Organizations for People Michael O'Malley,William F. Baker,2019-10-22 For many years, there has been quite a bit of talk about employee engagement as a means to lift corporate profits and reduce absenteeism and turnover. However, this talk has not produced better companies. In fact, the evidence shows that incivility and instances of employee abuse are getting worse. Additionally, with profit as the primary goal of organizations, most employees view any benign treatment they receive as a secondary convenience that will dissipate once corporate fortunes decline. That is, many employees still believe they are expendable in the eyes of their employers. This book turns that equation around by examining the practices of twenty-one companies that put the interests and needs of employees first. Profits are necessary but insufficient for corporate health. The companies featured in this book see it as their mission to offer people a better, more fulfilling life for themselves, and assist with that holistic journey by providing the organizational elements people need to reach their potential. They do this first by creating respectful and kind cultures that treat every person as an equal, sentient partner in the success of the company. Second, they diligently work to satisfy people's basic needs: financial security, belonging, meaning, autonomy, self-acceptance, self-confidence, and growth. The result is a web of fellow-feeling: earnest affection among people who feverishly work to live up to both the high standards of the institution and their obligations to one another. By providing a place where people can do their best work and thrive as individuals and as members of a cohesive community, everyone profits.

A strong policy response to the terms-of-trade shocks is critical and urgent in many countries. This report also examines sub-Saharan Africa's vulnerability to commodity price shocks, and documents the substantial progress made in financial develop, especially financial services based on mobile technologies.
