**A Lap Around the Field: Eredivisie 09/10** Martin Smit, 2015-02-03 A bird at the base, a pig that was not easy to wash, the legs of El Ahmadi, the pain threshold of Van Wolfswinkel, a beautiful blonde in Almelo, a terrible speaker in Arnhem; all this is about football. In this book, you can read the most notable quotes from the memorable Premier League season. Martin Smit was born in 1970. For years, he was a fanatic supporter of FC Groningen. *The relative age effect in Dutch Football* Panagiotis Agapiou, 2018-08-08 Diploma Thesis from the year 2018 in the subject Sport - Sport Economics, Sport Management, Tilburg University, course: Master Thesis Economics, language: English, abstract: The Relative Age Effect (RAE) is a phenomenon that impacts an individual's outcome. In particular, the RAE in sports favors those athletes that have been born prior to a cut-off date and is detrimental for those who were born later in the same period. The grouping of soccer players in academies benefits the early born football players in the selection for the elite team because of physical advantages that are based on biological maturation. Therefore, evidence suggests that the effect is more likely to be observed in the lower youth categories. This study examines the RAE in the Dutch football leagues by investigating data from the national teams U-15 and U-19 of the national team. A Pearson  $\chi^2$  test provides evidence that the observed birth date distribution deviates from the expected one, which leads to a skewed birth date distribution. The findings suggest that the early born football players have indeed an age advantage

in the selection system in relation to their late born peers. Moreover, there is higher probability that they will become professional in the future. Also, the RAE seems to decrease overtime, but it still exists, even in the elite category.

**Brilliant Orange** David Winner,2012-06-04 The Netherlands has been one of the world's most distinctive and sophisticated football cultures. From the birth of Total Football in the sixties, through two decades of World Cup near misses to the exiles who remade clubs like AC Milan, Barcelona, Arsenal and Chelsea in their own image, the Dutch have often been dazzlingly original and influential. The elements of their style (exquisite skills, adventurous attacking tactics, a unique blend of individual creativity and teamwork, weird patterns of self-destruction) reflect and embody the country's culture and history. This book lays bare the elegant, fractured soul of the Dutch Masters and the culture that spawned them by exploring and analysing its key ideas, institutions, personalities and history in the context of wider Dutch society.

**Talent Identification and Development in Youth Soccer** Adam L. Kelly,2023-09-11 Talent development pathways in youth soccer provide opportunities for young players to realise their potential. Such programmes have become increasingly popular throughout governing bodies, professional clubs, and independent organisations. This has coincided with a rapid rise in sport science literature focused specifically on optimising player development towards expertise. However, the decreasing age of recruitment, biases in selection, inconsistencies in the language used, underrepresented populations, and large dropout rates from pathways have magnified the potential flaws of existing organisational structures and settings. Moreover, despite both the professionalisation of talent development pathways and growing research attention, we still know little about the characteristics that facilitate accurate recruitment strategies into pathways and long-term development outcomes. Talent Identification and Development in Youth Soccer provides an all-encompassing guide for both researchers and practitioners by gathering the existing literature to help better understand the current context of this discipline. Chapters are contributed by a team of leading and emerging international experts, examining topics such as technical, tactical, physical, psychological, social, activities and trajectories, career transitions, relative age effects, creativity, and genetics, with each chapter offering important considerations for both researchers and practitioners. With a dual emphasis on both theory and practice, this book is an important text for any student, researcher, coach, or practitioner with an interest in talent identification, talent development, youth soccer, soccer coaching, or expertise and skill acquisition.

Four Histories about Early Dutch Football, 1910-1920 Nicholas Piercey,2016-10-06 What is the purpose of history today, and how can sporting research help us understand the world around us? In this stimulating book, Nicholas Piercey constructs four new histories of early Dutch football, exploring urban change, club members, the media, and the diaries of Cornelis Johannes Karel van Aalst, a stadium director, to propose practical examples of how history can become an important democratic tool for the 21st century.Using early Dutch football as a field for experimental thinking about the past, the four histories offer new insights into the lives, interests and passions of those connected to the sport in the 1910s and the cities they lived in. How did the First World War impact on Dutch football? Were new stadia a form of social control? Is the spread of the beautiful game really a good thing? And why was one of the sport's most prominent figures more concerned with potatoes? These stories of early Dutch football suggest how vital sport and history can be in shaping our lives, perceptions and actions, and why we need to challenge the influence they have today.

**The Economics of Competitive Sports** Plácido Rodríguez,Stefan Késenne,Ruud Koning,2015-05-29 The essence of any sports contest is competition. The very unpredictability of a sporting outcome distinguishes it from, say, an opera performance. This volume presents a state of the art overview of the economics of competitive sport along two main th

**Predictive Methods for Football and Betting Markets** Enrique Dóal Pérez Frías, 2023-09-23 What variables are relevant to predict the future results of a football team? Are there any inefficiencies in the betting markets that can be exploited? How many games are necessary to correctly measure the level of a team or a footballer? Is it better to bet on a team that is on a winning streak or is it better to bet on a team that is on a losing streak? What is the probability that a team that has just been promoted will be relegated in the next few seasons? What is the optimal size and composition of a team squad? How are the best and worst clubs different? What are the best bookmakers? In this book the reader will find the answer to these and many other questions about the beautiful game, thanks to data mining techniques applied to a historical database of more than 200,000 football matches and a statistical approach explained in an easily accessible style.

**Jacobus Cornelius Kapteyn** Pieter C. van der Kruit, 2014-11-18 Jacobus C. Kapteyn (1851-1922) was a Dutch astronomer who contributed heavily to major catalogs of star positions, such as the Cape Photographic Durchmusterung and the Harvard-Groningen Durchmusterung, and arranged extensive international collaboration through his Plan of Selected Areas. He contributed to the establishment of statistical astronomy and structure and dynamics of the Sidereal System. All aspects of Kapteyn's life are discussed, from his birth in Barneveld, the Netherlands, to his death in Amsterdam, and his entire resume of scientific achievements in between. Kapteyn had some conflicts with others in his field, especially after the world became divided on how to handle scientific contributions from Germany post-World War I. Both Kapteyn's struggles and achievements are written against the backdrop of both the historical context of the world at that time as well as the scientific one.

**Rants and Ramblings** Raafay Awan, 2023-01-17 Whenever I am happy or sad, I see something good or bad, my first instinct is to write about it, and that's what I have been doing for a long time now. There is this sense of relief, when I have typed down an encounter with an amazing person, shared about something nice I have seen, talk about a kind deed by a kind person, my experience during a tough situation, an observation that I believe

should be shared with people. Therefore, this book covers articles that I have written about my experiences such as meeting people who have inspired me or taught me something valuable, observing something that was worth the time spent, small instances and acts that have the power of making a difference, about family, life and work and everything that comes in between.
