical equipment; 6. Explore workplace and jockeys' room conditions with the intent of developing criteria for design, safety, hygiene, ventilation, and habitation; 7. Integrate the safety of both humans and animals into the design of equipment and facilities (e.g., padded starting gates and safety rails); 8. Support independent scientific inquiry into the dynamic health status of workers in the horse-racing industry; and, 9. Develop and provide appropriate education, consultation, referral, and treatment for jockeys regarding eating and weight control issues. Jockeys: 1. Become educated about proper nutrition and consider healthy alternatives for weight management; 2. Wear PPE and ensure that it is properly fitted and in good condition; and, 3. Work with industry representatives and professional associations to ensure appropriate support and follow up for injured workers, while encouraging primary injury prevention practices. Professional Associations: 1. Promote the safety and health of jockeys and other race track staff by working with industry representatives; 2. Work with industry representatives and jockeys to ensure appropriate support and follow up for injured workers; 3. Work with industry representatives to ensure adequate on-track and off-track medical care is available at all facilities; 4. Work with industry representatives to develop criteria for safe, clean jockeys' rooms; and, 5. Support industry representatives and jockeys in the development of appropriate education, consultation, referral, and treatment for eating and weight control issues. Other Race Track Workers: 1. Become educated and trained in safety issues relevant to work responsibilities; 2. Consider wearing PPE (e.g., helmets and vests) when in the vicinity of a horse; and, 3. Work with industry representatives and professional associations to ensure appropriate support and follow up for injured workers, while encouraging primary injury prevention practices.--NIOSHTIC-2.

Practical Horse Law Brenda Gilligan, 2008-04-15 *Practical Horse Law* sets out to be an accessible and readable

guide to the law for horse owners and riders in situations where they might need to consider their legal position and the need for legal advice. It also suggests steps which can be taken to prevent becoming involved in litigation in the first place. Horseriding is a risk sport, horses are valuable animals, and owners and riders need to be aware of all the legal pitfalls. It includes choosing a riding school, riding safely, whether in a school or on roads and tracks, buying, selling and loaning horses and equipment, accidents and veterinary negligence, how to make a claim and what to claim for, keeping horses at home or at livery, animal welfare and more.

Horse Law Julie Mackenzie, 2001 When Horse Law was first published in 1990, its original purpose was to provide a simple guide to the law for the horse owner as well as providing an initial reference book for solicitors or barristers who found themselves involved in cases concerning horses. The legal profession has changed considerably in the last 10 years; the trend is towards specialization and consequently there are a growing number of equine-law specialists. This comprehensive, updated and expanded edition is still a pertinent initial reference book for lawyers and covers a wide range of areas which can affect the horse world including: theft; buying and selling; negligence; the Animals Act 1971; rights of way for riders; keeping a horse, road traffic; protection of animals from cruelty; gaming and betting and the rules and regulations of the various equine disciplines. Horse Law does, however, remain sufficiently readable for the non-lawyer to find helpful. It is an invaluable and essential book, not only for the legal profession, but also other professionals involved in, or connected with horses whether

students, instructors, veterinary surgeons, transporters or farriers.
