Street Data Shane Safir, Jamila Dugan, 2021-02-12 Radically reimagine our ways of being, learning, and doing Education can be transformed if we eradicate our fixation on big data like standardized test scores as the supreme measure of equity and learning. Instead of the focus being on fixing and filling academic gaps, we must envision and rebuild the system from the student up—with classrooms, schools and systems built around students' brilliance, cultural wealth, and intellectual potential. Street data reminds us that what is measurable is not the same as what is valuable and that data can be humanizing, liberatory and healing. By breaking down street data fundamentals: what it is, how to gather it, and how it can complement other forms of data to guide a school or district's equity journey, Safir and Dugan offer an actionable framework for school transformation. Written for educators and policymakers, this book · Offers fresh ideas and innovative tools to apply immediately · Provides an asset-based model to help educators look for what's right in our students and communities instead of seeking what's wrong · Explores a different application of data, from its capacity to help us diagnose root causes of inequity, to its potential to transform learning, and its power to reshape adult culture Now is the time to take an antiracist stance, interrogate our assumptions about knowledge, measurement, and what really matters when it comes to educating young people.

The Myth of Private Equity Jeffrey C. Hooke, 2021-10-05 Once an obscure niche of the investment world, private equity has grown into a juggernaut, with consequences for a wide range of industries as well as the financial markets. Private equity funds control companies that represent trillions of dollars in assets, millions of employees, and the well-being of thousands of institutional investors and their beneficiaries. Even as the ruthlessness of some funds has made private equity a poster child for the harms of unfettered capitalism, many aspects of the industry remain opaque, hidden from the normal bounds of accountability. *The Myth of Private Equity* is a hard-hitting and meticulous exposé from an insider's viewpoint. Jeffrey C. Hooke—a former private equity executive and investment banker with deep knowledge of the industry—examines the negative effects of private equity and the ways in which it has avoided scrutiny. He unravels the exaggerations that the industry has spun to its customers and the business media, scrutinizing its claims of lucrative investment returns and financial wizardry and showing the stark realities that are concealed by the funds' self-mythologizing and penchant for secrecy. Hooke details the flaws in private equity's investment strategies, critically examines its day-to-day operations, and reveals the broad spectrum of its enablers. A bracing and essential read for both the financial profession and the broader public, this book pulls back the curtain on one of the most controversial areas of finance.

Equity-Centered Trauma-Informed Education Alex Shevrin Venet, 2023-09-01 Educators must both respond to the impact of trauma, and prevent trauma at school. Trauma-informed initiatives tend to focus on the challenging behaviors of students and ascribe them to circumstances that students are facing outside of school. This approach ignores the reality that inequity itself causes trauma, and that schools often heighten inequities when implementing trauma-informed practices that are not based in educational equity. In this fresh look at trauma-informed practice, Alex Shevrin Venet urges educators to shift equity to the center as they consider policies and professional development. Using a framework of six principles for equity-centered trauma-informed education, Venet offers practical action steps that teachers and school leaders can take from any starting point, using the resources and influence at their disposal to make shifts in practice, pedagogy, and policy. Overthrowing inequitable systems is a process, not an overnight change. But transformation is possible when educators work together, and teachers can do more than they realize from within their own classrooms.

Judging Equity T. Leigh Anenson, 2018-11-30 T. Leigh Anenson analyzes the scope of judicial authority and discretion to recognize the equitable doctrine of unclean hands as a bar to actions seeking damages in the United States. Bringing an American perspective to contentious conversation about law-equity fusion in other countries of the common law, Anenson provides a historical, doctrinal, and theoretical account of the integration, analyzes cases in the federal courts and across the fifty states, and

places the issue of integration within a broader debate over the fusion of law and equity. Her analysis also includes descriptive and normative accounts of the equitable maxim of unclean hands. This groundbreaking work, which clarifies conflicting case law and advances the idea of a principled fusion of law and equity, should be read by anyone interested in the need for equity - its cultivation, preservation, and celebration.

Equity and the Constitution Gary L. McDowell, 1982-04 Since the landmark desegregation decisions in the Brown vs. Board of Education cases, the proper role of the federal judiciary has been hotly debated. Has the federal judiciary, in its attempt to legislate social policy, overstepped its constitutional boundaries? In this volume, Gary McDowell considers the equity power created by Article III of the Constitution, on which the most controversial decisions of the Supreme Court have rested. He points out the equity was originally understood as an extraordinary means of offering relief to individuals in cases of fraud, accident, mistake, or trust and as a means of confining the operation of unjust and partial laws. It has now been stretched to offer relief to broadly defined social classes. This sociological understanding, in McDowell's view, has undermined equity as a substantive body of law. He urges a return to the former definition as a means of restraining the reach of federal jurisdiction.
