*Mobile TV: Customizing Content and Experience* Aaron Marcus, Anxo Cereijo Roibás, Riccardo Sala, 2009-12-01 Developing usable, useful, and appealing solutions for the customer or user experience requires customization according to specific users' needs amidst frequently changing physical and social environments. Complex design problems like these require interdisciplinary perspectives that cover software functionality, human interaction and communication experiences, and perceived value. After defining and summarizing current research and development, this book focuses on Mobile TV experience in everyday life, innovative conceptual and participatory design methods, contextual analysis methods, social context for interactive multimedia systems, advanced interaction with mobile digital content, and future trends for the wide range of products and services that will be offered in the decade to come. The Editors have carefully balanced the theoretical and empirical approaches providing a valuable insight into principles and methods, as well as actionable guidelines and recommendations for all those interested in exploring how to achieve the core objectives of usability, usefulness, and social appeal of this new mobile-video technology. The book answers many questions, and raises some new ones that only future technology development and deployment in mobile human-computer interaction and communication can answer.

The Cold War [2 volumes] [2 volumes] Priscilla Roberts, 2018-12-07 This detailed two-volume set tells the story of the Cold War, the dominant international event of the second half of the 20th century, through a diverse selection of primary source documents. One of the most extensive to date, this set of primary source documents studies the Cold War comprehensively from its beginning, with the emergence of the world's first communist government in Russia in late 1917, to its end, in 1991. All of the key events, including the Berlin Blockade, the Korean War, the Cuban Missile Crisis, the Vietnam War, and the nuclear arms race, are discussed in detail. The primary sources provide insight into the thinking of all participants, drawing on Western, Soviet, Asian, and Latin American perspectives. In *The Cold War: Interpreting Conflict through Primary Documents* primary documents are organized chronologically, allowing readers to appreciate the ramifications of the Cold War within a clear time frame. Extensive interpretive commentary provides in-depth background and context for each document. **Routledge Handbook of Internet Politics** Andrew Chadwick, Philip N. Howard, 2008-08-18 The politics of the internet has entered the social science mainstream. From debates about its impact on parties and election campaigns following momentous presidential contests in the United States, to concerns over international security, privacy and surveillance in the post-9/11, post-7/7 environment; from the rise of blogging as a threat to the traditional model of journalism, to controversies at the international level over how and if the internet should be governed by an entity such as the United Nations; from the new repertoires of collective action open to citizens, to the massive programs of public management reform taking place in the name of e-government, internet politics and policy are continually in the headlines. The *Routledge Handbook of Internet Politics* is a collection of over thirty chapters dealing with the most significant scholarly debates in this rapidly growing field of study. Organized in four broad sections: Institutions, Behavior, Identities, and Law and Policy, the Handbook summarizes and criticizes contemporary debates while pointing out new departures. A comprehensive set of resources, it provides linkages to established theories of media and politics, political communication, governance, deliberative democracy and social movements, all within an interdisciplinary context. The contributors form a strong international cast of established and junior scholars. This is the first publication of its kind in this field; a helpful companion to students and scholars of politics, international relations, communication studies and sociology.
